Energy problems are here to stay

By KENDACE BORRY

"You can expect to live with an energy problem the rest of your life," Pennsylvania Petroleum Association director Dale Murphy stated last week at the Pennsylvania Poultry Federation seminar.

"There is no way out of this horrible mess before the year 2000," he continued. "It can be relieved slightly, but only if we establish an effective national energy policy and do it now!"

Murphy told his audience that most Americans don't believe that there is a fuel crisis. But, he added, there is growing indications that many Americans do believe that the meddling of government officials in the energy markets may be the real problem.

"Our energy supply is a serious problem," Murphy stated. "We can't meet this fantastic demand through the year 2000 without a yearly increase of imports outside our borders. Over 47 per cent of our oil is imported."

A national energy policy would bring about great personal sacrifices of people at all levels, Murphy stressed. It would require billions of dollars but much of that could be spent from the savings of the money resulting from the decrease of imports because of this new energy policy.

It would require the use of The United State's own vast resources.

"The national energy policy should include all of that and more," he continued.

"It must be reasonable about environmental demands," he continued.

"It must cut out unnecessary governmental regulations. We must return to the free enterprise system."

"It must be sensible about encouraging the U.S. businesses to find new energy sources," he con-

Grain harvest marred by low yields and empty fuel tanks

By DIETER KRIEG

LANCASTER — There's not much positive news this year about the small grain harvest in southeastern Pennsylvania. The weather was about all that was good about it. And that was just for the time that the combining took place. It was dry. Too much rain earlier in the season has kept high yields from developing, and a number of fields were flattened. The reports aren't encouraging.

An even more worrisome factor might be the fuel shortage which has kept phones ringing at the Pennsylvania Department of Agriculture as well as farm organizations and elsewhere. Some farmers report that they can't get fuel to run their combines and tractors. According to John Nikoloff, spokesman for the Pennsylvania Department of Agriculture, the problem is widespread throughout the state.

So far, solutions to the fuel problem have been limited. Those suppliers who can help have generally been cooperative, says a public information officer at the Pennsylania Farmers' Association. But oftentimes the suppliers say they can't get fuel because of truckers having tied up supply routes.

While some farmers report delays with their barley harvest, others are done. The word is that yields were nothing to brag about. Dealers in the area are paying $1.70 to $2.00 per bushel, delivered.

The quality of barley isn't much either this year, reports indicate.

Meanwhile, grain prices are moving roller-coaster fashion as orders are affected by reports of grain sales to Russia and official acreage figures from the United States Department of Agriculture. A week ago grain prices moved sharply upward. This week they dropped just as harshly, hitting the limit in several instances.

With barley combining nearing its final stages, early reports from the area say that not much can be expected of the wheat crop either. A fungus disease, called scab, has hit some fields in the region, causing the heads to be not fully filled out. Scab is caused by the same organism that causes stalk rot in corn, explains Adams County Extension Agent John Schwartz. The problem can be especially acute if small grains are planted in fields that had previously been in corn, especially minimum-till fields.

One consolation to the poor harvest is that farmers are at least getting a fair amount of straw.

Utility 30-50 lbs. 44.00-48.00.

Market courtesy of USDA.

xxx

Farm parity is not a form of charity. Parity, a widely used and little understood expression even among farmers, measures what a farmer can buy today with the value of, say, a bushel of wheat or corn, compared with what he could buy with it during an earlier period.

Pa. Grain

June 25, 1979

Compared with last Monday's market, for Southeastern, Central and South Central Pennsylvania:

Corn steady to 15 cents higher, instances 30 cents higher; Wheat steady to 50 cents higher; Barley steady to 20 cents higher; Oats mostly steady; Ear Corn steady to $6 higher.

WE COUNT OUR CHICKENS BEFORE THEY HATCH!

Ernest, Ivan, and Leon Moyer review plans of the new construction.

Based on the many new friends and customers we've already made this year and future orders now booked, we've committed ourselves to increasing and improving our present facilities, again.

Construction started this month for use this September. This should double our yearly output of four years ago--1975.

When your counting on your next flock--count on us!

Moyer's CHICKS, INC.

DEKALB BROWN & WHITE EGG LAYERS

Quakertown, PA 18951

HUBBARD WHITE MT. BROILERS

From chick to cage, we formulate feeds and feeding programs with your profit in mind.

Do you have an open mind?

Are you ready to devote an hour or two of your time *planning* for a more profitable future?

If your answer to both questions is yes, you owe it to yourself to read what we have to say.

Unlike many other feed companies, we develop *custom* feeding programs for each individual operation.

It all starts with a Pennfield man reviewing your operation with you. Your goals. Your records. The health and overall condition of your birds. Whether you grow chicks or buy started pullets. The type of equipment you use. The production potential of your flock. Your management practices. And other factors that have an effect on your profit potential.

With the aid of computers, we then design a feeding program specifically tailored to *your* birds' needs—a program that can improve your profits by reducing expenses, increasing production, or both.

For example, when we recommend ____ producers switch from a competitive 18% protein feed to an Optimum Nutrient Density Pennfield feed, there was no loss in production—and this one recommendation has saved as much as $12,000 a year depending on flock size.

There is no cost—or obligation—for this unique service. But you must take the first step by writing or phoning us. Do it today.

Pennfield Feeds, 711 Rohrerstown Rd., Lancaster, PA 17604. Local calls: Lancaster 299-2561, Red Lion 244-4511. In 717 and 215 areas dial toll free 800-732-0467.

Livestock market and auction news

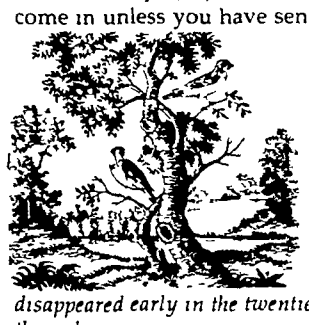
THE OLD FARMER'S ALMANAC

JULY 2-8, 1979

Celebrate, the weather's great!

Independence Dav on Wednesday Pacific cable arrived in Honolulu July 3, 1903 First quarter of the moon Julv 2 Average length of days for the week 15 hours 10 minutes Airmail began between N Y and California July 7, 1929 Liberty Bell cracked Julv 8, 1835 It is no use to wait for your ship to come in unless you have sent one out



Ask the Old Farmer Was a horseboat pulled along a canal bv several horses on the shore? A friend and I have a friendlv disagreement going T D, Reno, Nev

A horseboat was a scow-like craft with two paddle wheels which were powered by a horse-driven treadmill Two horses were used These boats were invented by a Mr Patten in New Hampshire but disappeared early in the twentieth century "Horsepower was literal in those days

Home Hints Candles will burn longer if you chill them thoroughlv in the refrigerator before use

OLD FARMER'S WEATHER FORECASTS

New England: Cool to start with rain inland, drizzle coast, then sunny and warm

Greater New York-New Jersey Seasonal with intermittent showers all week, partly sunny and cool at week s end

Middle Atlantic Coastal· Sunny with few showers north to midweek, cool with frequent showers last ot week

Piedmont & Southeast Coastal· Clear and very hot, scattered showers for weekend

St. Louis Cattle

June 28, 1979

Feeder cattle included about 600 head at regular Thursday auction. Very light supply feeder steers firm to 3.00 higher and feeder heifers firm to 2.00 higher but not enough either class on offer to provide an adequate test of prices.

FEEDER STEERS: Small lot Choice 200 lbs. 108.00; few lots 450-575 lbs. 81.50-88.00; couple lots 660-665 lbs. 74.00-79.50; few lots fleshy 885-975 lbs. 66.00-68.25. Mixed Good & Choice 500-575 lbs. 78.00-80.00; load Good 525 lbs. holsteins 72.00. Lot Standard & Good 590 lbs. holsteins 63.75. Couple lots Good & Choice 600-625 lbs. bulls 74.00-76.50.

FEEDER HEIFERS: Couple lots Good & Choice 410 lbs. 81.00-81.75; few lots 560-565 lbs. 73.00-73.50. Mixed Good & Choice 350-500 lbs. 71.00-76.25; 525-565 lbs. 67.75-71.75.

Receipts this week 2,700: week ago 4,500: year ago 2,700. Compared last weeks close, slaughter steers steady to .50 lower. Slaughter heifers steady. Both slaughter steers and heifers registered a price upturn on Monday. But declines Tuesday offset all of the previous days advance. Tuesday's lower trend was the result of a sharply curtailed buyer demand apparently due to transportation difficulties experienced by many slaughtering plants. Cows sold mostly 1.00 higher, while bulls were steady.

SLAUGHTER STEERS: Mixed Choice and Prime 2-4 1050-1225 lbs. on Tuesday 67.50-68.50 after ranging from 69.00-70.00 on Monday. Choice 2-4 950-1250 lbs. 66.50-69.50, bulk 66.50-68.00 on Tuesday. Mixed Good and Choice 2-4 900-1175 lbs. later 65.50-67.00. Good 2-3 900-1150 lbs. late 62.50-65.50. Scattered lots Standard and Good 2-2 1050-1300 lbs. Holsteins 60.00-62.00.

SLAUGHTER HEIFERS: Mixed Choice and Prime 2-4 875-1100 lbs. 66.00-67.00 Tuesday after ranging from 68.00-69.00 on Monday. Choice 2-4 800-1050 lbs. 65.00-68.00, mostly 65.50-66.50 on Tuesday. Mixed Good and Choice 2-3 700-975 lbs. late 63.50-65.00. Good 2-3 700-950 lbs. late 61.50-63.50.

COWS: Utility and Commercial 2-4 51.00-54.00. Boning Utility 1-2 54.00-56.00. Cutter 1-2 50.00-54.00. Canner and Low Cutter 1-2 47.00-50.00.

BULLS: Yield Grade 1-2 1050-1800 lbs. 56.00-64.00. Few Yield Grade 1 65.00.

Omaha Cattle

June 29, 1979

CATTLE: Closing prices on slaughter steers were 25-75 cents higher, instances 1.00 higher with best demand for Choice predominantly 3. Heifers were 50-1.25 higher. Cows closed 2.00-3.00 higher and bulls 3.00-4.00 higher.

Four Day receipts 9800 compared 12,500 for last week and 11,200 a year ago.

The fed cattle trade again followed an uneven course as dictated by an uncertain transportation situation. Supplies were sharply curtailed all week, and some slaughterers were out of operation on Monday because of full coolers and insufficient trucks for moving carcass beef.

Prices were forced downward in a bearish atmosphere Monday, but the early declines were more than recovered later as transportation problems eased and carcass prices advanced. After Monday, all buying interests were again trade participants. Slaughter steers made up approximately 53 pct. and heifer 31 pct. Cows comprised 14 pct, feeders scarce.

STEERS: Load Choice and Prime 1145 lbs. predominantly 3 with end 4 and part load Choice 3 1175 lbs. 70.00. Three loads Choice and Prime 3-4 1026-1296 lbs. 69.00-69.25. Choice predominantly 3 1050-1225 lbs. 68.25-69.00, Choice 3-4 1150-1300 lbs. 67.00-68.50. Mixed Good and Choice 2-3 1000-1250 lbs. 66.50-67.50. Good 2-3 63.50-66.00, Holsteins 61.00-63.00.

Average of LS-214 detailed quotations for Choice 900-1100 lbs. steers this week 67.98, Choice 1100-1300 lbs. 67.75. Average weight steers this week 1177 lbs. as compared 1166 lbs. the previous week. Average weight heifers this week 1005 lbs. as compared 1005 lbs. the previous week.

HEIFERS: Load Choice predominantly 3 1000 lbs. 69.50, load Choice and Prime 3-4 950 lbs. 69.25. Three loads Choice and Prime 3-4 1044 lbs. 68.50. Choice 2-4 900-1075 lbs. 67.00-68.50, load predominantly 3 925 lbs. 69.00. Mixed Good and Choice 850-1050 lbs. 65.50-67.00. Good 2-3 62.50-65.00.

COWS: Utility and Commercial 2-4 50.00-53.50, few high-dressing 54.00-54.50. Cutter 48.00-51.00. Canner and low-Cutter 46.00-48.50.

BULLS: 1-2 1400-2000 lbs. 60.00-68.00, few high-dresssing individuals 69.00-70.00.

Chambersburg Market

EDITORIAL COMMENTS By DIETER KRIEG, EDITOR

Keep on truckin'

Cut the violence and nonsense

Despite my strong, personal opposition to strike tactics, I'd like to give the dissatisfied truckers the benefit of the doubt. While I deplore the violence and the sight of rotting vegetables or dumped milk, I'm convinced that the causes of the shut-down are equally deplorable.

We've got a mess on our hands that has deep roots, and it's unfortunate that there probably won't be any easy solutions. And, tragically, violence will probably continue, and could very possibly get much worse.

We're struggling for solutions now largely because nobody with enough foresight was in control 10, 20, 30 years ago. We're almost in a panic situation. I pity the farmers who are caught in the middle of all this and can't get their products harvested or to market. In that respect, the actions of striking truckers are criminal and they should not be allowed.

It amazes me how a supposedly big, powerful country can be brought to its knees time and time again. Most any small group can put the squeeze on our economy these days, no matter whether it's a bunch of sheiks in the Mideast, a well-financed lobby in Washington, or a few thousand truckers on our highways.

It's enough to make a person wonder whether democracy and free enterprise are still alive. It's shocking to think that a nation with so much wealth and potential and power is so vulnerable to the actions of a handful of people. But that's where we're at, no matter how much we don't like it.

I'm unquestionably opposed to strikes - this truckers' strike, or any other strike. All they accomplish is to add a few more weights to our sinking economy. Rather, we should grab on to some good old-fashioned national pride and work for solutions in the spirit of what's best for our country.

A good place to begin would be to clean up the foolishness in Washington as well as our state capitals. If we had some sensible regulations coming from our lawmakers, our independent truckers wouldn't be on strike. And the same would probably be true for many other problem situations.

The sad truth is that we've been harnessed with so many stinking regulations that we can hardly call ourselves an industrious, efficient nation. The trucking industry provides a good example of that That's why I give the independent drivers the benefit of the doubt

What sense does it make, for example, for trucks to run loaded one way, and come back empty. That makes no sense. Truckers wouldn't be so stupid as to not want to run with a load in all directions But the government forces them to run empty half the time. Talk about wasting fuel, there's a classic example

Thank God, some officials, including President Carter, are beginning to realize that. In fact, President Carter said in a speech more than two years ago:

"In the energy considerations, it is obviously a gross waste to have trucks required to haul a load a long distance and then because of unnecessary constraints by the government bureaucracy have to come all the way back home empty."

Those were good words from the President, but we still haven't seen any action, and that's what we need. It better come soon, and if the Teamsters Union doesn't like it, as they say they won't, then let's put them in their place promptly. We've got too serious a situation to contend with to allow foolishness on their part The independent truckers are not members of the Teamsters Union, and they've been opposed to

GOOD GUYS & BAD GUYS

Lesson for July 1, 1979

Background Scripture:
1 Kings 12:1 through 14:20
Devotional Reading:
Psalms 1

Much of our national political life is conducted on the level of "the good guys vs. the bad guys."

The "good guys" of course, are generally "our guys" – Republican if we are Republican, or Democratic if we are Democratic. The "bad guys," are obviously the "other guys," representatives of the party to which we are unendingly opposed.

A further distinction is that the "good guys" do good things and make right decisions, while the "bad guys" do bad things and make wrong decisions.

The King Took Counsel

The story of Rehoboam and Jeroboam in 1 Kings throws a different light upon this point of view. For one thing, it is really quite difficult – if not impossible – to determine who is the "good guy."

Take Rehoboam, for example. Our first glimpse leads us to think of him as an arch villain. His father, King Solomon, has died and he is to be the successor on the throne. The nation of Israel seems willing enough to have him as their king, with one provision: "Your father made our yoke heavy, but do you lighten and hard service of your father and his heavy yoke upon us, and we will serve you" (1 Kings 12:4). All Rehoboam had to do to get off to a good start was to make this one single concession.

Rehoboam asked for some time to make up his mind, but he really shouldn't have needed either time or assistance. He should have known that their request was both just and necessary for the kingdom. And when, at last, he decides, He makes a disastrous choice: "My father made your yoke heavy, but I will add to your yoke; my father chastised you with whips, but I will chastise you with scorpions"! (1 Kings 12:14)

Hearkening to God

Obviously, Rehoboam is one of the "bad guys." Yet, in the next passage we see him in an entirely different light. When Shemaiah warns him that it is against God's will to march against the northern rebels, contrary to his "bad guy" image, Rehoboam "hearkened" to the work of the Lord, and went home again (12:24).

Up until this point, Jeroboam, the leader of the northern rebels, seems to be a "good guy," particularly in contrast with Rehoboam But, just as Rehoboam made some bad decisions, so Jeroboam makes some of his own, building altars that are quite against the will of God. The "good guy" also seems to have changed his image.

Christ has helped us to understand that there is something of the "good guy" and "bad guy" in each of us. None of us are so "good" that we don't need redemption. None of us are so "bad" that we cannot find forgiveness. The Christian strives to help the "good guy" within prevail over the "bad guy" that is always there too

NOW IS THE TIME

TO CONTROL MULTIFLORA ROSES

This is the season of the year when land owners should give some attention to the control of wild roses in their pasture and woodland. During the last 25 years this wild rose has been promoted by a number of conservatons organizations for the purpose of promoting habitat for game and for the conserving of soil.

However, in recent years those wild roses have gotten out of control and are a problem in too many pasture fields and woodlots. During the growing season we would suggest that land owners with this problems treat these bushes with either Tordon 10-K pellets or by spraying with the herbicide Roundup. Control would be more successful if the treament is applied when the plants are in blossom and when they are growing most rapidly. We feel that multiflora roses are a major problem in far too many pastures and woodland properties.

TO INSPECT WHEAT CROP

During the past several weeks a number of local wheat growers have reported the heads in their wheat plants are not developing properly. After inspecting several of these fields we feel it is a condition called "wheat scab" that is responsible for this poor head development. At the present time there is little that can be done to improve the situation. These heads cannot be expected to develop a normal wheat kernel.

In planning ahead we suggest that growers be sure to use certified seed this Fall so that the chance of infection from one crop to another will be eliminated.

TO USE TESTED SIRES

During the Summer months many owners of beef, swine and sheep herds will be investing in new herd sires. This used to be true in the dairy business but artifical insemination has eliminated this chore for most dairymen. We strongly urge that livestock producers purchase the best possible sires for their female herd. In most cases testing programs are now operating which will give considerable guidance in the selection of a good sire.

The most progressive breeders of livestock feel that a good sire connot be too expensive because he will have great influence on the future of the herd. However, too many cheap or bargain sires have turned out to be very expensive for the livestock producer. Don't "pinch pennies" when buying your next herd sire.

TO CHECK INSURANCE COVERAGE

For the past several decades the value of buildings and personal property have been on the increase. In order to cope with this situation we have frequently suggested that property owners adjust their insurance coverage so that replacement cost will be covered rather than original cost. The same situation holds true with personal property as well as buildings. We are aware that some losses in the past have not been suffiecientl covered in insurance and the farmer was the loser.

Unless the insurance program has been adjusted in the past few years, we suggest that the insurance agent be contacted and be utilized as a guide in giving full coverage.

Friday, July 6

York County 4-H livestock judging competition, at the Kushner Farm, Wellsville, 9.30 a.m.

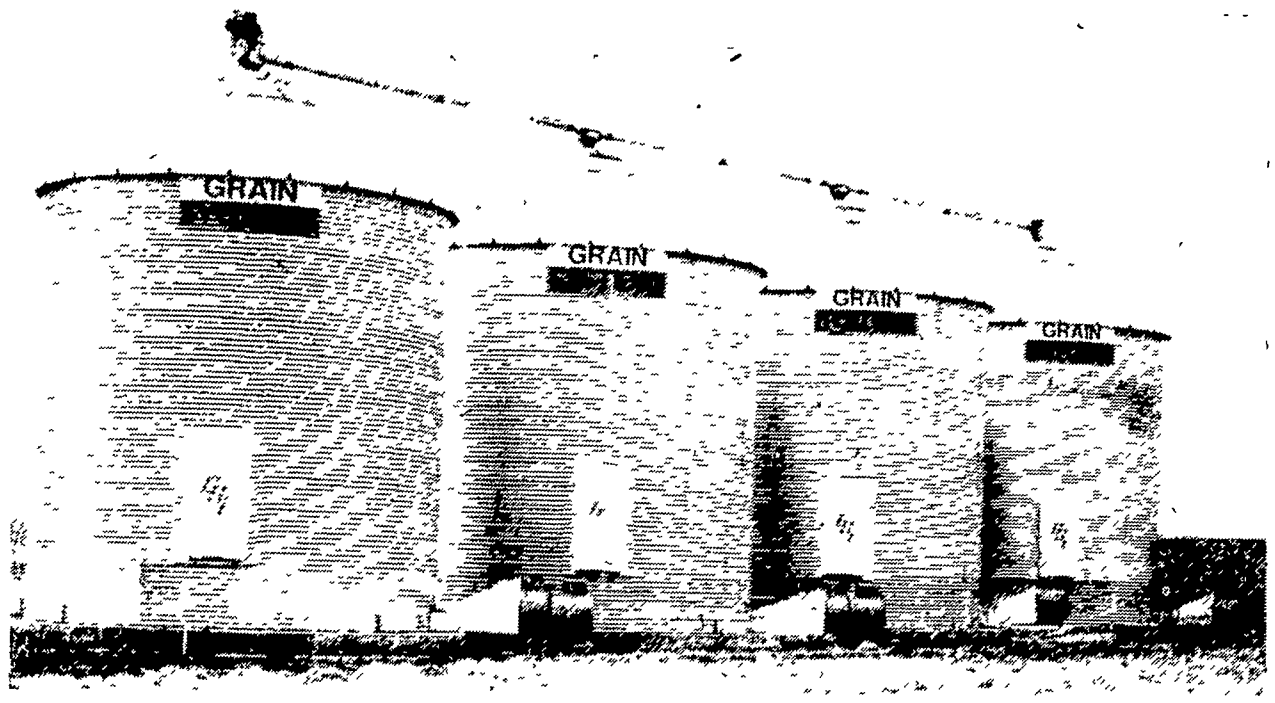
Pennsylvania Young Farmers Association Summer Conference, today and tomorrow, Blue Mountain High School, Schuylkill County. Also, picnic and tours.

Saturday, July 7

Juniata County Farmers' Association picnic, 7 p.m.

THE SYSTEMS PEOPLE

THE MOST VERSATILE GRAIN DRYING, CONVEYING & STORAGE



A GSI ON-FARM STORAGE SYSTEM.

FEATURING:

- All galvanized steel with G-90 galvanized coating, including galvanized doors.
- Our steel is A446 Quality or a minimum yield of 40,000 pounds per square inch.
- Walk around steps on top of roof.
- Equipped with safety rings.
- No welding anywhere on roof, prevents rust.
- Slotted holes to raise & lower roof for air movement for drying.

WE AT **E. M. HERR EQUIP. INC.** HOPE YOU WILL TAKE THE TIME TO DISCOVER HOW A GRAIN HANDLING SYSTEM CAN IMPROVE THE EFFICIENCY OF YOUR GRAIN FARMING.

E. M. HERR EQUIP. INC. IS READY TO ASSIST YOU TODAY WITH YOUR FARM NEEDS.

Figure it for yourself.

You get them on feed at half the cost with our pre-starter.

The difference is dramatic. You save half the cost of a commercial pre-starter when you build your own with Vigortone's Creep Wean No. 3.

Your figures will prove it.

First, you save because you use feedstuffs grown on your own farm; no need to purchase someone else's grain.

Next, you fortify these feedstuffs with Vigortone's Creep Wean Pre-Mix No. 3, a potent combination of all the vitamins, minerals and amino acids needed for optimum nutrition.

Finally, you do the grinding and mixing yourself - FRESH - adding the right amount of soybean meal for proper protein levels. And if a health problem does arise, you can medicate immediately.

There you have it: a highly fortified pre-starter that saves you half the cost of a commercial brand.

Figure on further savings - all the way to market.
Vigortone swine feeding programs offer cost savings in your starter, growing and finishing rations as well.

You'll save substantially over commercial starters with Vigortone 16% starter using your own grain - no fillers. And Vigortone's corn-soy growing and finishing programs combine economy and quick-to-market-weight nutrition.

Now is the time to compare.
See your Vigortone dealer soon. He's ready to compare the performance of Vigortone's low-cost swine feeding programs with any other you name.

Energy problems

(Continued from Page 1)

tinued. "We must triple the use of coal by 1990. And we must use nuclear energy, but with a safety factor built in."

"We must encourage research and development on broad fronts, to find additional energies. We must develop the use of all alternate energies, however it is wrong to think that solar and other forms of energy will be in control of the energy problemn by 1985.

"We must be conserving energy of all kinds," he continued. "We've got to do without unnecessary luxuries."

Murphy called for a moratorium on the following:

Disposable containers

Catalytic converters on tailpipes and all exhaust and circulation units on cars, except in Los Angeles and other areas where chimney effects are found in downtown areas.

Buildings that can't open their windows

Lead must be put back in gasoline, Murphy added. And the 55 mph speed limit must be enforced. Mass transportation must be increased ten-fold.

"We must decrease our demand for foreign oil by two million barrels daily and increase our domestic supply by 3½ million barrels per day by 1985," he suggested. "This sort of action could put OPEC countries on their knees. They will discover that their biggest custome doesn't need them."

"America is not running out of resources, the environmental blocks are not allowing it to develop its resources properly."

He added that the U.S. has enough fossil fuels to run the country for 100 years.

"We must forget the middle blocks that make us all feel guilty," he said.

"The issues facing us today will determine what this country will be like for a generation or more to come," Murphy stated.

"We have a choice—we can either continue to compound the errors of the past or renew the foundation of the democratic system, begin to build wisely, soundly, for a future energy-wise economy, one that is economic in all ways."

"A revival of patriotism could be the spark that our society needs so badly today," he concluded. "We need to regain patriotic visions and build a national purpose."

Expert recommends grain export plan

LAS VEGAS, June 22 - A grain export executive recently called for a new contingency plan which would enable the United States to guard against unexpected and potentially damaging "runs" on the country's grain supplies.

Clarence D. Palmby, vice president, Continential Grain Company, suggested development of standby prior approval grain and oilseed export regulations and procedures by the U.S. Department of Agriculture which could be readily implemented when and if needed.

These would be beyond the scope of the existing export reporting program and export sales weekly publication, he explained. "Export reporting, as currently mandated, is relatively unimportant compared to projected annual exports of grain and oilseeds."

"Future events could require possibly the implementation of temporary export allocation regulations," he said.

In his view, it would be far better to be prepared with sound guidelines to effective regulations than to resort to export embargoes or other drastic actions.

Key to preparation of such guidelines would be the development of minimum carryover figures for decision making.

"Every Secretary of Agriculture within my memory has fretted over the lack of specific, recognized and acceptable minimum carryovers - both real and projected - for program purposes," Palmby continued. "Likewise they have anguished over authorities granted them by the Export Administration Act, definitive implementation of which while practically feasible were politically impractical."

He noted that the world has, for several years, seen generally favorable weather for crops and that production has responded to increased use. "We appear to be in the early stages of balanced supply and demand. In fact, demand seems to be sufficiently strong to pull down carryovers."

All the more reason, he argued, to plan in this period of relative price stability and grain abundance for what may be ahead.

Speaking before the National Cattlemen's Association's "Cattle Industry Seminar for Bankers." Palmby characterized the cattle industry as a "shock absorber" to the grain industry.

"When grain prices rise in relation to beef carcass prices, response is immediately obvious as cattle utilize less grain. The beef industry offers a classic example of how the free price concept operates."

In an overview of market developments in the past decade, Palmby said the "pull for more and better food in non-market economy countries by the leaders of such nations will be the food story of this 10-year period now ending."

Palmby expects the Soviet Union to hold to its goal of expanding livestock and poultry production. "That plan will require more grain and other feed ingredients from the United States."

He added that he does not look for any "great surprises" from China. "I do not foresee any major moves to expand livestock production. That nation will continue to import grain for food."

Ever tried a Deviled Cheese Spread for fish? It's delicious! Mix two cups of shredded Cheddar cheese with one-half cup of chili sauce, two tablespoons prepared mustard and one tablespoon of prepared horseradish. spread on broiled fish, then broil one to two minutes more until cheese starts to melt.

Trade pact legislation supported

WASHINGTON, D.C. - The National Council of Farmer Cooperatives recently announced its strong supports for a landmark trade bill, The Trade Agreements Act of 1979, introduced in Congress.

The bill would implement U.S. rights and obligations under agreement reached by nations representing over 90 per cent of world commerce during recent multilateral trade negotations in Geneva, Switzerland.

In a letter to members of Congress, NCFC President Kenneth D. Naden praised prompt endorsement of the bill by the House Ways & Means Committee, and called for its early passage. The bill has, in effect, been under consideration by the Senate Finance Committee and House Ways & Means Committees since the agreements were signed by GATT (General Agreement on Tariffs and Trade) nation in Geneva on April 12.

Naden said that while U.S. farmers would realize only modest immediate benefits from the agreements, they offer potential for substantial long-range expanded trade. He added that maximum benefits could be achieved only through effective implementation of subsidy, standards, and other international codes for fairer trading practices.

"Futhermore," said Naden, "if we don't successfully conclude this round of negotiations, we face serious dangers of continued rising protectionism. That, in turn, could lead to trade disruptions which would be very damaging to U.S. agriculture, our nation, and the world economy."

The NCFC chief executive praised the outstanding work of the U.S. trade team led by Ambassador Robert S. Strauss. Naden said that successful conclusion of the agreements were due in large measure to Strauss' exceptional leadership.

The cooperative leader noted that conclusion of this trade agreement doesn't represent a full solution to world trade problems. But, he said, it's an important step toward a fairer and more efficient trading system which will serve us well.

Leadership Council delegates to the annual 4-H Leadership Congress held June 25 to 28 at Penn State, check program responsibilities with Carroll L. Howes, right, acting 4-H division leader at Penn State. The delegates from left are: Jay Stauffer, Lancaster; and Martha Gregory, Lititz. The Leadership Council, consisting of 54 outstanding 4-H members, was the ruling body for the 1,200 young adults who attended the four-day educational conference. The 4-H Congress was designed to increase skills in leadership and citizenship.

Del. roadside, pick-your-own marketing information available

NEWARK, Del. - Pick-your-own and roadside market operations are popular ways to distribute locally grown fruits and vegetables. They often enable the farmer to obtain a higher return for the crop he produces. At the same time, they offer the consumer quality produce of a freshness which may otherwise be hard to come by

Both forms of direct marketing have been getting a lot of attention in Delaware lately, thanks to a federal grant to the state Cooperative Extension Service for research on ways in which to improve local farmer-to-consumer fresh produce sales.

As part of this project, the Extension Service has developed a slide set and narrative script entitled "Roadside and Pick-Your-Own Marketing"

The slides and accompanying script are designed to assist Delaware producers of fruits and vegetables to realize a higher return on their crops by selling directly to the public. The set contains current information on direct marketing procedures which should be of considerable use to growers presently involved in or contemplating involvement in either form of fresh produce sales.

Slides were selected from pictures taken at various markets and farms in Delaware and neighboring states. They illustrate proper management and marketing practices for pick-your-own and roadside marketing operations. Topics covered include location; parking; building, plot or market layout; facilities and equipment; products; display; pricing; packaging and containers; advertising; and customer service.

"Efficiency in management is the key for anyone interested in running a profitable direct marketing business," stresses Extension crops marketing specialist Carl German, who supervised preparation of this educational package.

The set of 166 slides and script was designed for use with direct marketing audiences and can be obtained on a rental or purchase basis. The complete set is available at a cost of $35. The rental fee is $10. Inquiries regarding purchase or rental should be directed to: Carl German, 230 Agricultural Hall, University of Delaware, Newark, Del. 19711, 302-738-2511.

College agribusiness program offered

WILLIAMSPORT - The Williamsport Area Community College started an agribusiness program last Fall, and has a few openings for students interested in enrolling for this coming year. This program combines courses in agriculture with business courses to prepare men and women to enter the many careers in the agriculture and agribusiness world. The program is designed to prepare students for mid-management positions in an agricultural business, or to work in production agriculture.

The agribusiness program is a two-year program leading to an Associate of Applied Science Degree. Agriculture courses are designed to provide the student with the skills necessary to manage or work in an agricultural business, and to run a farm efficiently. The student will learn the procedures involved in dairy farming, livestock production, and crop production. Business courses included in the program cover basic business operations and business procedures; which are directly related to agricultural management, record keeping, finance, and marketing. Two hundred hours of supervised experience on approved farms or businesses are also included in the program.

Applications for admission and information regarding tuition and financial aid may be obtained by writing to: Admissions Office, The Williamsport Area Community College, 1005 West Third Street, Williamsport, PA 17701; Phone: 717/326-3761, Extension 336.

Low fertility of confined hogs has Missouri scientists busy

COLUMBIA, Mo. -- Confined hogs aren't as fertile as those raised in open areas, and University of Missouri-Columbia scientists are trying to find out why.

"We're looking at hormone level of gilts and sows on pasture vs. those raised in confinement to see why the confined animals are slower to show heat," said Bill N. Day and Ken Eslienshade, UMC swine researchers.

"Producers would like their gilts to come in heat at six to seven months, while too many of those in confinement don't exhibit heat until nine to 10 months or even later."

Day and his colleagues are looking at hormones produced by the pituitary, adrenal glands and ovaries.

"We are interested in knowing if the problem is due to an imbalance of hormones before attempting to develop corrective management practices." said Day.

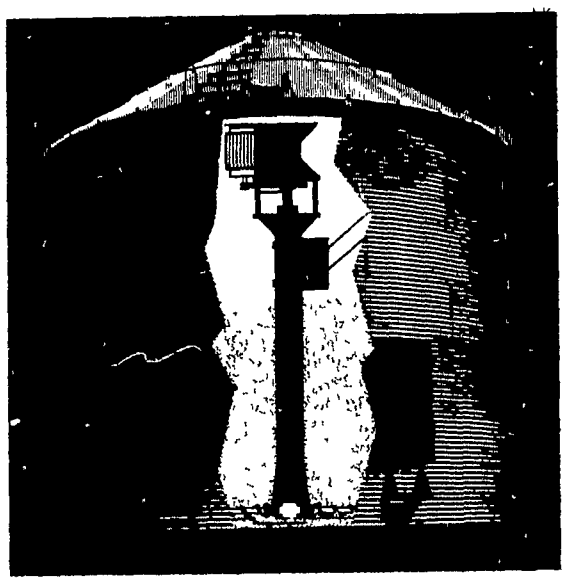
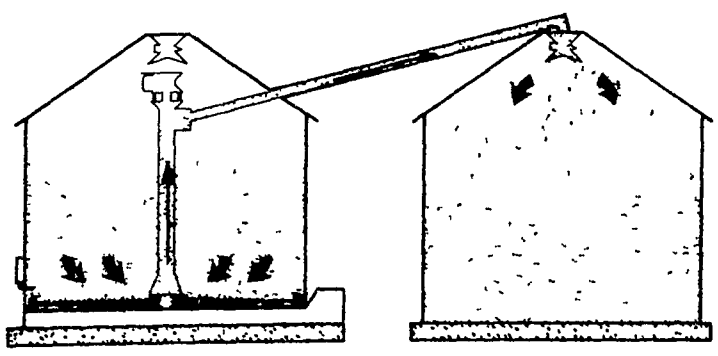
FOR THE BALANCED DIET

NOW IT'S POSSIBLE WITH A MARTIN FLO-MOOR DRYING SYSTEM

LEASE Dryer For Only 2¢ Per Bu Storage Bins 7¢ Based On 36' Capacity

1. Dry your grain for as low as 3¢ per bu.
2. Operate automatically at any temperature from natural air to 160 degrees.
3. Dry up to 12,560 bu./day automatically without any babysitting.
4. Add wet grain at any time as fast as your harvest.
5. Eliminate the need for a wet holding tank.
6. Eliminate waiting around to unload wet grain.
7. Use dryer bin off-season as a storage bin.
8. Unit also fits into used bins 18' to 36' diameter.
9. It's the only system that can operate as a low temperature batch, medium or high temp. recirculator, or a completely automatic continuous flow system at any temperature up to 160 degrees.





UNIQUE AND EXCLUSIVE FEATURES
- Twin tapered sweep augers with ¼" mandrell rolled flighting
- 1¼" cold rolled sweep shaft is threaded to gearbox (no bolts or pins to come loose)
- The Electronic Moisture Control regulates the drying of all grain to an exact moisture content
- Extra heavy duty gearbox with a 1 to 1 ratio in oil is 5 times stronger than the load requirement, assures many years of trouble free operation
- No mechanical equipment below the floor
- Automatic shut-off when grain level drops to 2 ft depth
- Grain cleaner removes bees wings, broken kernels and screenings

Third generation farmer raises Ayrshire cows

By JOAN LIESAU

POTTSTOWN — "Cows have to work for us. If they're not milking, we can't keep them," stated Harold R. Kulp of Pottstown. Kulp raises about 100 cows, milking 30 Ayrshires, 50 Holsteins and farming approximately 500 acres of land.

Using a double four stall herring bone parlor, Harold's wife Dawn and their son Ed were in the process of milking. They have model 200 milkers which "are able to tell when the cow is done milking because the light goes off," Ed explained.

The vacuumgoes from 10 to 15, depending on the flow of milk."You don't have to worry about the cows being over milked," Kulp said, "each cow sets her own pace. When the cow is done the vacuum changes." Kulp felt this system was better for udder health by not over milking the cow.

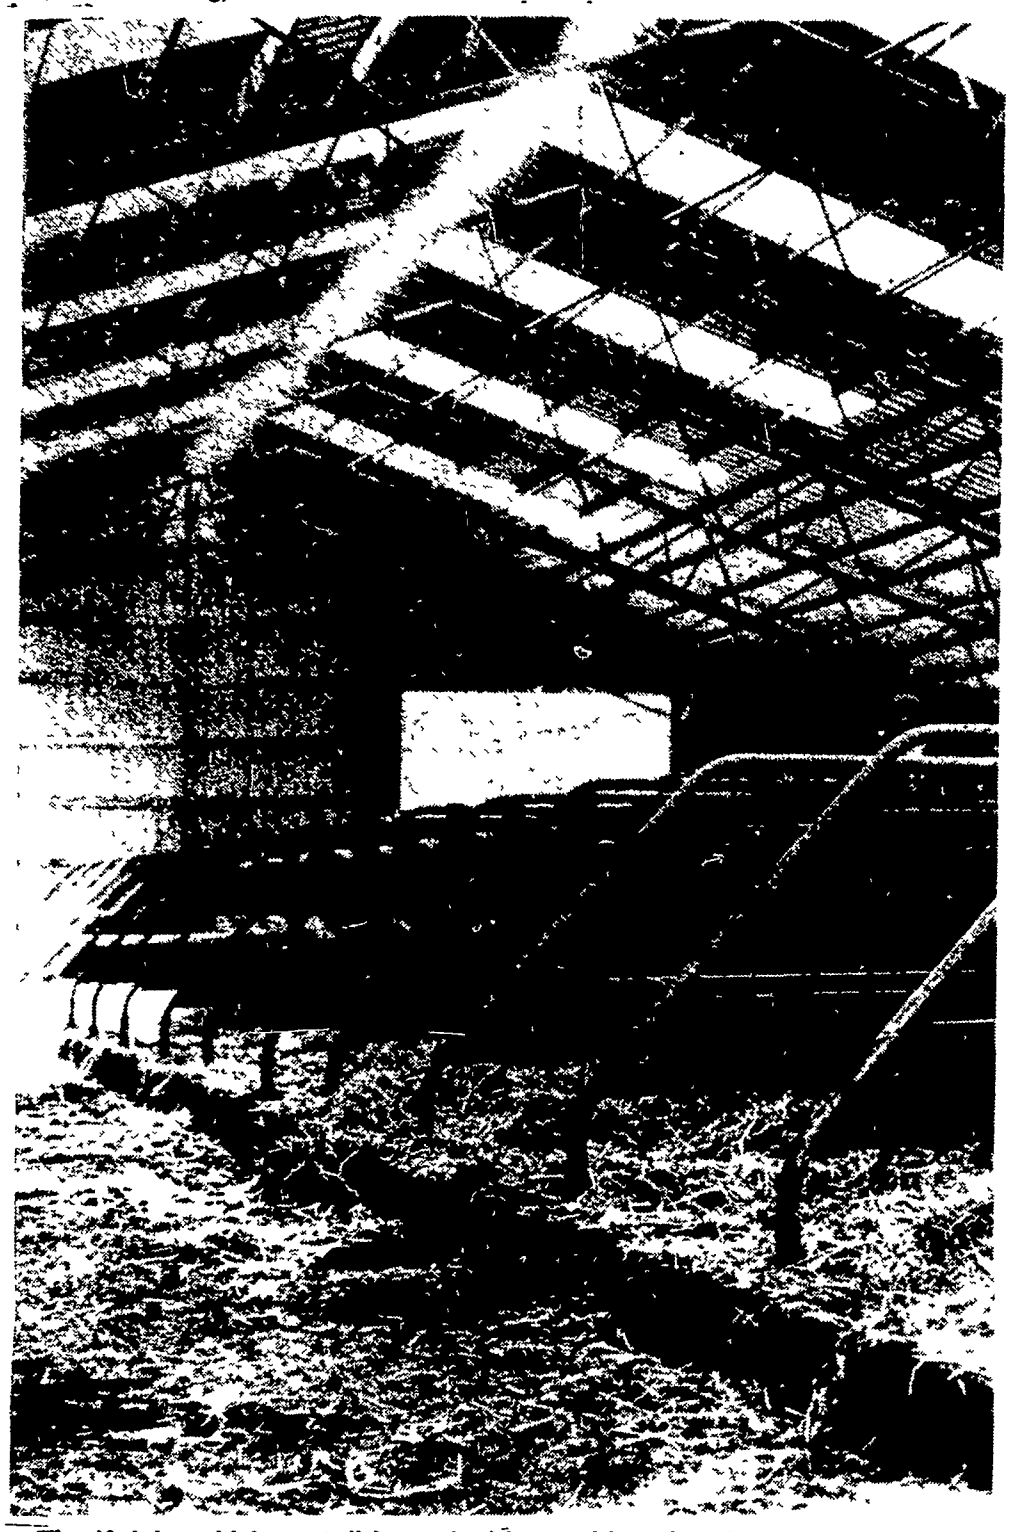
The Kulps also spray on teet dip. This way the dirt from the teet cup doesn't travel from cow to cow.

Kulp feeds hayledge and cornsilage when available. He grinds his own corn and mixes it with a 38 per cent protein supplement. Overall, the Summer feed plus hayledge runs between 16 and 18 per cent protein and in the Winter, the feed plus corn silage averages around 20 per cent protein. Kulp supplements the ration according to what the cows are milking. The grain feeding is done and controlled in the milking parlor. Second and third cutting hay is fed once each day. Kulp puts his first cutting in racks for the cows to eat free choice.

His herd averages 616 pounds of butterfat and 15,815 pounds of milk. Looking at his records, the tests are fairly uniform, too.

Kulp was recently awarded the Constructive Breeders Award for the third time by the Ayrshire Breeder's Association. His Eureka Dairy herd maintained a mature equivalent production average of 14,729 pounds of milk and 577 pounds of butterfat. The Ayrshire herd's average classification score was .840 on 23 head of cattle. Only 29 Ayrshire breeders, nationwide, qualified for this prestigious award in 1978. Kulp's herd had to be classified for type on a regular schedule. The majority of registered Ayrshires in the herd also

(Turn to Page 22)



The Kulp's cold free stall barn double partitioned stalls. An opening is also visable down the center of the roof. Kulp says this makes for better ventilation.

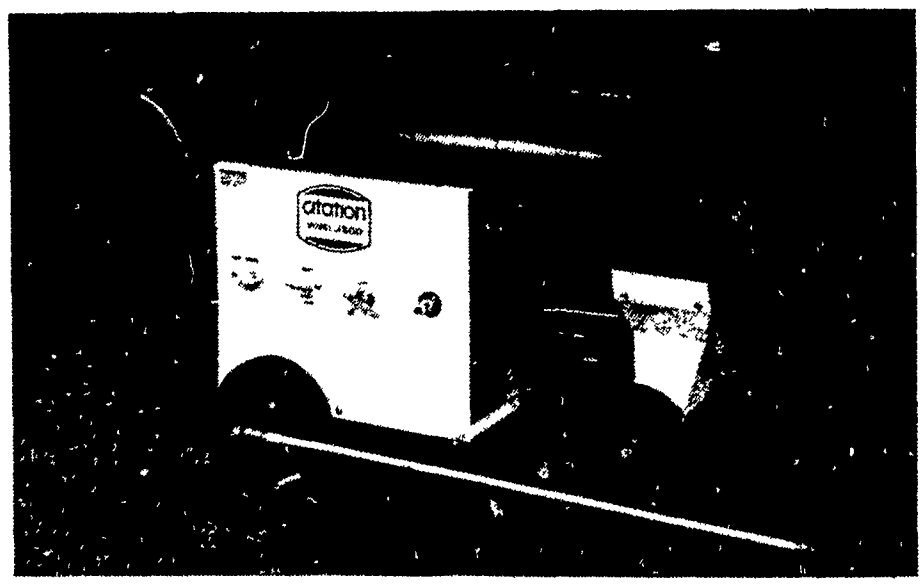
CITATION

HOT HIGH PRESSURE WASHER



Citation engineers created the "Ultimate" high pressure hot water washers when they designed the Model 3000 and 3500 cleaning machines The simple and efficient horizontal coil and firebox concept spells low cost in purchase and economy in operation for the consumer The units incorporate a large chemical tank, 3-way selector valve and calibrated stainless steel metering valve They discharge 240 GPH at 1000 PSI up to 160° F rise Pressure and volume is developed, as recommended by the manufacturer, from a stainless steel Triplex CAT® pump! The 3000 and 3500 are available in oil-fired versions only

Discharge rate	240 GPH
Discharge pressure	1000 PSI
Units of cleaning energy*	240,000
Temperature	160° F rise
Coil	168 Ft 7/8" O D Schedule 40
Burner	380,000 BTU, automatic, oil fired w/fuel filter & solonoid valve, UL approved
Fuel tank (oil)	8 gallons
Fuel	Kerosene or No 1 fuel oil
Pump	CAT®, Tri-plex, stainless steel
Motor	3 HP electric, 220 volt, single phase
Discharge hose	3/8" x 40 ft , 9,000 PSI burst rated
Discharge gun	(Model 3000) straight through hand wand
Discharge gun	(Model 3500) trigger type w/extension wand
By-Pass	(Model 3500 only) Spraying Systems
Nozzles	(3) #8 5, 0°, 15°, 40° stainless
Portability	4—2 75" x 10" rubber wheels
Dimensions	L-60" H-36" W-28"
Shipping weight	600 lbs

had to be bred by Kulp and maintain a high level of production with good type conformation.

The cows, which are kept in dry lot, are put out on pasture for about six hours each day. Kulp doesn't pasture any of the cows until they are bred. "It's a matter of exercise and keeping them cooler," he said. Kulp also felt it was good for the cows to be on dirt after being on concrete. All bred heifers and dry cows are out on pasture for the Summer.

"It's good to get them off the silage over the Summer," Kulp said. "It seems like when the cows get dry, the ration is too high in energy and the cows get heavy. Putting the cows on pasture helps to maintain their normal body weight," he explained.

The majority of the cows are housed in a cold free stall barn. Each stall has double partitions. There is no cover over the center opening in the roof. Kulp said this does not present a problem in bad weather and it is better for ventilation. The birds were also less of a problem with this type of roof.

Main gates interlock and are easily removed and replaced for acess by large machinery. Kulp also has a conveyor going 115 feet across the top of his bank barn. The conveyor has a trip on it so bales can be dumped at random or in one of the five mowes. This enables Kulp to dump the first crop and stack his second cuttings.

(Turn to Page 23)

Harold Kulp was recently awarded the Consecutive Breeders award by the National Ayrshire Association. This is his third time to receive the national honor.

Third generation

(Continued from Page 22)

The majority of the herd replacements are home raised. Some are bought, however, for 4-H and FFA projects. Seventy-five heifers, of different ages and 35 to 40 head of calves are raised each year. The calves are tied in stalls to start and later moved to pens.

When it comes to breeding his Ayrshires, Kulp works with interlines. He checks the bulls to see what they have done for someone else. He keeps the semen on the farm so "no matter when a cow comes into heat, we can use the sire we want to on her."

Heifers will freshen before they are 2½ years old. Between 24 and 28 months of age, most of the Aryshire heifers will freshen. Kulp said that as the feed intake increases while milking a first calf heifer, you will see the benefits.

What are some of the benefits of Ayrshires? Kulp, who grew up with Ayrshires, said they had a "good return on feed cost. Their production is lower than the Hosteins, but you don't have as big of a cow to feed."

Kulp said his farm was one of the first farms in Chester County to utilize contour strips, establishe waterways and tiling.

Kulp is a member of the farm business analysis program through the Pennsylavnia Farmers Association. "This program allows you to compare your business with a business of comparable nature. It gives you an idea of what direction you are going and where you can spend your money better," Kulp explained. "Once you get your business rolling, you find you have problems deciding where to spend your dollars wisely for the best return and efficiency," he maintained.

Kulp has a hard working family to back him up with the farm enterprise. Tina, 22, Eugene, 21, Ed, 19, Susan 16, and his wife Dawn. Ed is presently attending Delaware Valley College and working on his father's farm through a Summer work experience program with the college. Susan feeds calves and helps with the milking. She was recently named Chester County's second alternate dairy princess and is presently serving as president of the Owen J. Roberts FFA Chapter. Eugene is hired full time on the farm. Dawn keeps the books and fills in where she is needed.

As a third generation Kulp farming the land, Harold said "I'd like to see the boys be able to farm here too."

Ed and Dawn Kulp pause for a moment during milking. The Kulp's milking parlor features model 200 milkers that shut down and flash a red light when the cow is done milking.

Eugene Kulp brings in a load of fresh cut grass to be mixed with the corn silage.

Farm wife totally dedicated to country life

By SALLY BAIR
Staff Writer

LITTLESTOWN -- Jacqueline Basehoar is a true partner in Crystal Springs Farm, Littlestown R1, and it is a tribute to her willingness to work hard that she made the successful transition from town girl to country girl - and loves every minute of it.

She and her husband LeRoy and their five children live near Littlestown in Adams County on a dairy farm which has been in the Basehoar family for five generations. It is a true family operation, but one in which Jacqueline takes on much of the work of the dairy herd.

Jacqueline met her husband LeRoy when they both lived in Illinois: she in the town of Wyoming; he on his father's farm. When they married they decided to return to Littlestown where LeRoy's grandfather was ready to retire. That was almost 21 years ago, and while they began by raising Angus, they are now milking about 48 head of Holsteins.

They made the transition in 1961, and Jacqueline explains, "We wanted to have dairy cows and we're not sorry we changed. But it was a big adjustment, almost as big an adjustment as moving to the farm."

Nevertheless, after just "a year or two" with dairy cows, Jacqueline says, "I pretty well took over as herdsman. The men feed silage and feed the calves and help me as needed. I do the breeding and do the records. I learned through experience. Experience is really the best teacher." At the moment her son Charles is helping her milk, but she adds, "I've gone through each of the boys." Jacqueline is not shy about her feelings of milking, "I like cows."

It takes her about 1½ hours to do the milking in their six-stall circle gate milking parlor. The parlor was built at the time they went into dairying, and Jacqueline recalls, "It was very modern at that time." The operation is basically the same as then, but "with a better efficiency."

Their rolling herd average is 14,540 pounds of milk and 556 pounds of fat. Jacqueline says she does everything but the "financial end of it."

The Basehoar family includes five children: Millard, 19; Charles, 18; Beverly, 16; Walter, 14; and George, 8. Jacqueline is happy raising her family on the farm, saying, "I think the farm is an ideal place. They learn responsibility and how to work, first hand. They also learn management of their time."

She said when her children bring their friends around she encourages them to go into the parlor and explains the milking process to them. "Even grown-ups are interested."

When the Basehoars moved east from Illinois, Jacqueline explains, "I knew it would be an adjustment, but I had my mind made up to like it. I'm a stubborn German." She admits that she had to learn everything about farming and field work, including how to drive the equipment. "I couldn't even turn the steering wheel," she recalls with a laugh. Everything was learned very gradually, through trail and error. She can plough, something she says, "I don't often have the opportunity to do. I enjoy being on the tractor and helping with unloading the wagons and planting corn."

Farming at the Basehoars is a family affair. Here Jacqueline and LeRoy take a moment to pose by one of the tractors.

One reason she learned to do all these jobs, Jacqueline explains, "I enjoy being with LeRoy. That is what I chose for myself. I want to do it. Sure there are sacrifices but I do enjoy working with him." She mentions that her housework sometimes gets "trifled," in favor of outdoor work, but with some fancy management of her time, she manages to do a lot of things she enjoys inside.

"I like baking my own stuff from scratch. I really enjoy cooking." She also fits in things like crocheting, knitting and says, "I work at quilting - my own version. I like to make my own Christmas presents." Macrame is another interest of hers.

Sewing is the one things she tries to make time for. "I have been sewing since I was five. I sat by the hour and sewed, but I wasn't very good. I was in home economics in school, but ended up teaching the class. I like creating something of my own. I sew for my daughter first and then for me." She also sews pants and jackets for the men in the family.

"I have a big garden and I can a lot." That is surely true, because she said she planted four pounds of peas this year.

She describes her family as "close," saying they enjoy riding motorcycles together and picnicking. Their farm is of historical importance, since it is the oldest settlement in Adams County, which at that time was a portion of York County. There have been just two families involved in the farm since the original deed. The land was first settled by Shrivers in 1733. The Basehoars have owned and worked the land for over one hundred and fifty years. With LeRoy the fifth generation of Basehoars to farm, it is, of course, a fond hope that one of the children will want to stay on the farm.

The summerhouse and springhouse on the property were built about 1750 and feature vertical slits for fighting Indians. The first part of the house was constructed in 1795 with an addtion being built in 1830.

The family room, a part of the original house, was recently redone to expose the original brick on the inside walls. The Basehoars had a hugh fireplace built using flintstone from their fields. "We thought about it a long time before going ahead with it. The fireplace is my husband's design. We love it here," Jacqueline says.

Of course, there is always the matter of finding time for more restoration on the beautiful home. "We sanded some floor upstairs and they are beautiful. We're really pleased with the way they turned out," Jacqueline says. Now she'd like to tackle some of the downstairs floors.

Jacqueline is serving her second year as secretary to the Executive Committee of the Cooperative Extenstion Service in Adams County. "We advise the staff and try to see that funds are available for the different programs. I find it rewarding," she states.

She was in charge of the Adams County Dairy Princess contest a few years ago, and still serves on the Dairy Princess committee. "We are really pleased with the program. They put a lot into it. I really think the girls have done a magnificent job and are an asset to the dairy industry.

The Basehoars are members of the Holstein Association, with LeRoy serving as director, and they belong to St. Paul's Lutheran Church in Littlestown.

Jacqueline is also a member of the Mason-Dixon Homemakers group.

The children have all been in 4-H, with the three younger ones now active. Jacqueline said that while they raise their own herd replacements, they sometimes purchase a 4-H project animal.

For Jacqueline, dairy farming has become a way of life that is rewarding and fulfilling, and a way of life the entire family enjoys.

4-H fashion revue July 5

DOYLESTOWN - Bucks County 4-H Clubs will present "A Country Garden of Fashions" on July 12, 1979 at 8 p.m. at Neshaminy Manor Center Auditorium, Doylestown, Pa. 4-H members will be modeling their sewing projects that they have completed in the past year. The public is welcome to attend.

Any 4-H member who would like to participate should call the Bucks County Cooperative Extension Service Office, 215-343-2800, Ext. 240, by July 5

4-H members will be judged on garment appearance, modeling ability, and garment construction. Winners will be selected to compete in regional and State Fashion Revue

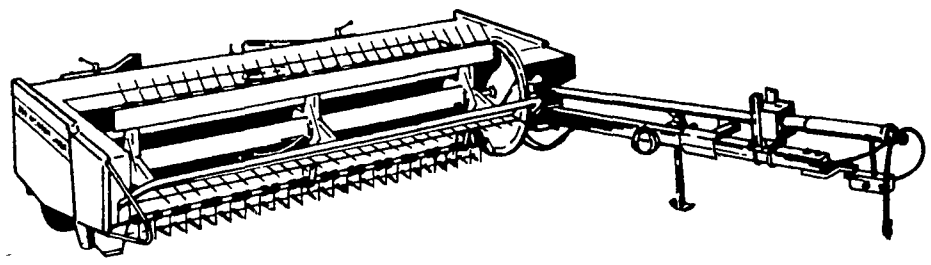
NEW IDEA 299 MOW/DITIONER



THE HAY TOOL THAT REDUCES COST

Mows and conditions a full 9 ft. 3 in. width and places prepared crop in fluffy, fast-drying windrows. Offering performance, reliability, and styling, the 299 Mow/Ditioner:

- Reduces man-hours
- Reduces field travel by as much as 65%
- Reduces fuel and oil consumption
- Reduces soil compaction

BALE KING

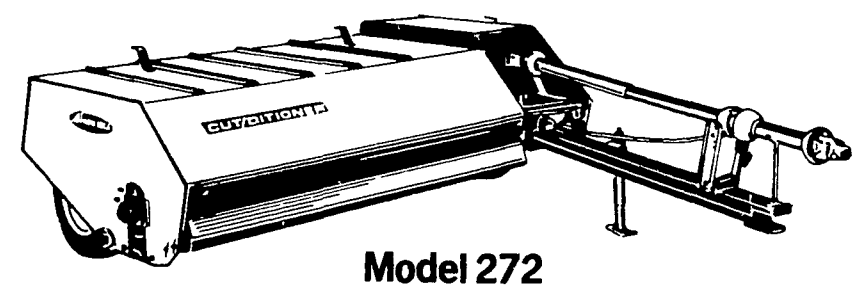
DESIGNED TO FIT YOUR NEEDS

Avco New Idea's Bale King round baler makes soft-center bales with a hard outer wrap — better for storage, better for feeding, better for drying.

That's the Bale King — from Avco New Idea.

SAVE TIME, SAVE HAY!

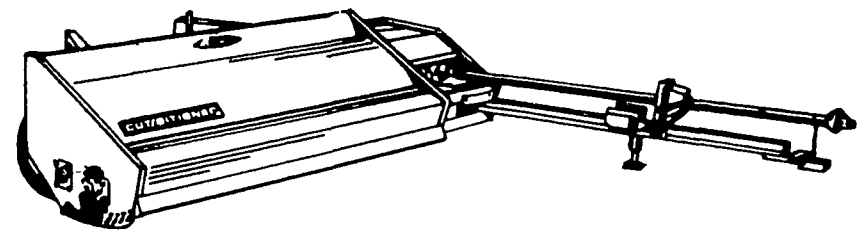
NEW IDEA MODEL 272 CUT/DITIONER



Model 272
7 Foot Cut/Ditioner

HIGH CAPACITY, TROUBLE FREE OPERATION, NON-PLUG, NON-STOP

The rugged, plug-free 7 ft. 272 Cut/Ditioner is buiilt for farmers who want premium quality hay. It handles light or heavy stands. You'll get fast drying, high quality hay from a machine that costs much less than comparable mower-conditioners. Low on maintenance, too!



NEW IDEA MODEL 279 CUT/DITIONER

Less Maintenance ... More Production

This is a high-capacity workhorse that will breeze through hay fields at a rate of up to five acres an hour taking a full 9 foot cut. Virtually plug-free, it will handle the heaviest crops under the toughest conditions fast. Produces the kind of hay livestock prefer. It's softer!

Excellent field conditions reported

HARRISBURG – Pennsylvania farmers were busily making hay as excellent weather continued through most of the week ending June 24. All areas reported at least six days suitable for farm fieldwork.

A majority of time was spent in hayfields. but other activities on the farm include filling silos, planting soybeans, combining barley, cultivating and spraying. Harvesting was concluded in strawberry and sweet pea crops, while continuing in sweet cherries and pod peas.

Tight supplies of gasoline were reported by 51 per cent of the respondents, 79 per cent more than last week. Ten per cent of the farmers reported deficit supplies of gasoline. Deisel supplies are also decreasing with 48 per cent indicating tight supplies, up 19 per cent from the previous week. Twenty per cent of the farm respondents reported tight supplies of LP gas, with a few reports of deficits.

Reports from across the state indicate a wide range of corn heights. On the average, corn is 10 inches tall in the north, 13 inches in central counties and 18 inches tall in the south, with an average of 13 inches statewide. Corn height is four days ahead of 1978.

Soybean planning is virtually complete, with only a small amount to be planted. This puts the 1979 crop on a par with last year. Tobacco is 90 per cent planted with all reports indicating good growth.

To date, five per cent of the barley crop has been harvested, mostly in southern areas. Forty-one per cent is ripe in the south, 13 per cent in central counties and five per cent in the north, for a statewide average of 20 per cent.

Wheat is five days ahead of last year, at 36 per cent turning. Sixteen per cent is turning in the north, 38 per cent in the central region and 54 per cent in the south. The south is also showing a small percentage of wheat ripe. Oats are five days ahead with 45 per cent headed. In the north, 31 per cent of the oats are headed, while central and southern areas show 55 and 54 per cent headed, respectively. The south reports five per cent turning yellow.

First cutting of alfalfa is now four-fifths completed with a few reports of second cutting hay being made. Clover-timothy hay is two-thirds complete. Hay quality is reported as two-thirds good and one-third fair. Pastures are providing an average amount of feed in most locales.

Vegetable crops are growing well, with sweet corn tasseling and tomatoes setting fruit in southern areas. Potatoes are in blossom with scattered reports of Colorado potato beetle and potato leaf hopper problems.

Sweet cherries and black cherries are being harvested with some bud damage reported. Grapes are beginning to develop and apples are sizing well with only a few reports of apple scab and fire blight.

Nearly one fourth of the respondents reported soil moisture supplies as short, with the remainder reporting adequate conditions.

These people know a high quality Brown Swiss animal when they see one. Each of them was either a winner or runner-up in a judging contest that was part of the annual Brown Swiss field day and picnic for Canton 4. Competition was held in three divisions - youth, women and men. In the center foreground, above, is youth division and overall champion Judy Witmer of Willow Street. Flanking her are Scott and Cindy Trimble who tied for second place. Behind the cow are, left to right, Dennis Kulp of Manheim, Dean Daubert of Pine Grove, Mrs. Richard Wenger of Manheim, and Mrs. Rohrer Witmer of Willow Street. At the halter is Kerry Boyd, representing the host family and farm.

Brown Swiss field day held at Clay View Farm

EPHRATA — Members of Canton 4, Pennsylvania Brown Swiss Breeders, held their annual picnic and field day near here on Tuesday afternoon. Host for the occasion was the Elmer Boyd family of Clay View Farm.

One of the highlights of the day's events was a three-class judging contest. The high score for all divisions was turned in by 17-year old Judy Witmer of Willow Street R1. She had 147 points. Trailing her in the youth division were 8-year old Scott Trimble and his 11-year old sister, Cindy, from Peach Bottom. They were tied for second place.

The top judge in the women's division was 22-year old Dean Daubert of Pine Grove. Dennis Kulp, 19, of Manheim placed second.

Winning the women's contest was Mrs. Rohrer Witmer of Willow Street. Mrs. Richard Wenger of Manheim earned the runner-up spot.

An event coming up for Pennsylvania Brown Swiss Breeders is the annual statewide picnic, announced Association president Don Trimble. It will be held July 27 at Windmill Farm, owned by the Ronald Daubert family of Pine Grove, Schuylkill County.

Grain buying is complex business

By DIETER KRIEG

LANCASTER — Wheeling and dealing with grain is a complex business these days. To master it, one has to know people, politics, weather, and a host of other factors which can be as shifty and quick as a weasel.

Russell Hayes has spent much of his life working with grain. One might say he knows the business as a science. This past Monday he shared some of his knowwledge with members of the PennAg Industries Association. The occasion was the group's annual grain meeting, held here at the Sheraton-Conestoga Inn.

Hayes, who is materials manager for Agway, told the 100-some guests what should be done to handle markets effectively.

A report detailing purchasing goals, specifications, quality, and storage facilities (among other factors) should be the first step. Financial support should be secured. Finally, transportation methods, routes, and costs should be figured as close as possible.

The man who buys and sells grain today and expects to make a profit has to be alert to dozens of factors. Hayes splits them into three categories. They are facts, context, and mood or psychology.

"This is very important in looking at markets because markets don't always move on fundamentals," the

Russell Hayes

veteran grain purchaser commented.

Following are some of the facts which should be loked into: Yields, feeding rates, exports and prices, world supplies and demand, transportation costs, storage space, and carryovers.

Surrounding the above facts, and more, are such influences as: Weather, politics, government policies, economic trends, trade agreements, energy, alternative crops, inflation, nutritional alternatives, strikes, livestock and poultry numbers, railroad car inventories, interest rates, and much more.

But before all of that information can be put to use effectively, the company must have knowledgeable people who possess a good disposition and enthusiastic attitude. "The kind of people who thrive on market action," the materials manager explained.

As for the mood or psychology of things, Hayes emphasizes that the buyer or seller analyze all factors as closely as he can to determine whether the market is bullish or bearish. "Look for sources of information to pick up the moods," he advised the group. Sources would include magazine and newspaper articles, newsletters, speeches, professors' opinions, etc.

Because there are so many factors involved in modern grain marketing, it is often difficult to predict precisely what's going to happen. Anticipations may be based on suspicions. Speculation runs fast.

In closing his presentation, Hayes predicted good corn and soybean crops, opinionized that grain prices will peak within the next few weeks, and considered the country as a whole to be headed towards a recession. "Hopefully it won't be too traumatic," he added.

Hallowell sets up 'hot line' to deal with agriculture's transportation problems; many fuel shortages reported

HARRISBURG — State Agriculture Secretary Penrose Hallowell established an "Agriculture Hot Line" telephone system last Friday to receive calls from any segment of Pennsylvania's food industry which experienced problems related to the national strike by independent truckers. Latest word is that the number is also being used to report farmers' fuel shortages. **The telephone number for the Hot Line is 717-783-5320 and will be in service 24 hours, seven days a week.**

Hallowell said, "The truckers' strike poses a significant, real problem for the food production, supply, and distribution system. The potential for disruption of our food system is evident from reports we have been receiving. We have established this special telephone number so that any individual or concern in our agricultural sector can let us know of problems that arise as a result of the truckers' strike."

Callers will hear a message and have thirty seconds to leave their name, telephone number and describe their problem. Hallowell said that either he or a designated official of the Agriculture Department will immediately respond to the message and return the call.

"This will allow us to keep in constant contact with the industry. We will be able to respond quickly, 24 hours a day, and hopefully resolve the problems which may arise." he said.

Hallowell pledged that the Agriculture Department will continue to work with farmers and agricultural industries to insure that production of agricultural commodities is not interrupted. "We want to insure that farm products move through the marketing and processing system to the consumer with minimal problems," he said.

There were numerous disruptions in farm product movements last week in northeastern Pennsylvania, particularly Bradfod County, where truckers refused to allow movement of feed, fuels, and milk. And in neighboring New York State, striking truckers succeeded in curtailing the operations of milk manufacturing plants for at least one day.

By the end of last week truckers and farmers reached an understanding and operations resumed without incident. Further disruptions have been avoided as a result of a meeting called last Thursday by the Pennsylvania Farmers Association. Also participating in the discussions were The Pennsylvania Department of Agriculture, The Pennsylvania Grange, and representatives of Agway, NEDCO, Eastern Milk Producers, Dairylea, New York Farm Bureau, and The Cooperative Extension Service.

Meanwhile, U.S. Department of Agriculture Secretary Robert Bergland announced last Friday that the Diesel fuel priority program for farmers is suspended. The ruling came with urging from President Carter. Bergland noted in his announcement that planting has been completed, the program was successful and:

"It is esential now that we turn our efforts from planting to the total agricultural system, including mid-season field work, harvest, processing and transportation of agricultural products.

"We have become increasingly concerned in the past several days about the actual and potential disruption of the processing and movement of farm products to U.S. and overseas markets. It does farmers no good to plant and harvest a crop, or to hatch baby chicks, if there is no fuel to move the grain to an export elevator of process the chickens and move the meat to market, Bergalnd said."

Bergland's decision to suspend Rule 9, which deals with agriculture's priority for fuel hasn't been favorably received by all segments of the industry. The American Soybean Association and National Corn Growers Association, for example, responded immediately with a telegram to President Carter to protest the decision.

But most farm organizations agree with the move.

While there were few disruptions in Pennsylvania, compared to the difficulties that have been reported in the Midwest an South, the independent truckers' strike continues to be an item of concern on the minds of many officials, agribusinessmen, and farmers. The situation is far from over.

A big concern is the availability of fuel. The Pennsylvania Department of agriculture has received scores of calls from farmers who say they have no fuel to complete their harvests. Service stations are reportedly tellingthem they can't get their supplies. A spokesman for the Department says officials are trying their best to alleviate the situation, but no solution has been found as of yesterday (Friday) morning.

Straw—to take it or leave it is the question

NEWARK, Del. - Grain straw is worth about $30 a ton on the local market, making it an attractive source of farm income. Straw also has value as a source of organic matter and minerals for soil improvement and is an aid in the production of no-till soybeans. The question is—which pays most: to sell the straw, or to leave it in the field?

Farmers would do well to consider the long-term benefits from cutting their grain at a height of 10 to 12 inches and leaving the straw in the field, says University of Delaware Extension agronomist Dr. William Mitchell. In the long run it may be worth more this way than as a hay crop. Here's why.

The nutrients in 3000 pounds of straw have a fertilizer replacement value of about $20, while the organic matter in the same amount of straw (humus value) may be worth even more than $20. This alone, says Mitchell, is enough to question the wisdom of selling straw--especially from farms where the soil is sandy and the humus level low.

If one plans to grow no-till soybeans after a crop of barley or wheat, there are other important reasons for leaving the straw in the field.

No-till production of beans after these grains is a popular practice among Delaware farmers. It's one of their answers to the energy crunch, since elimination of plowing and disking operations can save a lot of gasoline and fuel oil. The stubble and straw residue left on the ground in a no-tillage program shades the soil and holds back the weeds. It may also conserve soil moisture during critical periods.

Herbicides such as Paraquat or Roundup are used in no-till production as a substitute for the plow and disk. Although effective in controlling weeds they perform much better when grain straw is left on the field in the form of high stubble. (Of course, if the combine is adjusted to leave a high stubble when harvesting the barley or wheat, one won't get any straw to sell.)

In tests at the Delaware Agricultural Experiment Station, improved weed control resulting from a relatively high barley stubble (10 inches to 15 inches) has returned an additional five bushels of soybeans per acre, reports Mitchell. In some cases the soybean yield reduction resulting from weed competition (caused by low stubble) has been more than five bushels. And in order to control the yield-robbing weeds which emerge when stubble is short, it's been necessary to use a more expensive herbicide program, he adds.

The agronomist urges farmers to count up all the costs which can result from removal of grain straw from the field.

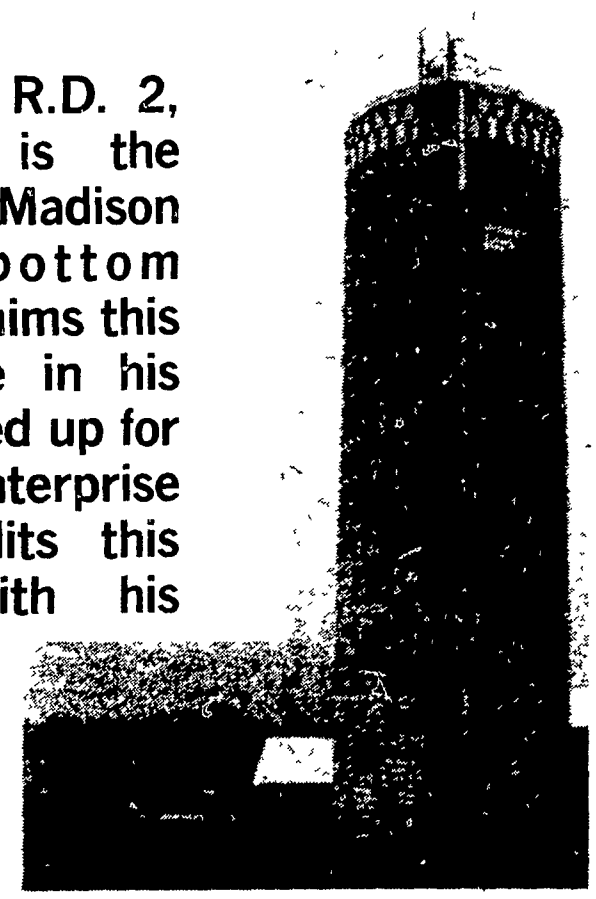
The Truth . . .

ABOUT BOTTOM UNLOADING SILOS FROM AGWAY

John F. Stamy III of R.D. 2, Mechanicsburg, Pa. is the proud owner of this Madison Grain-O-Matic bottom unloading silo. John claims this silo plays a key role in his feeding program worked up for him by an Agway Enterprise Salesman. John credits this feeding program with his recent significant increase in milk production and fat test.



On a well managed dairy or beef farm, a bottom unloading silo is a valuable management tool. It will improve net income . . .

★ By saving home grown nutrients.
★ By lower feed cost per pound of milk or meat.
★ By lower labor cost per ton of ration.

MADISON® is a "best buy" in bottom unloaders with . . .

★ Lower initial cost per cubic foot - versus steel.
★ Lower cost per ton stored - no breather bags needed.
★ Lower maintenance costs - with the super rugged Laidig unloader.
★ Lower storage losses - because light colored concrete staves have high heat reflectivity.

AGWAY is the place to buy or lease your MADISON® bottom unloader because only there you get "one stop" professional help . . .

★ To be sure your silo is where it ought to be.
★ To get maximum yields of top quality crops.
★ To fit your crop into the most profitable feeding program for YOUR farm.
★ To accurately predict profitability.
★ To decide whether to buy outright or lease from TELMARK - with lease payments as low as $100 per month the first year (higher after that when your silo is paying YOU off).

ORDER YOUR MADISON BOTTOM UNLOADING GRAIN-O-MATIC SILO NOW TO BE SURE IT'S UP FOR CORN HARVEST!

Nuclear power needed to overcome energy mess

By KENDACE BORRY

LANCASTER — "We've got to go ahead with nuclear," stressed Charles Robbins, former president of the Atomic Industrial Forum who spoke at the Pa. Poultry Conference last Thursday.

And although he called the Three Mile Island incident perhaps the "most momentous event of the year", he reminded his audience that in the "22 years commercial nuclear power plants have been operating more than one million people have been killed on American highways, and many more millions have been injured".

"Today 70 nuclear power plants are operating or are operable in the U.S. and 400 years of operation (using one reactor operating one year as 1) have produced not one death or even one person maimed in commercial nuclear power plants."

"We must not forget that every form of energy exacts a price, whether in hazards to health or money," Robbins continued.

Coal, the resource that can be more easily expanded or increased is the most expensive in terms of lives lost or injuries caused, and in causing lung and breathing problems. Plants burning coal sometimes emit more radiation than would be permitted of plants fissioning atoms--because some coal has fairly high concentrates of uranium, he added.

"Thirty thousand died in Pa. mines between 1870 and 1950" Robbins stated.

Oil and natural gas are not without their hazards, in production, transporting and in burning, he noted. And although hydro energy is often thought of as producing no damage, dams break, sometimes at a loss of life. And dams often result in good bottom land ideal for farming being taken out of production.

Solar energy requires space for sun absorbing equipment, and "space is getting increasingly expensive".

"Every other potential energy source that I have heard of has some negative effects on the environment," Robbins said. "Nuclear power is a domestic energy source. The major goal of U.S. energy policy is to reduce the U.S.'s dependence on foreigh energy sources. Coal and nuclear are the only major existing domestic energy sources which can provide large amounts of additional energy through the end of this century."

"Nuclear, unlike coal, does not produce carbon dioxide," he added. "Increasing the carbon dioxide levels in the earth's atmosphere might bring about curtailments in the use of carbon fuels by the turn of the century."

Talking about the entire energy picture, Robbins stressed how "confused and dismal it is. Not only is the shortage real–very real–but the circumstances surrounding that shortage are very disturbing. I have never known us to be in so many crises, some of which seem incapable of being solved."

Looking at the U.S., Robbins said that confusion is "widespread".

"President Carter and Congress are at Loggerheads, on every significant issue. Congress can't even write or pass any legislation for the President's signature or veto."

"Carter's rating has sunk to 29 per cent of public approval. That might be lower than for any previous president, unless for Pres. Lincoln at the darkest period of the Civil War. Carter not only doesn't have the approval of the American people, but that seems to be the attitude of so many people in other countries."

"For six years Congress, the White House, and the public have been learning something about energy. But learning is slow, the polls show that 77 per cent do not believe that an energy shortage exists, that it has been arranged by the oil companies.

The international political and energy situation is no better, he added, telling of the uneasy Egypt-Israel peace agreement, the U.S.

Summer heat control critical in broiler houses

NEWARK — Every Summer Delmarva broiler growers watch fearfully for that prolonged, extreme heat wave. When broilers are exposed to temperatures above 100 degrees F., some will die. But when the temperature soars above 105 degrees F., they die by the thousands. And in this catastrophe the so-called weaker sex proves to be the stronger—about 90 per cent of the dead birds will be cockerels.

Since the cockerels in a flock on the average will be one-half pound heavier than the pullets, and since older birds are more susceptible to heat stress than younger birds, the economic loss is usually severe.

According to University of Delaware Extension agricultural engineer Ernest W. Walpole, growers with modern, well-insulated, mechanically ventilated broiler houses have the best chance of surviving a heat wave with minimum losses. Insulation resists or slows down the heat flow into a building. In doing this, it stores a lot of heat. The insulation, the attic, the whole house becomes quite warm and stays warm long into the night. The secret is to get the house cooled off before the next day's heat returns and also to use the cooler night air to relieve the birds even before the house has cooled off. This is where the mechanical ventilation system has no equal.

There are two systems commonly used in this part of the country:

Fans fixed in the side wall, used with adjustable air inlets.

Fans suspended from the center of the house all blowing the same direction down the length of the house.

With the first system (fixed fans), it is important to realize that air movement inside the house is entirely dependent on the velocity of the incoming air. Therefore, one should keep windows or curtains and doors closed, forcing all incoming air to come through the controlled air inlets. These inlets should be adjusted to get an air velocity of 800 feet per minute. The air should be deflected towards the floor (in Winter it should be directed across the ceiling).

A person should set the thermostats of one-third of the fans, providing around 1 CFM per bird at 70 degrees F. Early in the morning, the thermostats of the remaining fans should be set at 85 degrees F. The outside air should warm up faster than the pen air and a person wants to keep the pen air cooler than outside as long as possible.

Sometime in the afternoon, when all fans are running, one should set the 85-degree F. thermostats back to 75 degrees F. This will keep them running most of the night, or at least until the house cools down to 75 degrees F. The outside temperature starts dropping after 4 p.m., and one wants to use the cooler evening and night air to cool the birds and the house as rapidly as possible. There is no danger of chilling the birds or stressing them with drafts while the air temperature is above 75 degrees F., notes Walpole.

With the second system (fans in center of house), one should open all windows or curtains and end doors. A person should use 30 to 36 inch diameter fans, set no more than 40 feet apart. Air should blow to the north or east end depending on house orientation. If there is a heat wave the wind, if any, will be from the south to southwest. One should blow the air with the wind; not against it.

Early in the morning, all the fans should be set at 85 degrees F. With an open house, there is no need to start the fans before the birds are uncomfortable. Then, as with the first system, one should set the thermostats back to 75 degrees F. so they will continue running until the house has cooled off.

With both systems, one should provide adequate attic ventilation, having continuous ridge ventilators or unit ventilators providing one square foot of exhaust area for each 200 square feet of floor area. One should provide soffit inlets of equal area to the exhaust ventilators on the ridge.

If, in spite of best management, the pen temperature gets above 100 degrees F., and birds start dying, one should spray water directly on the birds using a hose with a fine mist nozzle. A person may end up with a wet house, says Walpole, but the birds will likely stay alive.

Officers selected at Eastern Co-op

SYRACUSE, N.Y. – Reorganization of officers of Eastern Milk Producers Cooperative for the 1979-1980 fiscal year took place at the organization's home office, here, on June 7, 1979, following the Co-op's two-day Annual Meeting.

Those elected to serve a one year term were: Arden Tewksbury, Meshoppen, Pa., president; David E. Clements, Frankfort, N.Y., vice-president; Franklin G. Wagner, Sr., Hummelstown, Pa., secretary; Stanley A. Korona, Amsterdam, N.Y., treasurer and Charles Shoop, Halifax, Pa., assistant secretary-treasurer. Shoop replaces Robert K. Hill, Jr. of Elbridge, N.Y.

Those who were elected to Eastern's Executive Committee are: Clyde Wilson, Rushville, Pa., along with Messrs. Tewksbury, Clements, Korona and Shoop.

George Fuller of Houghton, N.Y. was seated as a new member of Eastern's Board of Directors. He replaces the retiring Director from the Cooperative's District 14 in southwestern New York and northwestern Pennsylvania, William Raybuck of Fairmount City, Pa.

Fuller, a 30 year member of Eastern, owns a large dairy farm and has been active in many capacities within the cooperative. He recently turned over his gavel as chariman of Eastern's resolutions committee.

Tewksbury will be serving his fifth consecutive term as President. Perviously, he had served as vice-president for three years and has been a member of Eastern's Executive Committee for seven years.

4-H club meets

DAVIDSBURG - The June meeting of the Davidsburg 4-H Club was held on June 21 at the 4-H Center. The meeting consisted of the mini-olympics. Attending members participated in the 220 and 100 yard runs, the football toss, the auto race, the folding chair race, and the wheelbarrow race.

After the mini-olympics, Sue Detter called the business meeting to order. For a fund raising project this year, the club will be selling candy.

The next meeting on July 19 will be a tour visiting different members' projects. Annette Shermeyer is head of the committee with helpers Duane Mummert, Audrey Shermeyer, Mike, Debbie and Carolyn Jacobs.

Cow's chewing time affects butterfat

LOGAN, Utah - Farmers who want to increase butterfat content of their cows' milk should make the cows chew longer by adding long hay to the animals' diet, according to U.S. Department of Agriculture scientists.

In a study of long, chopped and pelleted hay diets, the scientists found butterfat content can be easily raised or lowered by the amount of saliva produced when the cow chews.

"The higher the roughage, or fiber content, of a cow's feed, the more she chews," said Melvin J. Anderson, an animal scientist here with the department's Science and Education Administration. "The longer she chews the higher the butterfat content of her milk will be."

The scientists measured chewing time by fitting test cows with a halter equipped with a chin strap rigged to an electronic counter that registered chin movement.

To produce milk with the standard butterfat content on which the base price of milk is set, the study shows a cow should chew about 30 minutes for every 2.2 pounds of feed she eats

According to the study, a point will be reached when butterfat content cannot be increased regardless of chewing time, said Anderson.

The more she chews her feed, the greater the opportunity for increased butterfat tests, scientists are finding out.

"Chewing times also can be manipulated by farmers to decrease butterfat content to produce more milk to meet increased consumers' demands for skim milk and milk with two per cent butterfat," said Robert C. Lamb, an animal scientist who also worked on the study. Farmers should understand, however, the scientists said, the amount of milk a cow produces is not affected by her chewing times.

The study was done by Anderson and Lamb and animal nutritionist E. Max Sudweeks of the University of Georgia at Athens.

"We learned that a high milk-producing cow might eat 44 pounds of feed each day," said Anderson, "and she should chew that feed about 10 hours to get the standard butterfat content. Long hay roughage values are higher than those of chopped hay, which in turn are significantly higher in roughage than pelleted hay."

The roughage value of alfalfa hay were measured by chewing times and then related to butterfat content. This was done by feeding either long, chopped or pelleted hay diets, plus a grain mix for two weeks, to 12 lactating Holstein cows–with the test starting about 70 days after the birth of the cows' calves, Lamb said.

Feed intake, milk production and butterfat contents were measured daily. Chewing times were measured the last 48 hours of the test, including time spent eating and time spend chewing cud.

Study results are based on an equation devised to relate chewing times to butterfat content.

Cumberland Co. 4-H winners chosen

CARLISLE – 4-H members were selected as Cumberland County winners in the 4-H National Awards competition. The 4-H'ers were chosen for their outstanding accomplishments in a specific area or Leadership, Achievement, or Citizenship. The record of these winners will compete with outstanding 4-H members' records across the state to be named "a Keystone Winner" in their respective areas. The Keystone winners will be interviewed in July at Penn State University before the State winner is named.

The following 4-H members from Cumberland County won County level awards: Achievement - Brenda Negley, Carlisle; Agricultural - Nancy Yorlets, Mechanicsburg; Automotive - Robert Otto, Carlisle; Beef - Roxanne Leib, Mechanicsburg; Bicycle - Cindy Otto, Carlisle; Bread - Edith Hemminger, Newville; Citizenship - Jim Schlusser, Carlisle; Citizenship - Becky Garman, Newville; Clothing - Nancy Barrick, Newville; Commodity Marketing - Roxanne Leib, Mechanicsburg; Conservation - Jim Schlusser, Carlisle; Consumer Education-Home Economics - Karen Kuntz, Carlisle; Dairy - Wendy Mains, Newville; Dairy Foods - Wendy Mains, Newville; Dog - Brenda Negley, Carlisle; Electric - Roger Negley, Carlisle; Foods-Nutrition - Sherri Webber, Newville; Forestry - Steve Otto, Carlisle; Gardening - Edith Hemminger, Newville; Health - Robert Otto, Carlisle; Home Environment - Melinda Gutshall, Carlisle; Horse - Cindy Otto, Carlisle; Leadership - Nancy Yorlets, Mechanicsburg; Petroleum Power - Ray Holtry, Carlisle; Photography - Peggy Wentz, Carlisle; Recreation - Greg Williams, Shippensburg; Sheep - Ray Holtry, Carlisle; Swine - Jenny Fencle, Carlisle; and Veterinary Science - John Wardle, Carlisle.

Leadership Congress attended

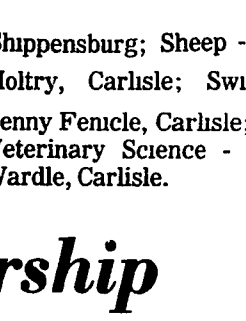
DOYLESTOWN – Twenty-nine Bucks County 4-H members learned specialized leadership skills during Pennsylvania 4-H Leadership Congress, June 25 to 28 at Penn State.

The county delegation joined 1,000 other 4-H members from across the Commonwealth to share ideas about 4-H. At the Leadership Congress, they took part in assemblies, discussion and interest groups and recreational activites.

Bucks County 4-H member participating were: Tony Ciarol, Lynette Swithenbank, Dwight Traniner - Branch Valley 4-H Club; Susan Barrows, Barb Milnor - Ottsville 4-H; Beth LeQuin, Jeffrey Anderson, Todd Anderson, Walter Beatty, John Burke, David Dickson, Thomas Dickson, Kathy Lunova, Kim Rees, Mike Reynolds, Tom Reynolds, Greg Rodel, Debbie Smith, Tim Sullivan, Wendy Whitelam, Laurie Witlin, Eric Larsson - Richboro 4-H; Allen Koch - Springtown 4-H; Debbie Ehlman, Sherry Kozero, Betsy Hottle, Bonnie Hottle - Whichway 4-H; Charlene Gormley and Karen Gormley, Wrightstown 4-H.

College of Agriculture officials, Cooperative Extension Staff members and local 4-H leaders carried out the educational workshops. Attending from Bucks County were Debra A. Gregory, Extension Home Economist, Mrs. Tina Barrows, Mrs. Mary Lou Fenn, Mr. & Mrs. Matt Haist, and Mr. & Ralph Anderson.

Four county 4-H members had been selected to serve on the Leadership Council, who will help supervise program activities. They include: Gail Koch, Wren Rodel, Toni Hoelper and Tom Tomlinson.



Nuclear power

(Continued from Page 31)

and Iran being at odds, Lebanon being in chaos, Southern Africa threatened by civil wars, and SALT II facing "a stiff battle in the Senate, and our future relations with the U.S.S.R. cloudy if SALT doesn't pass.

"The U.S has so little manoeuverability;" he commented "It is at the mercy of countries that have little in common with us, including our political views, our religions, our customs. They owe us nothing."

He added that just last month the Secretary General of OECD said that the oil shortage may already have condemned the world to a prolonged economic downturn.

"Today's energy mess is the result of new conditions, new relationships, the real decision makers being beyond our control and even our understanding, a refusal of we Americans to accept the idea of an energy shortage, unusual weather and that old partner bureaucracy. This is a strange aggregation, and one not likely to produce order or predictability," he summed up the situation.

Why not trade bushels of wheat for barrels of oil, he was asked.

This idea, that the U.S. might play "the food OPEC of the world" just isn't practical, Robbins stated.

"The locations are just not right; the Middle East does buy some food from us but not a whole lot," he added.

Using food against the squeeze by oil-producing countries would also bring "all kinds of government regulations in an area that already is saturated with paperwork but has produced few solutions, Robbin concluded.

Ag Progress Days to be August 21 to 23

UNIVERSITY PARK - Special activities of interest to both farmers and consumers are being planned for the 1979 Agricultural Progress Days scheduled for August 21 to 23.

The annual field days, one of the largest outdoor educational events of its kind in the United States, will be held at Penn State's Rock Springs Agricultural Research Center, nine miles west of State College on Route 45.

Theme for this year's event is "Agriculture–The Promise for the 80's," says Dr. Joseph D. Harrington, Penn State professor of agronomy and field days general chairman.

"It focuses on new research and technology the College of Agriculture and the agricultural industry is providing to improve the quality of life of the people of the Commonwealth, nation, and world," he points out.

Approximately 200 commercial companies will be exhibiting their newest products for home, farming, and country living. On display will be buildings, farm machinery, silos, feeds and seeds, and other farm and home supplies.

"The family living program will deal with practical demonstrations and displays with emphasis on foods and nutrition, housing, home art, health care, energy, and inflation," Dr. Harrington emphasizes.

An Ag Alumni Museum, constructed on the Ag Progress Days site with funds provided by ag alumni groups and individuals, contains many interesting agricultural and household items dating back to the ox, horse, and hand-labor days, he says. A visit to the museum will show visitors how American agricultural technology has advanced through the years.

Machinery companies will demonstrate their newest forage equipment, including corn silage harvesters. Field machinery for hay harvesting and handling will be demonstrated daily. Primary and secondary tillage equipment also will be featured.

Dr. Harrington points out that livestock and dairy programs will include numerous commercial and breed association exhibits ranging from the production of meats to milk. Also, animal nutrition, reproductive physiology, and housing will be stressed.

"Entertainment and education will occupy the Theater Tent stage and greet visitors with a variety of presentations on home and garden questions of the day," the chairman notes.

"Features will include energy in our lives, home horticulture, music, drama, and puppet shows for children," the chairman says.

Ag Progress Days is sponsored by the Penn State College of Agriculture in cooperation with numerous agricultural organizations and agencies.

Angus cow brings record price

CLOVERDALE, Ind. – A new record price of $63,000 was paid for a registered Angus female at the recent Premier Angus Herd Partnership Liquidation sale at Cloverdale, Indiana, reports Dr. C.K. Allen, executive vice president of the American Angus Association. The sale, one of the highlights of the Angus year, saw 531 Angus cows and heifers sell for a total of more than 1.5 million dollars.

The record selling cow, Prim Lassie 1375, went to a group of Indiana Angus breeders who also paid $50,000 for the cow's daughter, a heifer calved in June 1977. This established the second highest price ever paid at auction for an Angus cow.

The previous record price for an Angus cow was $40,000. It was paid for Pure Pride 4 of Gaidrew that sold in the 1966 Ankony Farms dispersion at Rhinebeck, New York.

The liquidation sale featured 531 registered Angus females that brought a total of $1,541,975. In addition, there were seven herd bulls that brought $77,000 and 20 yearling bulls that grossed $47,775.

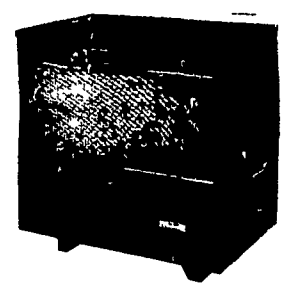
ASHLEY®
AMERICA'S FAVORITE HOUSE-WARMER



If winter heating bills are going to make it hot for you,

warm up to an Ashley.

Your home's heating system should do more than just get you through winter comfortably. It should do it inexpensively as well. The Ashley Wood Heater enables you to burn inexpensive, readily available firewood (any kind) while you enjoy the modern convenience of thermostatic controls. And while you dial comfort, you dial economy. Users report fuel savings of 50% to 75%, and fire-holding ability of 12 hours and more. So install an Ashley Wood Heater and warm up to cool savings.

We now also have the new 7150 Model Ashley coal heater. The same fine features as the C-60 wood heater plus reversible grates, for either coal or wood.

STILL SELLING AT 1978 PRICES

Cowtown Rodeo results told

WOODSTOWN, N.J. – Wyatt Crotta, a cowboy from Connecticut, emerged from Saturday night's Bull Riding contest at Cowtown Rodeo as the only rider out of 20 contestants to stay with his bull for the required time of eight seconds. Wyatt rode a critter called "Emmy".

First place honors in the Bareback Riding contest went to Jimmy Lee Walker, a cowboy from Clayton, N.J. who also performs as a rodeo clown when not riding. Jimmy Lee was awarded a marking of 69 on a horse called "War Drum". Andy Harris rode "Crazy Eights" for a 58 marking to take second place, while Stanley Thomas on "Walter" scored at 46 taking the third place position and Jay Stover riding "Yolo" firmed up the fourth place with a 41 marking for the night.

Calf Roping saw a Cherry Hill, N.J., cowboy named Quinn D'Imperio take top honors with a 14.8 second time. Not far behind was Troy Reynolds from Hudson Falls, N.Y. with his 15 seconds flat time. Third and fourth place winners were Dave Reynolds with 15.1 and Smokey Smith with 18.1.

The Saddle Bronc Riding event featured cowboy Gary Doner riding "Green Mt." for first prize. Spence La Flure from New York State took a re-ride and placed second with Dan Aurand on "Tumbleweed" in the number three spot and the fourth place position was split for ground money since only three contestants were successful in staying aboard their broncs for the required time.

Theresa Reynolds took the winners prize money this week in the Girls Barrel Racing with a timing of 17.2 seconds. Diane Cheli firmed up the second place position with and 18.1 while Kay Latella took third with 18.4 followed by Lorraine Alexander with 18.7.

In Steer Wrestling, Charles Bueti took the first prize money out of 25 contestants. His time was 6.2. Bailey Martin with his 7.1 time took second place while Gary Perroth placed third in 7.9 and Willie Walker from Pedricktown, N.J. came in fourth with a time of 8.3.

Cowtown Rodeo performances will continue to take place each and every Saturday evening at 7:30 p.m. rain or shine through Sept. Once again, Cowtown will host the NorthEast Circuit Finals on Sept. 7,8, and 9.

Agriculture dean named

COLLEGE PARK, Md. - A former Minnesota farm boy with broad credentials in agricultural marketing, academic administration and world food problems is the new dean of the College of Agriculture and associate provost of the Division of Agricultural and Life Sciences at the University of Maryland in College Park.

He is Dr. Earl H. Brown, now living in Arlington, Va. Dr. Brown has completed 1½ years of a two-year assignment as a U.S. program leader with the Board for International Food and Agricultural Development. He is headquartered in Washington, D.C. with the Agency for International Development in the Department of State.

The new dean's appointment was announced by Dr. John S. Toll, president of the University of Maryland, and approved at the June 15 meeting of the Board of Regents. It will become effective on Aug. 15.

At Maryland, he will become chief administrative officer of a college with more than 1,600 undergraduate students and 12 academic degree programs. These programs include agricultural chemistry, agricultural engineering, agricultural and extension education, agricultural and resource economics, agronomy, animal science, conservation and resource development, dairy science, food science, general agriculture, horticulture, and poultry science.

Keep on truckin'

(Continued from Page 10)

the silly restrictions since long before we even knew about them.

Believe it or not, the governement even tells truckers which way to go when they go from one place to another. An example: One trucking firm authorized to serve Denver and Salt Lake City, which is 512 miles apart by direct route, must haul by way of Phoenix and Flagstaff - a route of 1142 miles. Think of the fuel that could have been saved over all these years.

Other ridicuous restrictions are that a trucker cannot make intermediate stops or haul certain goods. The list could go on and on.

Suffice it to say that all we've had is a bunch of regulations which have encouraged the waste of fuel, time, and money.

What we need is laws which will remove this burdensome nonsense.

The variations in weight and truck length limits are also deplorable. Let's keep on trucking without all these needless hassles.

Finally, let's look at other options such as more efficient engines, and other transportation alternatives, including railroads and the concept of running trailer and truck combinations as they do in Europe and California.

This truckers' strike and energy crunch we're faced with is bad. We'll never find a cure for these and related ailments of our economy if we continue to work with present standards. Too many of them make no sense.

BETTER HEALTH IN LIVESTOCK -- POULTRY -- HUMANS -- CROPS
WITH A NATURAL MINED MINERAL "MINERAL-72"

So named because it has 72 precious minerals and trace elements just the way they were created in the mine. Nothing added, nothing taken away. It is praised by doctors and nutrition experts and Louisiana Agricultural Experiment Station. A recent phone call from the latter says their tests are very very good. They are excited. Dr. Myers in Florida, a lecturer at last summers Natural Living Convention at Bucknell University, says he usually tries Mineral 72 with Vit. C first on all his patients because it works so good. Used in the soil, crops really improve. Especially good fed to hogs and poultry, better, bigger eggs, better shells. A carload should arrive very soon. We get and give a special introductory price on the first car. Only $150 per ton off of car when it arrives. $80 per half ton, $4.50 per 50 lb. bag. Higher after storage in warehouse and next car will be higher. Above price is a real buy. Call us quickly for literature and order.

A REAMS SOIL TESTING & BALANCING SEMINAR

To be held in the Sheraton Inn in Harrisburg, PA, the week of July 23. Ask us for details. Their program gives outstanding crops in quantity, feed value and disease resistance. Soft rock phosphate recommended which we sell bagged or spread reasonably priced - no processing costs. Excellent for hay fields and pasture. Order in advance. Our BX SOIL BACTERIA reports are wonderful. Also excellent for alfalfa, larger crop, no bugs. Also a proven answer for disease in fruit and vegetables. Ask for literature.

ORGANIC CENTER
217 S. Railroad Ave., New Holland, PA 17557
717-354-7064 Monday thru Friday

We do the REAMS SOIL TESTS for $10.
Free with order of a load of phosphate.

USDA initiating land-use study

WASHINGTON, D.C. - The U.S. Department of Agriculture and President's Council on Environmental Quality (CEQ) have announced an 18-month interagency study to investigate the extent and causes of conversion of agricultural land to non-agricultural uses.

The study also will assess efforts of state and local government to retain agricultural lands and will identify ways in which these efforts could be made more effective.

The study is to be completed by Jan. 1, 1981, and submitted to the president.

Agriculture Secretary Bob Bergland and CEQ Chairman Charles Warren, who signed a memorandum of agreement to carry out the study, will be co-chairmen of the study group. Bob Gray, formerly adminstrative assistant to Rep. James Jeffords (R-Vt.), has been named study director and will head a full-time staff. Members of a coordination group will be named from other federal agencies whose actions affect agricultural land.

Agricultural lands have been disappearing at the rate of nearly 3 million acres per year, according to the Agriculture Department. Many of these acres are converted to urban uses or used for highways, airports, shopping centers and other non-farm purposes. Some acres are covered by water.

"If our best farmlands are used for other purposes," said Bergland, "we may face decreasing production, increased energy needs and higher prices for commodities."

Bergland said the Department's revised land-use policy, issued last October, shows its commitment to assure the maintenance of agricultural lands. Well-managed farm and forest lands often provide important environmental benefits, including wildlife habitat, open space and recreational opportunities, as well as a stable economic base, he said.

A recent report prepared for CEQ by the National Conference of State Legislatures showed that 48 states and many local governments have adopted agricultural land retention programs of one form or another.

"We need to evaluate the effectiveness of the various agricultural land protection efforts from a national perspective," Warren said, "and make this evaluation available to state and local government officials and others concerned about this problem."

Warren also indicated that the study would evaluate the role of federal agencies in agricultural land conversion and recommend policy changes if appropriate.

Sun power for farms described in free book

LEBANON - Want to learn how to use the sun in your farming operations? Can solar power be used effectively to offset spiraling costs of agriculture production? This will depend on the circumstances of the individual farmer, but chances are, yes, it can.

"Solar Heating for Milk Parlors", a United States Department of Agriculture publication, describes a well-conceived combination of energy conservation and solar heat to significantly reduce all major requirements for energy in a milking parlor: washing, heating, milking and refrigeration.

The 15-page booklet describes the principles of solar collection, guidelines in the design of solar-heating systems for milking parlors, geographic area and costs and an energy comparison chart for typical methods versus solar. The experimental solar milking parlor located in Beltsville, Md. is described.

"Solar Grain Drying-Progress and Potential" reports research in progress and assesses the state of the art of solar grain drying. Included in the 13-page United States Department of Agriculture publication is an explanation of the process of solar energy drying grain, solar collector efficiency and solar energy availability. A detailed description of solar drying studies in progress at eight locations in the United States and the future of solar grain drying is discussed.

To obtain a free copy of these publications contact the Lebanon County Energy Management Program, a division of the Lebanon Valley Chamber of Commerce located on the bottom floor of the Treadway Inn. The address is P.O. Box 899, Lebanon, Pa. 17042, Phone No. 274-2051.

NEW HOLLAND SALES STABLES

ANNUAL HOLSTEIN PROMOTION SALE

FRIDAY EVE., JULY 13
7:00 P.M.

We're Celebrating our 30th year... and we owe it all to you.

HARVESTORE®
SYSTEMS

When our first Harvestore® structure rolled off the production line back in 1949, it was an immediate hit with farmers. But, we didn't let success go to our head.

Since then, we've continually worked at improving it. Now, the Harvestore system of farming encompasses an entire way of automated feed handling equipment that makes it possible for one man to feed hundreds of animals by merely pushing a button.

Today, there are over 60,000 big blue Harvestore structures in use around the world and we've developed a dealer organization dedicated to providing the best in sales, construction and service, too.

Harvestore systems. We've had a great 30 years. And we owe it all to farmers — like you — who believe in and work the system called Harvestore.

JOIN OUR CELEBRATION!

Dairy Extension agent Shaffer retires

UNIVERSITY PARK - Harvey E. Shaffer, professor of dairy science Extension at Penn State, will retire today with 33 years of service.

A native of Roane County, West Virginia, he received a bachelor of science degree from West Virginia University in 1943. After serving in the U.S. Army during World War II, Shaffer joined the PSU faculty as assistant in dairy husbandry. He received a master of science degree from Penn State in 1949 and was appointed instructor in dairy Extension. He was promoted to assistant professor in 1952, associate in '55, and professor in '65.

As Extension dairy specialist, Harvey has been responsible for educational programs in reproductive physiology. He prepared a series of leaflets dealing with specific aspects of dairy breeding problems, which have been used widely.

He also developed a visual aid to illustrate the importance of accurate heat detection and proper timing of AI service. He recently adapted this visual to a pocket-sized model to use in work with dairymen and beef breeders.

Shaffer planned and assisted in teaching 46 AI technician training courses involving 800 participants.

Harvey Shaffer

He also was responsible for in-service training and served as advisor to all of the state's AI cooperatives since 1949.

"AI Pioneer"

Harvey was recently honored by the state's AI organizations as one of the "pioneers of AI in Pennsylvania." In 1976, he was recognized by Atlantic Breeders for his outstanding service.

His research contributions include development of a vital straining technique for bull spermatozoa which continues to be used to differentiate live and dead cells in semen.

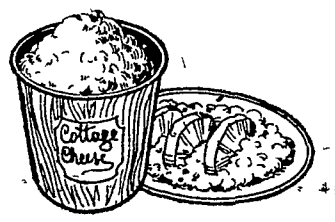
He recently completed a study of the effects of certain management factors on the lifetime performance of Holstein cows. The study included data collected throughout the lives of over 2,300 cows in 217 herds.

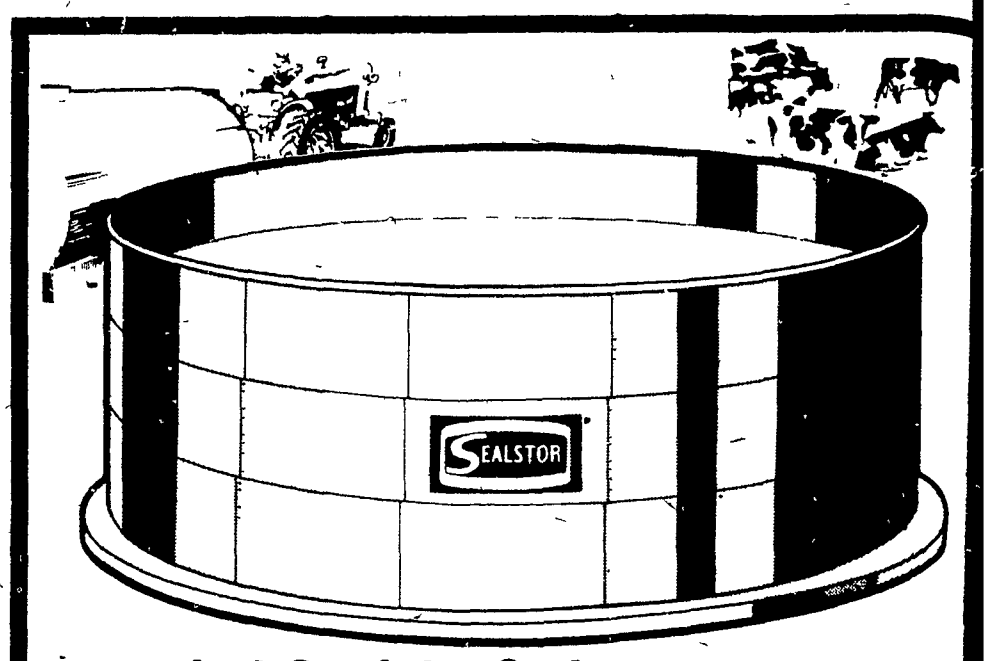
4-H leaders selected

DOWNINGTOWN — The Tri Community 4-H Sheep Club held a reorganization meeting on June 17 and chose to have three adult leaders. They are Angelo Baroni, Gene Liesau, and Jerry Williams. New officers were also elected. They are: Daryl Schaeffer, president; Michelle Stone, vice president; and Ann Baroni, secretary-reporter.

Future meetings for the club are as follows:

July 1, at Stone's. July 8 at Schaeffer's and July 15 at Baroni's. Interested persons are encouraged to join. More information can be obtained by calling the Chester County Extension Service office - 696-3500, or any of the adult leaders. Their numbers are: Baroni - 269-8465; Liesau - 469-6110; Williams - 495-7748.





Let Sealstor® size up your liquid manure management needs.

An above-ground, glass-fused-to-steel tank is the best way to store liquid manure When you bond glass to heavy gauge steel, you have a non-pourous sheet more resistant to acids and corrosion than any other material available But that's only one step toward more efficient and profitable manure management

The first is a detailed analysis of your operation. In addition to herd size, terrain, location of buildings and present equipment, we want to know about your future expansion plans

Then, instead of trying to fit your needs to one of a limited few sizes, Sealstor offers 27 standard sizes (Sealstor Liquid Manure Control Centers range in size from 60,000 to 750,000 gallons)

To reduce fertilizer purchases, labor time and cost and pollution, fly and odor problems, Sealstor your liquid manure. It's like money in the tank.

All tanks available in expandable sizes.

ORTHENE— GREAT FOR TOBACCO.

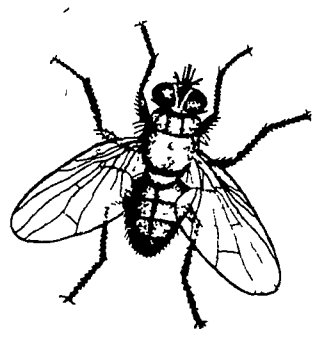
Too many destructive insects attack a tobacco crop to take chances. Now Ortho has come up with a product to solve a lot of major problems. It's ORTHENE® Tobacco Insect Spray. It kills on contact and penetrates the foilage to give internal residual control. It's effective against flea beetles, resistant green peach aphids; tobacco budworm and hornworm. Come in and get the full story.

Chevron

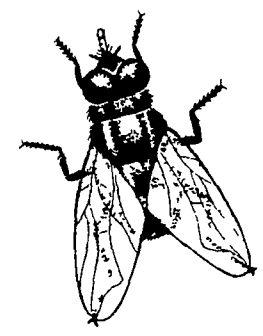
ORTHO

Chevron Chemical Company

young's Rabon fly control program runs itself.



Horn Fly



Face Fly

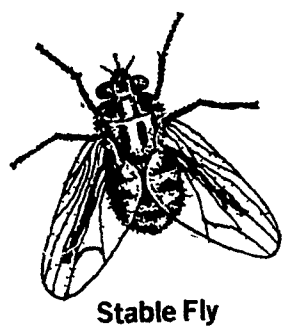
Let your cattle control profit-robbing flies.

Feeding Rabon® Oral Larvicide turns your herd into an effective fly control army that kills face flies, horn flies, stable flies and house flies before they take wing. ROL passes through cattle to activate their manure — destroying all four flies' larvae before they rob you of profits. It is approved for lactating dairy cattle. Flies are more than a nuisance. They spread disease and reduce milk production.

The time to start your ROL fly control program is this spring with all summer follow through.

Always follow lable directions.

Housefly



Stable Fly

Try Rabon now and flies won't get off the ground.

Congress scolded for lack of energy

GETTYSBURG – John Scott, Master of the National Grange, criticized Congress for not moving any legislation to solve the country's energy problems at the 56th Annual State Grange Leaderhip School at Gettysburg on June 20.

"(They) are sitting on their hands, and not doing anything about this oil problem," Scott said.

The National Grange Master related to the Grangers that "we import 50 per cent of our oil and pay $50 billion we could use for many useful projects in our own country."

Scott called for more attention to be paid to domestic oil sources.

Speaking about controlling prices on domestic crude "at the well-head" Scott noted that many owners had capped their wells because they could not affort to operate.

"The oil is controlled at $5 a barrel, and $10 a barrel for new oil," Scott stated, "but it is still $4 less than what the oil cartels want."

Turning to other energy sources, Scott believed that "nuclear energy is on the rocks."

Stating that the Three Mile Island (TMI) incident was

John Scott

"very well described as human failure," Scott doubted it would ever get back into production due to the efforts of "environmentalists".

In the wake of the TMI incident, Scott said "a $50 million nuclear power plant project in Tennessee was scrapped."

"The prioirity one fuel allocation for agricultural producers end in July," Scott warned, "It will be real trouble if we can't renew it."

Commenting on the status of the dairy industry, Scott warned of an impending problem with milk parity.

"Eighty per cent of parity for milk will end October 31 of this year," Scott said.

The U.S. Agriculture Secretary "can then set the price anywhere from 75 per cent to 90 per cent of parity."

"You can almost be sure it will be 75 per cent," Scott predicted.

In dollars and cents, this means "you can take $2 per hundredweight off the dairyman's milk check."

"I'm really worried about what this may do to the beef market," Scott remarked.

If milk prices go down, "more dairy cows will go

HELP WANTED

OFFICE . . . KEY PERSON

- Farm Background Helpful to Deal with Agriculture Industry

Only Banvel® herbicide offers so many ways to control weeds.

You can use Banvel herbicide at more different times in the corn production cycle than many other herbicides

Pre-emergence. Tank-mixed with *Lasso,* to control both grasses and broadleaf weeds

Early layby In corn up to 5 inches, Banvel as an overlay at a one pint rate gets early and late weeds

Post-emergence. In corn up to 36 inches, Banvel gets rid of many tough-to-kill weeds that 2,4-D misses and of course the easy weeds, too

****Fall treatment*** Air application knocks down hemp dogbane, permitting easier harvest

Tough-to-get weeds: On the Banvel label note the stubborn species that Banvel controls

Rescue When weeds threaten a takeover (you couldn t get into the field earlier) Banvel can help save your crop

Come see us now for your supply of Banvel herbicide the Big Plus from Velsicol

*Lasso is a registered trademark of Monsanto Company The Lasso + Banvel tank mix is cleared for use in Colorado Illinois Indiana Iowa Kansas Kentucky Michigan Minnesota Missouri Montana Nebraska New York North Dakota Ohio Pennsylvania South Dakota Utah and Wisconsin

FOR NO-TILL for early post-emergence

Banvel®+ atrazine

herbicide tank-mix combination kills young, tough broadleafs, vines, before they damage your corn.

Banvel + atrazine together do a broad spectrum job on weeds resistant to 2 4-D and not controlled by atrazine alone including tough-to control foxtails Canada thistle cocklebur smartweed velvetleaf and others

Spray up to 3 weeks after planting when grasses are less than 1 1/2 inches tall When Banvel® + atrazine is applied according to label instruction control usually lasts until corn is big enough to shade out late germinating weeds

Order Banvel Herbicide plus atrazine today as an important step toward total farm weed control

NOTE Before using any pesticide read the label

into beef" and depress the market.

Other activities occurring at the Leadership School included the Mid-Atlantic Public Speaking Contest.

Winning the Senior Division Public Speaking was Kay Burkett, of Mans Choice, Bedford County, with a speech entitled, "What I Tell My Friends About the Grange."

Judy Paull, of Lemont Furnace, Fayette County, won the Junior competition, with a speech on the same subject.

Cheryl Stark, of Ellwood City, took first place in a new competition this year, the Sign-a-Song Contest.

Contestants were required to sign a song in the hand sign language of the deaf.

Miss Stark performed the song "Looking Through the Eyes of Love", the theme from the movie, "Ice Castles".

Australian sheep imports okay

WASHINGTON, D.C. - Sheep imports from Australia, halted in 1977 after a new strain of Bluetongue disease was recognized there, may now be resumed, the U.S. Department of Agriculture reports.

Agreement between the two countries on stricter import requirements made the move possible.

Bluetongue, spread primarily by gnats, is a serious virus disease of sheep that can also affect cattle.

The new import health requirements also take into account other insect-borne viruses recently recognized in Australia. Sheep qualifying for export will be permitted to be flown to the Department's import facility at Honolulu for a 30-day quarantine. Some 200 sheep can be processed at the Honolulu station during each quarantine.

Look Into The Advantages Of A Swine "Castle"

AGSTAR® THE QUALITY BUILDERS

To see why our factory-built Sow, Pig, or Hog CASTLES can work so much better for you than other types — take a look inside

Here are just some of the features that add up to more comfortable sows and more pigs saved in our Sow CASTLE models fast growth and economical gains in our Pig CASTLE (nursery) and Hog CASTLE (finishing) models **Great ventilation and heating.** Superior ventilation means all animals get fresh, temperature-controlled air constantly Fan-forced heating, and adjustable draft-free fresh air inlets at the roof peak keep animals comfortable and thrifty in any weather

A building that's easier to manage. Features like rigid white fiberglass walls, slotted metal flooring, waterproof electrical fixtures — these make it fast and easy to pressure-spray and sanitize the entire building So it stands to reason that if sanitation is easier, there'll be less disease, less stress on swine (and you), less feed used per pound of gain, and more profit on every animal

Best of all — it's factory built. This means it's virtually an "instant" building When it's delivered to you it's complete with all equipment, plumbing, electrical fixtures You don't need to mess with contractors or workmen

Obviously, we can't give you in one ad the whole picture of why our Swine CASTLES are right for you. But if you'll use the coupon, or call us, we'll send you our factual, illustrated literature that does it far better No obligation, of course

WE WILL EXPAND YOUR HOG BUSINESS FOR LESS DOLLARS

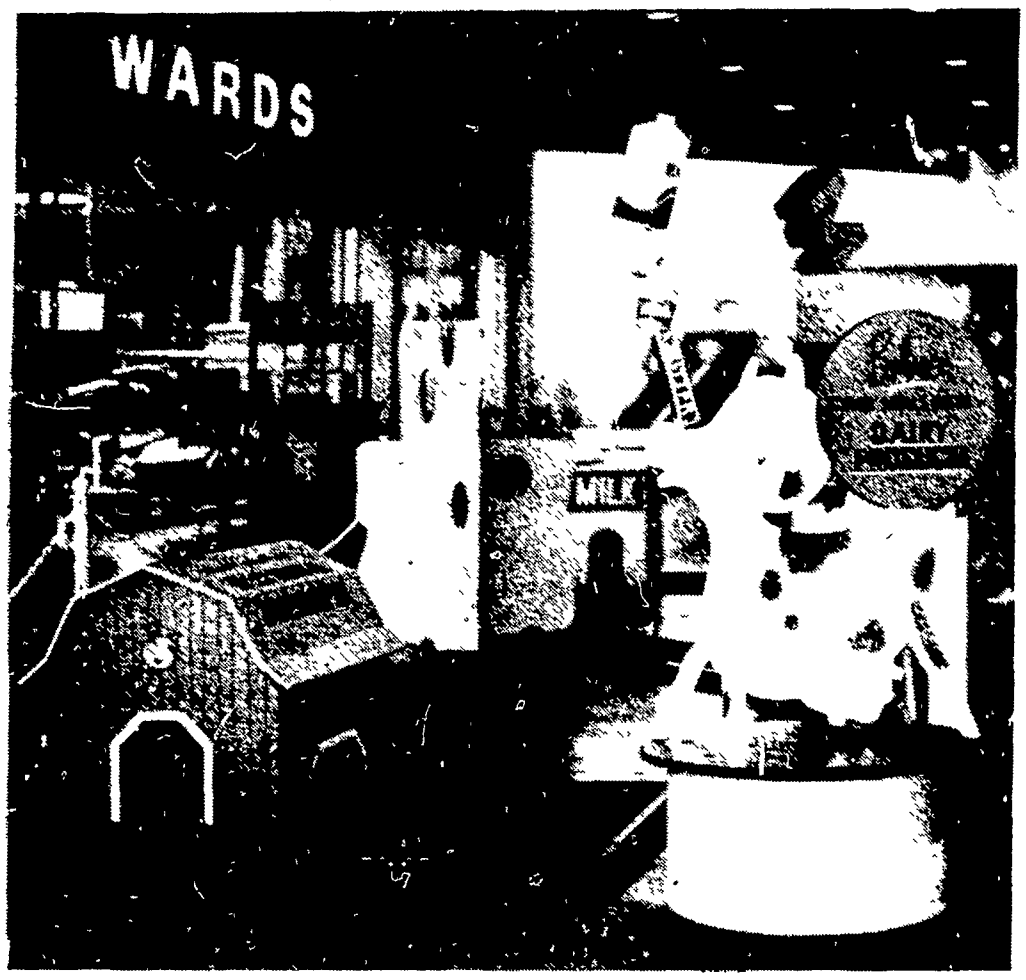
Miniature golf course is latest milk promotion

YORK - What was it that had youngsters and adults alike grinning from ear to ear last wek at the York Mall?

Why, the dairy industry's latest milk promotion, a five-hole miniature golf course, that's what.

This latest creation, designed to get consumers actively involved in a display, rather than merely viewing it in passing, was the brainchild of the offices of Federal Order No. 4, Advertising and Promotion Agency of the Middle Atlantic Milk Marketing Area.

(Turn to Page 49)



It was fun all the way through the five holes of the dairy industry's promotional miniature golf, a popular exhibit last week at the York Mall.

Congratulations DAIRYMEN

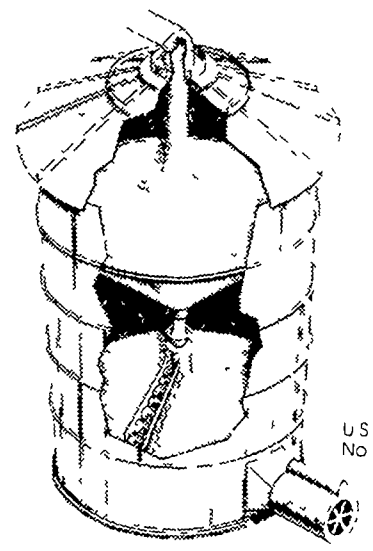
The Dual-Purpose Roto-Flo Grain Dryer

Drying and removing in one operation, plus year-round storage capabilities.

- Large overhead wet holding hopper for drying operations functions as a dry storage bin between drying seasons gives year-round use of Roto-Flo hopper bins and increases capacity of your overall storage operations
- A highly flexible drying system switch from batch to continuous drying (and vice versa) simply and easily
- Standard controls regulate (1) drying time, (2) time of machine cycle, and (3) drying air temperature
- Safety-control mechanism shuts off all operations automatically in the event of power failure, malfunction of heaters, fans, etc Loud horn notifies operator of shutdown
- Continuous-flow "drying-removing" operation produces high quality, high speed drying rates



U S Patent No 3449840

Miniature golf course

(Continued from Page 48)

York County's dairy promotion committee hosted the eye-catching golf course display as part of their June Dairy Month exhibit at the East York shopping mall.

Following a long-known theory that the best way to teach is with a game, the display takes golfers on a ball-whacking route through a series of dairy product displays, with subtle hints on the value of milk and its related foods.

While adults and children both displayed an avid interest in the mini-course, it was mostly the kids who got into the act. Committee persons and 4-H dairy club members and their families manned the display last Tuesday through Saturday, assisting players through the obstacles and handing out free dairy promotional prizes.

Contestants for the title of 1979 dairy princess also took part in the event. Kathy Rauhauser, Carol Druck, Esther Brenneman, Barb Kilgore and Carole Mundis each spent a portion of their visit greeting visitors and wearing the colorful kid-pleasing costume of the "Magic Cow."

The dairy mini-golf display will be traveling for a portion of the Summer with the Pennsylvania Agricultural Department exhibit. Groups interested in scheduling the exhibit should contact David Baker at the Order No. 4's promotional agency office at 8600 LaSalle Road, Towson, Md., 21204.

Plain and Fancy recognizes Steve Ruhl

Plain and Fancy Egg Ranch of Elizabethtown has named Steve Ruhl as the employee of the month for June. Ruhl resides at Manheim R3 and received a $25 U.S. Savings Bond to go along with the honor. He is responsible for loading trucks.

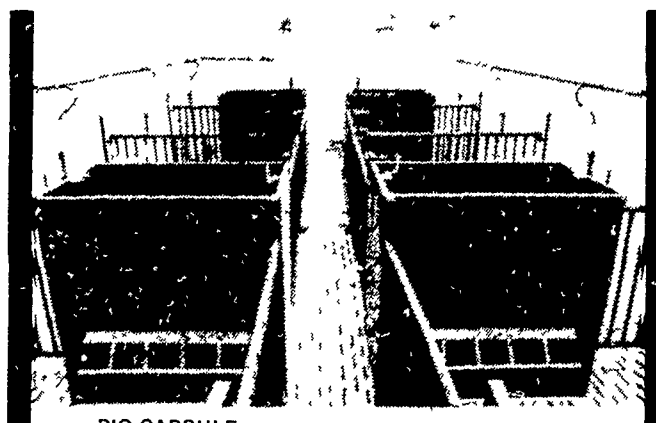
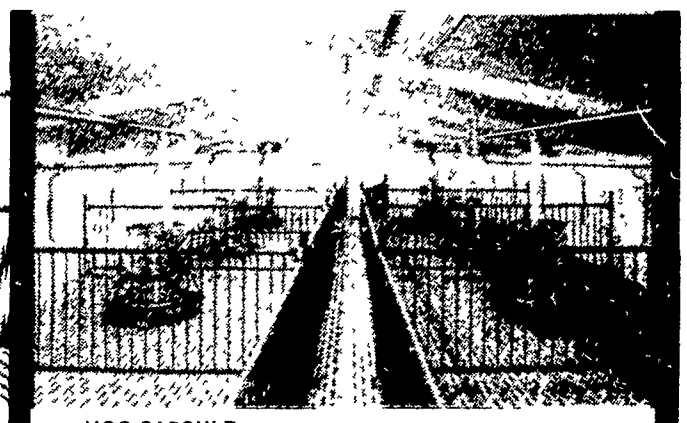
Make plans for a swine confinement building that is right for your operation.

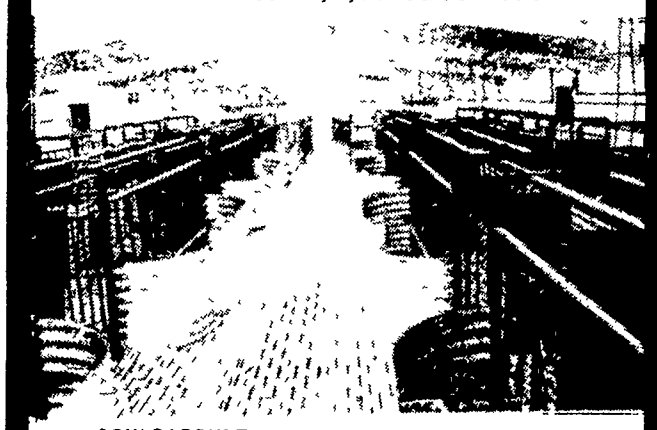
What an AG Best Capsule will do for you
• Provide uniform air distribution No drafts • Provide 2 environments within one environment for sows and pigs • Reduce feed wastage and cost • Reduce your labor and time • Reduce stress to a minimum • Provide comfort for the operator • Provide heavy insulation for less energy use • Provide all the tools needed for good management
There are many Pig Capsule models for farrowing, growing and finishing. So plan on a building that is made right to do the right job for you



PIG CAPSULE
A controlled environment that can save more pigs There are models with 8 to 20 pens equipped with partitions feeders nipple waterers and slatted floors Nursery pens and growing pens and automated feed delivery systems are available



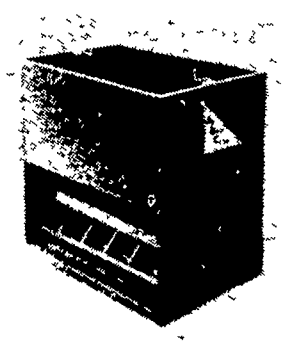
HOG CAPSULE
Clean dry and comfortable hogs can gain faster on minimum feed have less disease and are more profitable 8 or 10 pen models have vertical steel tube partitions a rotary feeder and 2 nipple waterers in each pen Automated feeding available

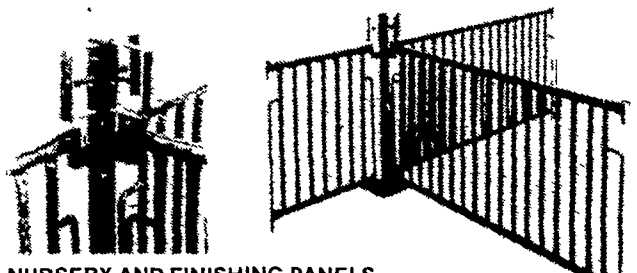


SOW CAPSULE
A healthy environment that helps wean more pigs per litter and cuts down on the labor needed to do the job There are models with 4 to 24 farrowing stalls that have built-in feeders watering cups and easily adjustable side panels

SOW-PIG CAPSULE
A good farrowing system for medium or small operations A farrowing building is combined with pig nursery pens You have choices of models from 4 farrowing stalls with 2 nursery pens to 16 stalls and 8 pens

The Ag Best nursery feeder has an expanded throat that helps eliminate packing and bridging An easy top adjustment regulates feed flow A step-back feeder design keeps manure from dropping in the trough Five partitioned feeding spaces on each side Capacity is 11 bushels Construction is 14-gauge welded steel





NURSERY AND FINISHING PANELS
Built in one piece No loose removable parts are needed Panels open from either end and swing both ways Posts have a unique latch with pull and twist action for instant release or positive catch (patent pending)

Co-op program winners chosen

CARLISLE - Twelve outstanding boys and girls have been named winners in the Cooperative Business Education Program sponsored by the Cumberland-Perry Co-op Council and will represent this area at the Pennsylvania Association of Farmer Cooperatives Summer Youth Institute at Shippensburg State College, July 8 to 11.

Those chosen to attend the Institute are: Robert Charles, Terry Heller, Richard Trout, Ronald Glesner, Dwayne Haus, Sharon Gaisler, Jeff McGillvray first year scholars; and Nancy Stevens, Clyde McMillan, Tim Albright, John Schlusser, Brian Weary, agribusiness explorers who will return to the Institute for the second year.

Winners were selected on the basis of their knowledge of the business enterprise system in America, the cooperative way of doing business, and on activities of the participants identifying them with school, community, church, and youth organizations.

These young leaders will be accompanied to Shippensburg by Walter Z Loy, institute chairman, who will act as chaperone and resource person for the delegation.

The Institute program is designed to teach youth more about the business enterprise system in the United States, to help in planning their future by pointing out career possibilities in agribusiness, and provide opportunities for the individual leadership development.

Food prices to be closely watched

WASHINGTON, D.C. – Alfred Kahn, chairman of the Council of Wage and Price Stability, has put food processors and retailers on notice that their prices will be monitored "very, very carefully" to assure that the recent lower farm prices are passed along to consumers. Kahn told a meeting of food writers and editors recently that it was "terribly important" for shoppers to see the lower prices in the supermarket.

According to a recent story in the Food Institute's Washington Food Report, some rather serious suspicions were brought to light. Kahn referred to "evidence of monopolistic practices in the food industry which need to be addressed." he went on to single out the "highly concentrated" soft drink industry, suggesting that profit margins may be too high and asking the Justice Department to investigate.

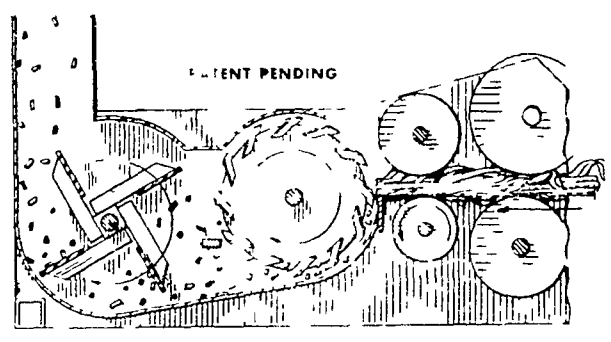
DION MACHINERIES

FORAGE HARVESTER

A Breakthrough In Forage Cutting — Throwing System

MODEL 750 IN STOCK

ITS SECOND TO NONE CUTTING—THROWING SYSTEM AND ITS EXCLUSIVE FEATURES MAKE IT THE FIRST!



YES! THIS IS THE MOST PERFECTED CUTTING THROWING SYSTEM EVER SEEN. Here is the definitive solution to the problems which have always existed in this regard. Compact, the forage is brought between the agressive rollers of the 750 forage harvester and is neatly cut by the exclusive cylinder head equipped with 8 strong curved knives, remains in suspension then almost at the same time, is rapidly picked up by the fan, which projects it outside in a continuous and synchronized movement. Furthermore, the forage is recut by a second shear bar located between the cutter-head and the fan, thus providing an unexcelled degree of fine and clean cut in any operating conditions. Already in the process of acceleration due to the centrifugal force supplied by the cutter-head the forage remains in suspension as same is running at a higher speed. The forage is then taken away by the fan blades which rush it outside at an incredible speed. Thrown out in such a way, the material is projected behind the forage harvester, at distances which can reach up to 30 to 40 feet. With this advanced technology, forage boxes are filled at an increased speed. The combination of both the cutter-head speed and the fan speed, completes marvelously this new and revolutionary system, truly unique and exclusive at DION.

★ **LARGE 117 P S I THROAT** providing a great feeding efficiency guaranteed by a perfected system of aggressive feeding rollers, well balanced by strong springs.

★ **FANTASTIC BUILT-IN GRINDER** giving back to the knives their original sharpening. Mounted on roller bearings, this system uses a standard emery stone.

★ **CYLINDER AND FAN COVER** can be removed easily, giving access for knives grinding or any maintenance work.

★ **SICKLE BARS OSCILLATING PITMAN** drives the sickle bars of all attachments and supplies 1,200 strokes per minute thus insuring the nicest cutting for any kinds of crops. Having a high carbon steel shaft, same is equipped with roller bearings assuring almost an indefinite life.

★ **HEAVY-DUTY UNIVERSAL JOINTS** transmit the tractor power to the cutter-head by passing through a strong 90 degrees angle transmission box. In some exceptional cases, these joints are protected by safety bolts which will shear off if ever the cylinder is overloaded. Such rugged joints insure a constant efficiency to the cutter-head, feeding rollers and fan.

★ **CONTROL LEVERS** all control commands of the forage harvester are very easy to handle.

★ **COMPLETE HYDRAULIC ELECTRIC CONTROL** of spout deflector and transmission.

★ **ATTACHMENTS ARE CONNECTED BY AN HYDRAULIC CONTROL** therefore, they can be raised or lowered thus allowing an easy adjustment of all attachments. This system is very compact, smooth and efficient.

AVAILABLE WITH THE TREMENDOUS EFFICIENT QUICK-CHANGE "DION" ATTACHMENTS

Farmland conversion study to begin

WASHINGTON, D.C. - The U.S. Department of Agriculture and President's Council on Environmental Quality recently announced an 18-month interagency study to investigate the extent and cause of conversion of agricultural land to non-agricultural uses.

The study also will assess efforts of state and local government to retain agricultural lands and will identify ways in which these efforts could be made more effective.

The study is to be completed by Jan. 1, 1981, and submitted to the President.

Agriculture Secretary Bob Bergland and CEQ Chairman Charles Warren, who signed a memorandum of agreement to carry out the study, will be co-chairmen of the study group. Bob Gray, formerly administrative assistant to Rep. James Jeffords, has been named study director and will head a full-time staff. Members of a coordinating group will be named from other federal agencies whose actions affect agricultural land.

Agricultural lands have been disappearing at the rate of nearly three million acres per year, according to the agriculture department. Many of these acres are converted to urban uses or used for highways, airports, shopping centers and other non-farm purposes. Some acres are covered by water.

"If our best farmlands are used for other purposes," said Bergland, "we may face decreasing production, increased energy needs and higher prices for commodities."

Bergland said the department's revised land-use policy, issued last October, shows its commitment to assure the maintenance of agricultural lands. Well-managed farm and forest lands often provide important environmental benefits, including wildlife habitat, open space and recreational opportunities, as well as a stable economic base, he said.

A recent report prepared for CEQ by the National Conference of State Legislatures showed that 48 states and many local governments have adopted agricultural land retention programs of one form or another.

"We need to evaluate the effectiveness of the various agricultural land protection efforts from a national perspective," Warren said, "and make this evaluation available to state and local government officials and others concerned about this problem."

Warren also indicated that the study would evaluate the role of federal agencies in agricultural land conversion and recommend policy changes if appropriate

Milk advertising hearing is July 10

NEW YORK, N.Y. - Proposals that would allow dairy farmers operating under the Middle Atlantic federal milk marketing order to use a larger share of their milk payments for advertising and promotion will be taken up at a July 10 public hearing.

The U.S. Department of Agriculture hearing will begin at 9:30 a.m. at the Center City Holiday Inn, 1800 Market St., Philadelphia.

Herbert L. Forest, dairy official with USDA's Agricultural Marketing Service, said the hearing was requested by Pennmarva Dairymen's Federation, Inc., an organization of five cooperative associations.

Key proposals would change the advertising and promotion rate, Forest said. Assessments–now on a fixed rate schedule–would be based on the average price that handlers pay farmers for their milk.

One proposal would increase the funding rate to one per cent of producer prices, while a second proposal would set the rate at 7.5 per cent.

The Department estimates that the one per cent rate would increase assessments to 12 cents per hundredweight, while the .75 per cent rate would mean an increase to nine cents. The current rate is seven cents per hundredweight.

Proponents told the department that a rate increase was needed to keep pace with the constantly increasing costs of operating the program.

Another proposal would allow producers who don't wish to participate in the advertising and promotion program to request refunds by the 15th day of any month for that month and the rest of the calendar year. Now refund requests are on a quarterly basis.

Another proposal would establish a late-payment charge on overdue payments to producers, cooperatives, and the market administrator.

Copies of the hearing notice detailing the proposals may be obtained from Market Administrator J. Shine, P.O. Box 710, Alexandria, Va. 22313, or from the Dairy Division, AMS, USDA, Washington, D.C. 20250.

4-H demonstration winners chosen

DOYLESTOWN - Bucks County 4-H members in the first annual 4-H Demonstration and Public Speaking Contest on June 21, 1979 at Neshaminy Manor Center, Doylestown.

Winning blue ribbons in the senior demonstration category were: Kathy Kotch, Whichway 4-H Club, "Simple Dog Obedience; Sharon Raab, Buckingham 4-H Club, "Sheep Shearing"; and Greg Rodel, Richboro 4-H Club, "Homing Pigeons." The winning Public Speaker was Charlene Gormley, Wrightstown 4-H Club. Charlene spoke on the topic of "4-H and Personal Growth." The senior winners are eligible to attend Pennsylvania 4-H Days, August 6 to 8, 1979 at Penn State for further competition.

In the Junior Demonstration category, Karen Rick, Springtown 4-H Club, was awarded a blue ribbon for her demonstration of "The Peanut Butter and Jelly Sandwich." Kent Gaerthe, Jr., Hilltown 4-H Club, won a red ribbon for his demonstration on "The Functioning of Spark Plugs." These two 4-H'ers will compete on July 11, 1979 in the Regional 4-H Demonstration Contest at Montgomery County 4-H Center, Lansdale.

Beef check-off hearings going on

WASHINGTON, D.C. – The United States Department of Agriculture is holding a series of hearings to consider a proposed Beef Research and Information Order, similar to the order which established American Egg Board and the national egg checkoff. The proposal outlines a program to be administered by a Beef Board of up to 68 members, funded by a checkoff not to exceed one-half of one per cent of the value of cattle sold. Areas of activity are to be research, consumer and producer information and promotion. Supporters of the proposed order look to it to strengthen the position of beef in the marketplace and to stabilize market conditions.

A Beef Order voted on in 1977 was defeated because the 56% of producers who voted for it fell short of the two-thirds required. A 1978 amendment to the enabling legislation will allow the current proposal to pass on a simple majority vote.

4-H demonstration winners named

LANCASTER — By teaming up to demonstrate ice cream treats. Reneee Haldeman, Manheim R3, and Glenda Faus, Manheim R4, won first place in the junior division of the Lancaster County 4-H Demonstration contest. The two belong to the Elm-Penryn Community 4-H.

Mary Ann Bassalin, Intercourse, won top prize in the senior division, by showing and telling how Hawaiian fruits are used as nutritious snacks. She is an active member of the Pequea Valley Cooking and Sewing 4-H.

And Doug Hershberger, Quarryville R4, won the blue ribbon in the public speaking portion of the contest. his topic was "4-H to the rescue".

Other winners in the junior demonstration division included: second, Sally Gregory, Brickerville, who spoke on "Hoof Sense; and third, Wendy Martin, Ephrata Community 4-H, who showed how to set a table correctly.

In the senior demonstrations, second place went to Martha Gregory, Brickerville Community Club, who demonstrated how to make cheese balls; third was awarded to Susan Martin, Ephrata Community 4-H, who showed how to make muffins, and fourth was Virginia Smith, Penn Manor Community 4-H, who talked of cochroaches as pets.

Second place winner in the public speaking was Patricia Pitz, Mountville, who told of "Lancaster County's vanishing resource".

USDA extends barley loans

WASHINGTON, D.C. - Farmers with 1978-crop barley are being given the opportunity to extend their loans for six months, Ray Fitzgerald, administrator of the U.S. Department of Agriculture's Agricultural Stabilization and Conservation Service, said last week.

Fitzgerald said the extension would help alleviate transportation and storage problems that many producers are now facing and give producers another marketing option.

Recently, grain prices--including barley--have been steadily increasing. However, while barley prices are still at or only a little above levels in some states, department projections indicate that barley prices should continue to increase. The six-month extension will allow farmers to market their barley over a longer period.

This action comes after Secretary of Agriculture Bob Bergland said last March corn and barley loans might be extended if the maturing of a large number of loans at the same time posed "a threat to orderly marketing."

However, the farmer-owned reserve will not be open to 1978-crop barley, Fitzgerald said.

Producers who wish to extend their loans should contact the ASCS office where they obtained them.

Weaver gives $20,000

NEW HOLLAND - The Community Park Association of New Holland has announced a gift of $20,000 from Victor F. Weaver, Inc., a New Holland food processor to be utilized for its current park capital improvement project. In addition to the major gift, Weaver has also made available during the 1979-80 year, another $15,000 in matching gift challenge funds.

The Community Memorial Park of New Holland is currently involved in extensive capital improvement projects. The major part of this $50,000 program includes the renovation and refurbishing of the park's refreshment center. The refreshment center, when completed, will exhibit a new interior design complete with indoor seating for refreshment patrons, new food equipment, and an enclosed park cashier's booth for all park entertainment activities.

In addition, an overall effort to improve the park's facilities, including lighting, parking controls, and upgraded pavilions are also included in this major capital improvement program.

WANTED:

Tractor Specialists to make and sell profit!

As a Case dealer you sell products that turn profits — for you and your customers

You'll be the Tractor Specialist With 14 sizes of 2 wheel and 4-wheel drive tractors plus heavy duty tillage tools And that s it! Our way is efficient It lets you concentrate your sales and service efforts Your parts inventory is clean and financially manageable And your used equipment lot deals mainly with fast moving tractors

If you'd like to be doing better than you are maybe we can do something about it with a Case Tractor Specialist franchise Ask about our light construction line, too Call or write for full information

Are you interested? Please contact

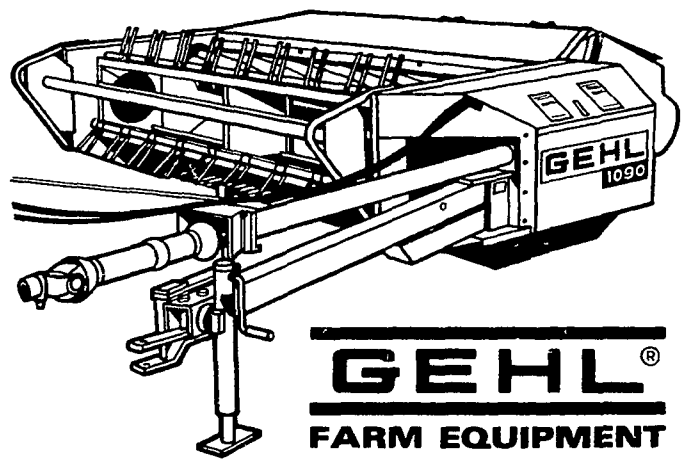
WHY DO PEOPLE PREFER GEHL MOWER CONDITIONERS?

1 - Not as much leaf loss
2 - Proven faster drying action
3 - No belts to maintain
4 - Full floating machine,

Not only protects header but protects your guards. Why not call for a free demonstration if you're in the market for a mower conditioner which is better than a haybine.



GEHL®

THE FOLLOWING IS AN EXPLANATION OF TERMS USED IN DESCRIBING TRACTORS

EXCELLENT Recently purchased Limited use Probably shows some evidence of handling and use, but in practically new mechanical condition Under 1000 Hours

VERY GOOD. In exceptionally good mechanical condition May have been overhauled or may never have been used enough to require overhaul

GOOD No known mechanical defects except any that may be described In operating condition, but may have some worn parts that will need repair or replacement soon

FAIR Has seen considerable service and may require general overhaul soon May be old or may have suffered hard use

POOR Has seen hard service Is worn and needs repairs

★ NOTICE ★

These categories of condition are believed to describe the equipment and have been conscientiously set forth by the owner. The equipment is available for public inspection and the foregoing is merely a guide. The condition as set forth on each piece is in no way a warranty or guarantee, actual or implied.

GOT TORQUE AMPLIFIER, CLUTCH AND PRESSURE PLATE PROBLEMS WITH YOUR IH TRACTORS?

There is a company in the West that has been rebuilding T.A. units for several years now and having excellent results. The basic reason for their success is the sprag clutch they use. In the areas where they have been selling, they even have IH dealers that use this unit almost entirely.

(1) They feel this sprag clutch is giving less problems than even IH's new beefed up unit because of the design of the sprags.

(2) This unit can be bought as individual parts which is many times all you need or as a complete renewed unit ready to set in your tractor.

(3) They have a warranty up to 2000 hrs., or 3 years . . . and . . .

(4) They don't cost any more and to most buyers they are costing less than from the big company. They offer same day shipment by UPS or Greyhound bus. They also have a program on rebuilt Dynalife clutches and pressure plates.

If you want more information write me and I will get the literature to you. Raymond B. Leaman, RD #1, Willow Street, Penna. 17584.

RED ANGUS BULLS FOR SALE

You've heard about the efficiency of the Hereford X Red Angus cross (Red Baldy). And the hybrid vigor Angus bring to commercial herds. We offer two yearling and two, 2-year-old herd sires for sale. Dams are famous Wye Plantation Registered stock. Sire is Leachman's Dynamo 515. Bulls weighed about 1200 lbs. at 1 year, 1500 at 2, are fertility tested. Large framed, modern cattle with ADG's on 140-day test and WDA's at 1 year both in 3.0-3.5 range. Call or visit for further information.

THINKING OF SELLING "YOUR FARM"?

This is certainly an important decision raising many questions -

What is a fair price ? How to find a "QUALIFIED" buyer ? When should I sell ? What about tax considerations ? The farm specialists of G.I. Ebener & Associates with many years of dairy farming experience and other agricultural involvement, can help you with answers to these and other important questions. Selling your farm is one of the most important decisions of a lifetime and merits professional help. Write or call us to discuss your objectives.

OUR No. 1 GOAL

The No 1 goal of Kissinger, Leonard and Associates Farm & Land Department is to provide the best possible service to the buyers and sellers of farms. To date Kissinger, Leonard & Associates have sold 13 farm properties throughout Central PA for possession in 1979. If you are buying, we would be happy to work with you to find a farm to meet your needs. If you are selling, we would be happy to meet with you, without any obligation, to discuss our farm sales program The farm department staff has extensive farming and agriculture financing experience so that they can provide the knowledgeable assistance that is most helpful to both the buyer and seller.

Debra Cassel promotes 'natures finest' for Dauphin County

By SALLY BAIR
Staff Writer

"I think using Dairy Princesses is a very attractive way of promoting milk," Debra Cassel states firmly. Twenty-year-old Debra, Hummelstown R2, is completing her year as Dauphin County Dairy Princess, an experience which she feels was beneficial to her, and , more importantly, to the dairy industry. Debra is the daughter of Mr. and Mrs. John D. Cassel.

"I definitely feel I've reached lot of people," Debra says. While she has not yet totalled the number of appearances and people involve with each, she quickly reels off a long list of speeches she has made, ranging from the traditional school programs, to senior cititzens groups, to many, many, service clubs.

"Sometimes people have the wrong image of the farmer, and using the dairy princess is a good way of promoting dairy products," she says with a smile.

The thrust of Debbie's message to service clubs is "What would we do if dairy cows went on strike?" She then discusses the many products for which cows are responsible, from the very important milk and milk products, to the less well-known life-saving drugs which are taken from dairy animals. "I like them to see the overall basis of the cow. I also tell them about the nutrients in milk, and what each nutrient does on a daily basis."

She says she always gets a quick response when she mentions that riboflavin in milk helps to prevent rapid aging. At that point, she laughs, people pick up thier milk glasses and start drinking.

One important thought she leaves with her audience is "You are never further from agriculture than your next meal." She like to conclude her talks by reminding her audiences that "milk drinkers make better lovers."

Debra said, "People ask quite a few questions, but many are interested in my personal background and about my farm. Some ask about nutrients in dairy products."

When speaking to school groups, Debbie uses the pillow puppets which describe the necessary nutrients in milk, and she uses dairy posters, "I change my speech to suit the age group," Debra states, adding that this keeps hers from getting bored with the same speech. Very early on, she reports, "I started hating to use note cards, so now I just talk.

One interesting twist in a school visit was the day her brother helped her take a baby calf to his daughter's classroom. "That was a really big deal. Some were afraid of the calf but we gave them each a chance to pet it."

She enjoyed talking with school children, and she was amused by their questions. "They all want to know if my crown is made of diamonds," she relates. "They were very humorous." She was surprised by how much they knew about dairy products, and when she concluded her talks she said she liked to quiz them to see what they had learned. "They could answer all my questions."

Debbie estimates that she has made from ten to 12 appearances a month during her reign, and feels that living in the Harrisburg area is a real asset for a dairy princess. "There are many shopping malls here, which are easily accessible," she said.

Aside from the large population to help to educate, Debbie was sometimes drafted to fill in for the state Dairy Princess. Betty Rode, commodity promotion supervior for the Department of Agriculture, helped her arrange some appearances. Perhaps the most exciting for Debbie was attending Governor Thornburgh's Inaugural Ball at Founder's Hall in Hershey. She also participated in the Farm Show and other dairy shows at the Farm Show Building.

There was one clear disadvantage of living near Harrisburg as a result of the crisis at the nuclear facility at Three Mile Island. Debbie said she received many questions about radiation in milk, and some people told her emphatically that they would not drink milk as a result. Debbie said, "I told them that our milk was tested on a daily basis during the crisis and that until they hear differently milk is definitley safe to drink." To those who refuse to drink milk, Debbie said, "I tell them that it is their loss if they don't drink milk."

An interesting adventure for her was attending Ag Progress Days and working in the dairy booth there, taking her turn as "Tiny the Talking Cow." Debbie explains, "You can see the people and they can't see you. The cow's head moves and kids really think that the cow might be talking. Some really start talking to you."Grown-ups show interest too, she said, although many think they're too old to talk with a talking cow.

One day she spoke with 300 third graders for the Harrisburg area, when she participated in a health day program sponsored by Harrisburg Hospital. She worked at a nutrition stand, passing out milk and explaining to the chilren why they should drink milk.

At grocery stores and malls, Debra passed out cheese, or, more frequently, milk punch. She said, "A lot of people were hesitant to try milk punch, but once they did they really liked it. Many asked for the recipe."

At Wanamakers Department store, she helped pass out 120 cups of milk in two hours, and at one local grocery store passed out 15 pounds of cheese cut in tiny portions, in three days.

Senior cititzens were one of her favorite groups to talk with. "I liked to tell them the importance of keeping milk in the diet They were very interested in me personally."

A 1976 graduate of Lower Dauphin High School, Debra has worked for three years as a secretary for Cleveland Brothers Equipment Company. She said, "They have been very considerate about letting me make appearances."

Debra's family milks about 86 dairy cows, mostly Holstein, with a herd of 235 altogether. They farm 600 acres of land Debra owns eight cows, seven of them Jersey and one Holsten. She states, "I had better luck with my Jerseys." After completing her tenth year as a 4-H member with the Lower Dauphin 4-H Club, Debra is now in her second year as a leader.

She was an enthusiastic showman during her 4-H years. She said, "I always figured that you can't do much with type, so I worked on showing and fitting. I'm proud of my ribbons and trophies. I had two champions, who are now getting quite old."

She said she enjoys 4-H because, "It gives you a good sense of competition. You get out with people and out with the dairy industry. I really enjoyed showing cows."

Her hobbies including raising her animals, both dairy cows and cats, and she likes sports and photography.

Debra says she enjoys living on a farm "I wouldn't trade it for anything." She still helps out. "I feed the young calves in the evening and help with the milking when someone is off for the day."

She credits some of her success with the help given at the seminar for county Dairy Princess last Summer. "When I was first selected I knew about what I wanted to do, but not how to do it. They have a lot of people of help and give advice, and you get to know the dairy industry. It gives you something to identify with."

Getting to know the other girls is a wonderful by-product. "You get to make a lot of friends." She feels the state contest offered an "enlightening program, and the chance to become better friends with the other dairy princesses."

Debra will be returning to this year's seminar to participate in a fashion show for the newly selected Dairy Princesses

About entering the contest, Debra says, "I'm glad I did it. I will always have that experience. I met a lot of people and I have learned a lot about people."

There is one regret she feels as she concludes her reign. This year the committee could find no interest among eligible girls to hold a contest, so she has no successor to crown, and, in fact, has been asked to help out throughout the coming year as necessary. While Debra is glad to make some extra appearances, she would really like to crown a new Dairy Princess. "I feel I really made some progress, and I would like to see the work continued." She is afraid the impetus will be lost.

While the conclusion of her reign may be anticlimactic, Debra's year was nevertheless a year of excitement and challenge, and a year of strong promotion for those nutritious, delicious dairy products.

Debra Cassel, Dauphin County Dairy Princess, owns eight animals of her own. Here she is seen with one of her newest acquisitions, a Jersey calf.

Junior Cooking Edition

The month of June may be quickly drawing to a close but there are still many, many dairy recipes to be shared by our junior readers. Included in today's list are many that have been sent in, but there are still more recipes that will be used in the weeks to come.

If you have a favorite recipe that you would like to share with the Junior Cooking Edition send your recipe to Junior Cooking Edition, **Lancaster Farming**, Box 366, Lititz, Pa. 17543. Please include your name, age, and address, and be sure to write all the directions and the ingredients very neatly, so that the recipe can be used.

FRESH YOGURT

1 quart fresh milk
1 teaspoon plain yogurt
fruit

Boil the milk in a pan for a few seconds. Cool until lukewarm. (Milk made from powdered skim milk need not be boiled). Throughly mix three teaspoonfuls of the lukewarm milk with the teaspoon of yogurt. Then add to the boiled milk in the pan, stirring well. Empty mixture into jars and stand them, covered, in a yogurt maker for about eight hours or, until junket-like texture is acheived. Add fruit if desired. Store in the refrigerator until ready to be served.

Marvin Martin
Myerstown, Pa.

CHOCOLATE PEANUT BUTTER FUDGE

½ cup milk
1 box confectioners' sugar
butter, size of an egg
1 package chocolate chips
1 pint marshmallow creme
⅔ cup peanut butter

Combine milk chocolate chips, butter and confectioners' sugar. Cook about two minutes. Remove from heat and add marshmallows and peanut butter. Put in a butter pan and cool.

Masrtha Fisher
Age 8,
Narvon, Pa.

ICE CREAM

2 envelopes unflavored gelatin
½ cup cold water
4 cups whole milk
2 cups granulated sugar
2 teaspoons vanilla
1 teaspoon salt
3 cups cream

Soak unflavored gelatin in cold water. Heat milk until hot but not boiling. Remove from heat. Add gelatin, sugar, vanilla and salt to the milk. Cool and add cream. Put in ice box to chill (five or six hours) before freezing. Makes one gallon of ice cream.

LIME SHERBET

1 envelope unflavored gelatin
1 cup granulated sugar
1½ cup boiling water
½ cup line gelatin
2½ cups milk

In a large bowl, mix gelatin and sugar. Add boiling water and stir until dissolved. Add lime gelatin. Cool mixture completely. Stir in milk. Freeze for 1½ hours or until mixtrure is frozen about ½ inch around the bowl. Beat with an electric mixer or, wire whip until smooth (about two minutes). Pour into two freezer trays (four by ten inches) or, an eight inch baking pan. Freeze until firm. Makes about 1½ quarts sherbet.

Lloyd Sensensig
Age 8,
Shiloh, Ohio

COOL FUDGE CUPS

2-3 ounce boxes instant chocolate pudding
4 cups milk
1 quart vanilla ice cream
16 popsicle sticks
cup cake liners

Line 16 cupcake tins with liners (foil prefered). Beat the pudding and milk for two minutes. Stir in softened ice cream. Blend well. Fill cup cake liners. Freeze partially. Insert a popsicle stick in the middle of each. Freeze completely.

Jodi Wright
Age 10,
Millerstown, Pa.

BANANA SPLIT DESSERT

2 to 3 bananas
½ gallon 3 flavored ice cream
1 cup chopped nuts
1 cup chocolate chips
2 packages graham cracker crumbs
½ cup butter
2 cups confectioners' sugar
1½ cup evaporated milk
1 teaspoon vanilla
1 pint whipping cream

Press crumbs into an 11 by 15 inch pan. Reserve one cup for topping. Slice bananas. Put over crust. Slice ice cream in ½ inch thick slices. Put over the bananas. Sprinkle chopped walnuts over the ice cream and freeze until firm. Melt one cup chocolate chips and butter. Add confectioners' sugar and milk. Cook mixture until thick and smooth, stirring constantly. Remove from heat and add vanilla. Cool chocolate mixture. Pour chocolate over ice cream. Freeze until firm. Whip cream. Spread ove chocolate and top with crumbs. Freeze. Remove from freezer 10 minutes before serving.

Glenda J. Martin
Age 12,
Newmanstown, Pa.

THE BIOLOGICAL THEORY OF IONIZATION AS TAUGHT BY CAREY REAMS IS BEING OFFERED IN A COURSE ON PLANT FEEDING

WHERE: Sheraton Inn, Harrisburg, Pennsylvania
WHEN: July 23, 24, 25 and 26
TAUGHT BY: Dr. Carey A. Reams
Rick Bishop

COURSE OUTLINE:

- Learn how to do your own complete soil analysis
- Learn how to use analysis
- Learn how to control soil temperature
- Learn water control
- Learn how to ease off herbicides
- Learn when and how to apply plant nutrients
- Learn how to buy the right plant nutrients for your farm
- Learn how to control erosion by creating an electromagnetic field over the surface of the land
- Learn how to grow 12 ton/acre alfalfa
- Learn how to grow 100 bushel soybeans
- Learn how to grow top quality fruits and vegetables
- Learn how to control most insects naturally
- Learn proper mineral ratios for soil to retard weed growth
- Learn how to know what plant food to use based on frequency of crop grown
- Learn how to keep livestock healthy

TOURS FOR FARMERS
AND PEOPLE INTERESTED IN FARMING

EUROPEAN FARM TOUR Tour #2125 October 1979
Beginning with the Olna Fair, the largest dairy and farming fair in Switzerland, this tour takes you through some of the most scenic parts of Europe while focusing on points of interest to farmers, such as a meat factory; a cattle breeding station in Austria, a cheese dairy; an artificial insemination center in Switzerland, and the original home of the Holstein Friesian cattle in Holland.

SOUTH AMERICAN FARM TOUR Tour #3114 February 1980
See farming methods in Brazil, Paraguay and Columbia, plus the most famous and spectacular sights in South America. Places such as Sugar Loaf Mountain in Rio de Janeiro; Iguassu Falls on the border between Brazil and Paraguay; the renowned "Lost City of the Incas" at Macchu Pichu; and the Panama Canal. This is a super "Around South America" tour planned and designed by farm people for farmers.

FARM TOUR OF EUROPE Tour #3316 August 1980
(Including the Passion Play at Oberammergau)
This will be a tour of the Palatinate (where Pennsylvania Dutch originated); Alsace and Lorraine in France; and Switzerland. This tour will feature visits to farms and will climax with attendance at the world famous Passion Play at Oberammergau in Southern Germany, perfomed only every ten years. This should be a very exciting tour, visiting places important to the heritage of people from this area.

AUSTRALIA AND NEW ZEALAND FARM TOUR February 1981
It's not too early to be thinking about our Australia and New Zealand farm tour in 1981. This tour will feature visits to grain, livestock and dairy farms, and will include visits with farm families from "down under". All details have not yet been finalized, but let us know if you want further information as it becomes available.

Brochures are available for the above tours. Ask for them and we'll send them to you immediately. There's no obligation in asking for the brochure, and maybe you'll find something you like. Heritage Travel is a specialist in farm tours. Our staff has had experience in farming both here and abroad, and we can make your visit on one of these tours very enjoyable and memorable. If you have any questions, give us a call, or drop us a card. And do ask for the brochures – they're free, and they have a lot of information in them.

KRAFTY CHEESE

5 gallons skimmed milk
1 teaspoon baking soda
2 teaspoons salt
½ cup butter
1½ cups cream or, milk

Let the skimmed milk sour until thick. Scald on top o. the stove until it is too hot to touch or, you can squeeze the whey out of the cheese with the hand. Then strain through a cloth and squeeze until dry. Put throught the food grinder to make the curds fine. Cook all of the ingredients in a double boiler until smooth, approximately one hour. Stir constantly while cooking. To make a softer cheese, add more milk. Makes approximately three quarts.

Lorrene Newswanger
Age 14,
Morgantown, Pa.

Kathy Martin
Age 10,
Lititz,Pa.

REFRIGERATOR CHEESE PIE

1½ cups fine vanilla wafers, crumbed
⅓ cup butter, melted
1-8 ounce package cream cheese
⅔ cup sweetened condensed milk
1 teaspoon grated lemon peel
3 tablespoons lemon juice
½ cup heavy cream

Mix together wafer crumbs and melted butter. Press into buttered nine inch pie plate. Chill until firm, about 45 minutes. Blend softened cream cheese, condensed milk, lemon peel and lemon juice. Fold in whipped cream. Pour into crumb crust. Chill until firm, about four hours.

Katie A. Stoltzfus
Age 12,
Holtwood, Pa.

SOUR CREAM CAKE

3 eggs
1⅓ cups granulated sugar
1 teaspoon vanilla
1½ cup sour cream
¾ teaspoon baking soda
2¼ cups cake flour
1½ teaspoons baking powder
½ teaspon salt

Beat the eggs. Add sugar and vanilla. Beat well. Add sour cream alternately with sifted dry ingredients. Bake in two well greased nine inch pans. Bake at 350 degrees F. for 30 minutes or. until done.

Farm Women Societies

Berks Co. Society 6

Members of the Berks County Farm Women Society 6 met at the home of Mrs. Steve Fisher, Oley, on June 19. A selection of dishes of food was brought and enjoyed by the ladies bringing their favorite or a foreign dish as well as the recipe.

Donations were given to Society of Farm Women's Love Fund, Oley Fire Co., Oley Playground and to the ambulance fund at Oley.

Plans are being made for the group to go to Philadelphia for a Fall day-trip. Also a family picnic was planned to be held at the home of Mrs. Randall Hetrick on August 19 at noon. Mrs. Nora Sweitzer, Oley, also gave the invitation to the group for a family swimming party on the evening of July 26.

The ladies will be serving refreshments at the stand for the sale at Oley Fairgrounds on July 14.

Next meeting will be "Our Children's Youth Night" at the home of Mrs. Wm. Mest, Oley, on July 24.

Lancaster Co. Society 3

On June 16, Lancaster County Farm Women Society 3 met at Mellingers Lutheran Church, Schoencek. Mrs. Ethel Gerhart was hostess.

The business meeting was in charge of the president Mrs. Miriam Moore. Contributions of $25 each were given to the IFYE program to help sponsor Christine Erb, an exchange student to Japan; to Chris for her personal use; and to the M.S. Fund. A contribution of $100 was given tothe Warwick Hish School Band Uniform fund.

David Snavely, a recent graduate of Warwick High School was introduced to the members. He was given a $300 scholarship from the Society at the Senior Awards assembly. David will major in Forestry at the Mt. Alto Extension of Penn State.

The program was a slide presentation of a tour of the Republic of China by Mrs. Pat Hoover. She also displayed hand crafted items made by the people of China.

The next meeting will be Sunday July 15, at the homeof Mr. and Mrs. Earl Stauffer. It will be the family picnic starting with lunch at noon.

Lancaster Co. Society 4

The June meeting of Lancaster County Farm Women Society 4 was held Saturday afternoon June 24, at the home of Mrs. Mary Frantz, Mountville, with Mrs. Edwin Yeaglin as co-hostess. Highlights of the meeting included a safety program presented by F.D. Warfel, who spoke on driving and driver's education, and an auction of items brought to the meeting by members. Mrs. Paul Kauffman acted as auctioneer.

The business meeting was opened by the president, Mrs. Carl Siegrist.

Mrs. Paul Kauffman, special activities committee chairman, announced plans for a trip to Harper's Ferry and Antietam Battlefield on October 13. Husbands are invited. Mrs. Wilbur Kauffman, program chairman, announced the July meeting will be a picnic at the Amos Herr Park in Landisville at 5:30 p.m. on July 28, 1979. Members are to bring a covered dish to share and their own tableservice. The committee will supply sandwiches and beverage. A motion was passed to donate $15 to the park.

Mrs. Siegrist reported on the club's trip on June 6, 1979 to the Choo-Choo Barn, where they entertained seventeen children and three adult supervisors from Christ's Home of Paradise with a picnic supper and a tour of the miniature railroad display.

In other business, the group voted to donate $50 to the county project, the Blind Association. Mrs. Siegrist also announced a special county project in which individuals are to make something practical and useful out of throwaway items. These items will be judged at the September meeting and one winner will be selected for county competition. The county convention is schedule for November 3 at the Farm and Home Center. The County picnic will be held on August 1, at the Lampeter Community Grounds. Members are to bring their own place setting and a covered dish.

An invitation was read from Somerset County Farm Women Association to attend their sixty-fifth anniversary celebration on October 17, at Seven Springs Ski Resort. Reservations must be in by August 25.

Junior Cooking Edition

(Continued from Page 93)

FROSTED CHOCOLATE SHAKE

2 to 3 tablespoons chocolate syrup
¾ cup cold milk
1 teaspoon sugar
½ teaspoon vanilla
½ cup vanilla ice cream

Combine chocolate syrup, milk, sugar and vanilla in a shaker. Shake well. Add ice cream and shake again. Serve immediatly, pouring into a tall glass.

Susan Dodrer
Age 8,
Littlestown, Pa.

CRUNCHY ICE CREAM

⅔ cup brown sugar
⅓ cup butter, softened
2 cups corn flakes
½ cup chopped nuts
½ cup flaked coconut
1 quart vanilla ice cream, softened

Measure sugar and butter into bowl. Beat until light and fluffy. Add cornflakes, nuts and coconut. Reserve ¼ cup corn flake mixture for topping. Press remaining mixture evenly and firmly in the bottom and sides of a nine inch pie pan to form crust. Chill. Pour in slighltly melted ice cream. Sprinkle with reserved topping. Freeze until firm, about three hours. To serve, garnish with berries or, other fresh fruits. Serves eight.

Linda Pierce
Age 14,
Conestoga, Pa.

MILK BREAD

4 cups scalded milk
1½ cup shortening
3 tablespoons salt
1 tablespoon sugar
½ cup lukewarm water
1½ to 2 yeast cakes
11 to 12 cups flour

Mix as a standard bread recipe. Let rise until double in bulk. Bake at 350 degrees F for one hour. Will Yield three large or, four medium sized loaves. For variation, add one cup raisins for each cup milk used.

Walter Wengel
Age 10,
New Holland, Pa.

Farm Women Societies

(Continued from Page 94)

Lancaster Co. Society 8

Edwin Myers, Elizabethtown, an engineer with the Pennsylvania Department of Transporation, was guest speaker for Lancaster County Farm Women Society 8 at their monthly meeting held at the home of Mrs. Lewis Bixler, Marietta R1. The speaker showed slides of picturesque streams in Lancaster County and the old mills or covered bridges they often flow by. Myers made viewers aware that Lancaster County is blessed with much primitive beauty of God's creation.

Mrs. Kathryn Erb presided in the absence of the president.

A breakfast meeting will be held as the next session at Willow Valley Inn, at 9:30 a.m. July 21. Those in need of transporation and drivers with unfilled cars may meet at the Mennonite Church, Mount Joy, at 8:45 a.m. Members are requested to bring gifts that can be used at Conestoga View when this Society visits there on August 3. The County Project selected for the year is the Lancaster County Blind Association. The county picnic will be held at Lampeter Park with place settings and a covered dish required of each person attending August 1.

Members were invited to enter hand crafts from reused materials to share in state competition of Farm Women.

Hostesses for the June meeting were Mrs. Bixler and Mrs. Elizabeth Shuman.

Lebanon Co. Society 14

Lebanon County Farm Women Society 14 held its monthly meeting at the home of Mrs. David Gish, Palmyra R2. Twelve members attended.

President Mrs. George Ungemach led the business meeting. Plans were made for the family picnic on July 22. The county convention will be October 10 at Mt. Zion. Mrs. Jerry Yeager told about the Spring Rally in Elizabethtown.

Program for the evening was on safety–some immediate and temporary care procedures to administer to an injured person.

The next meeting will be the family picnic on July 22 at the Mt. Wilson Church Grove, with each family to bring a hot and a cold dish.

York Co. Society 1

York County Farm Women Society 1 met on June 6 at the home of Esther Yeager.

Miss Leann Diehl visited the meeting. She is doing some history of Farm Women organizations, studying charte members and the purposes of the organization. She and a photograhper accompanying her, took some pictures of the group.

The York County Farm Women Society picnic will be held August 1, at the 4-H Center. The group's August meeting will be held August 8.

Sixteen members and four visitors attended th e meeting.

Next meeting will be held at the home of Grace Bentzel on July 4.

York Co. Society 7

A buffet dinner was enjoyed by 17 members and 21 guests when York County Farm Women Society 7 entertained Society 12 on June 13. The meeeting was held at the United Church of Christ, Starview.

Mrs. Harold Sechrist, York County president, was guest of honor.

Mr. and Mrs. John Lewis entertained the group by showing slides taken in the Holy Land.

The next meeting will be held on July 11, at 6:30 p.m., at the Starview Sportsman Picnic Grove. Each member is asked to bring a box lunch.

York Co. Society 9

York County Farm Women Society 9 will meet on July 11 at the home of hostess Gladys Fitz, York R3, beginning at 8 p.m.

Main program of the evening will be a scavenger hunt, with Mrs. Richard Anderson, Jr., and Mrs. Edwin Shue chairing the committee.

Kathryn Ehrhart, York R4, hosted the June meeting. Each member received new books of by-laws for the state Society and everyone took part in a program featuring Williamsburg Under Glass.

York Co. Society 35

Mary Lou Rohrbaugh hosted the June 14 meeting of York County Farm Women Society 35.

Members were urged to attend the county picnic on August 1, at the 4-H center in Bair. An August invitation from Society 18 of Glen Rock was announced for the group entertaining exchange program.

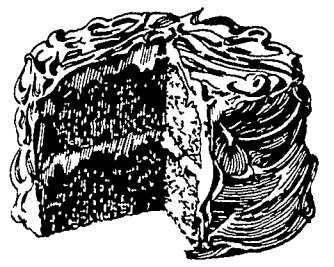
Home On The Range



More dairy recipes to please the palate

June is quickly drawing to a close but there are still plenty of good dairy recipes that will fill your kitchen with excellent eating any time of the year. Today's Home on the Range is carrying more of the recipes faithfully sent in by our readers.

Because the response was so tremendous, we weren't able to use all the recipes during the month, but they will be seen in the future for we want everyone to have the chance to put dairy products to work in their kitchen.

Don't forget to check the recipe theme calendar for July and see what recipes you can share. Send your recipes to Home on the Range, **Lancaster Farming**, Box 366 Lititz, Pa. 17543.

STRAWBERY ICE CREAM

1 quart strawberries
3¾ ounce package instant pudding mix
2 eggs
14 ounce can sweetened condensed milk
3 cups whipping cream
milk
granulated sugar

According to the individual's preference, either crush the berries or put them in the blender with a little milk (if you use the blender, use about ⅓ of the fruit for each processing). Place in a large mixing bowl. Then use 1 cup of milk, the eggs, and instant pudding in the blender–just until thoroughly mixed. Add to the berries–also stir in the sweetened condensed milk and ⅓ cup of sugar and the whipping cream. Add enough milk to about fill the mixing bowl. Then taste it and add a small amount of sugar until it is the sweetness you desire. Better to start with a low amount of sugar and add more than to have too much. Pour into a four quart ice cream freezer. If your can still isn't as full as you wish, just add more milk.

Mrs. Robert Reynolds
Paradise, Pa.

RHUBARB PIE

9 inch unbaked pie shell
2 eggs
4 tablespoons flour
1 cup milk
3 cups rhubarb
¾ cup granulated sugar
¼ teaspoon salt

Mix the sugar and flour. Add to well beaten eggs. Add the milk. Cut the rhubarb in ½ inch pieces. Fill in the pie shell, then pour the egg mixture on top. Bake at 425 Degrees F. for 20 minutes, then reduce heat to 375 Degrees F. Bake about 25 more minutes or until tested with a knife inserted in custard comes out clean. Note: If a thin custard is desired, use only two tablespoons of flour.

Mrs. James Renner
Hatfield, Pa.

DUMPLINGS

1½ cups flour
2 teaspoons baking powder
¾ teaspoon salt
3 tablespoons shortening
¾ cup milk

Measure the flour, baking powder, and salt into bowl.Cut in shortening thoroughly, until mixture looks like meal.Stir in milk. Drop by spoonfuls onto hot meat or vegetables in boiling stew. (Do not drop directly into liquid. (Cook uncovered for 10 minutes. Cover; cool about ten minutes longer or until dumplings are fluffy. Makes eight to ten dumplings.

Mrs. Ruth E. Ruoss
Blain, Pa.

HONEYSUCKLE NECTAR MILKSHAKE

¾ cup milk
1 tablespoon honey
1 tablespoon grape or orange juice
1 scoop favorite ice cream

For each serving measure ¾ cup milk and tablespoon honey and tablespoon of grape or orange juice into blender; add scoop of favorite ice cream. Blend until smooth, or beat all ingredients with a rotary beater.

Dave Eaton
Honey Grove, Pa.

BAKED CUSTARD

4 cups milk
⅔ cup granulated sugar
½ teaspoon salt
4 eggs
1 tablespoon flour
1 teaspoon vanilla
sprinkle of nutmeg

Put the above ingredients in the blender on puree and mix. Bake in a baking dish for one hour at 325 Degrees F. Set into hot water to bake. For those watching their weight, cut the sugar in half.

Mrs. Ruth Ann Bruckhart
Watsontown, Pa.

PECAN TARTS

three ounce packages of cream cheese
½ pound butter
2 cups flour

Filling

1¾ cup light brown sugar
½ teaspoon salt
2 tablespoons melted butter
1 teaspoon vanilla
2 eggs
pecans

Cream the butter and cheese, add the flour. Make 24 balls and press into small cup cake tins. To make the filling, cut the pecans into bottom of shells. Beat the eggs slightly with fork, add sugar, then melted butter, salt and vanila. Divide equally on top of pecans and bake about 30 minutes at 350 Degrees F.

Mrs. Harold Moore
Franklin, Pa.

CHEESE COOKIES

½ cup butter
¾ cup grated American cheese
¾ cup grated sharp Cheddar cheese
1 cup flour
½ teaspoon salt
¼ teaspoon paprika
pecans or walnuts

Bring the butter and cheese to room temperature. With an electric mixer, blend the butter and cheese. Sift in dry ingredients, except nuts and mix well. Shape into one inch balls and place on ungreased cookie sheets. Press pecan or walnut halves into center of each cookie. Bake at 400 Degrees F. for ten to 12 minutes. These cookies are nutritious and great for diabetics as there is no sugar in the recipe.

Linda S. Brown
Easton, Md.

CARAMEL PUDDING

1½ quarts boiling milk
1 cup molasses
1 cup brown sugar
1 cup flour
½ cup water
1 tablespoon butter
1 tablespoon vanilla
5 eggs

Beat all the above ingredients together, except the boiling milk. Stir into the boiling milk, mixing well. Remove from heat and let cool. Serve.

Sylvia S. Good
Holtwood, Pa.

PINEAPPLE AND CREAM CHEESE SALAD

1 medium sized can crushed pineapple
8 ounce cake of cream cheese
1 pint whipped cream
a good ½ cup of granulated sugar
1 envelope unflavored gelatin dissolved in ½ cup cold water

Drain pineapple, take the juice and add the ½ cup sugar. Boil until sugar is dissolved, let cool slightly, then add gelatin and cold water mixture and cool until warm Cream the cheese and pineapple and add a dash of salt Add juice to which gelatin has been added and fold in the pint of whipped cream. Mix and refrigerate at least two hours. Both maraschino cherries and nuts may be added.

Sandra Johnson
Montgomery, Pa.

PEANUT BUTTER PUDDING

6 cups milk, divided
1 cup granulated sugar
6 tablespoons cornstarch or clear-jel
½ teaspoon salt
1 cup peanut butter
2 teaspoons flavoring, peanut butter or vanilla
1 cup whipped cream
chopped peanuts

Heat five cups of milk. Combine the sugar, cornstarch and salt. Add gradually one cup of milk, then add to the hot milk. Cook and stir until thickened. Remove from heat and add one cup peanut butter and two teaspoons flavoring, peanut butter or vanilla.Chill. Place in large mixer bowl and heat until smooth. Fold in one cup whipped cream. Top with chopped peanuts.

Mrs. Eli Sauder
New Holland, Pa.

ANGEL SALAD

1 cup marshmallows
3 bananas or 1 pound of white grapes
1 cup pineapple chunks
½ cup crushed peanuts

Dressing

⅔ cup pineapple juice
1 egg
2 tablespoon granulated sugar
1 tablespoon cornstarch
½ cup whipping cream

Mix the marshmallows and fruit, add the nuts. Make a cooked dressing, ommitting whipped cream, cool. Then add whipped cream. Combine dressing with salad mixture and serve on lettuce. Serves six.

Mrs. Lester Wise
Elizabethtown, Pa.

BUTTERSCOTCH PUDDING

2 cups brown sugar
¼ pound butter
4 tablespoons cornstarch
4 tablepsoons flour
2 quarts milk
6 eggs
½ teaspoon salt
1 teaspoon vanilla

Brown the butter and sugar. While this is browning, heat the milk almost to the boiling point. Then add a little cold milk to the cornstarch, flour, salt and eggs to make a smooth paste and stir this in hot milk. Stir until it comes to boil. Then add the browned sugar mixture. Add vanilla last.

Mary Nolt
Myerstown, Pa.

LEMON LUSH

1 cup butter
1½ cup flour
½ cup chopped nuts
1 cup confectioner's sugar
8 ounces cream cheese
1 cup whipped cream
2 packages instant lemon pudding
3 cups milk
whipped cream

Mix the cup of butter, 1½ cups flour and ½ cup chopped nuts. Press into a 9 by 13 inch pan, and bake for 15 minutes at 350 Degrees F. Cool. Mix the confectioners sugar, the cream cheese, and whipped cream. Place on cooled crumb mixture. Mix the packages of lemon pudding with 3 cups of milk and beat until thick. Pour over the second mixtre. Spread with more whipped cream.

Mary Ann Kulp
Martinsburg, Pa.

(Continued from Page 96)

CAKE 'N CHEESE CAKE

8 ounce package cream cheese
⅔ cup granulated sugar
½ cup sour cream
1 teaspoon vanilla
2 unbeaten eggs
1 cup flour
1 teaspoon baking powder
½ teaspoon salt
½ cup butter
⅔ cup granulated sugar
2 eggs
1 tablespoon milk
1 teaspoon vanilla

Cream the cream cheese and ⅔ cup sugar. Add the sour cream and 1 teaspoon vanilla. Blend in the two unbeaten eggs, one at a time. Beat well. Set aside. Sift one cup flour, 1 teaspoon baking powder, and ½ teaspoon salt. Cream the ½ cup butter. Gradually add ⅔ cup sugar, creaming well. Add two eggs, one at a time, beat well after each. Stir in one tablespoon milk and one teaspoon vanilla. Add dry ingredients. Blend well. Turn into 10 inch pie pan, at least two inches deep, or a 9 by 9 inch pan, greased and floured on bottom. Spread batter over bottom and sides, spreading thinner on sides. Spoon cheese mixture over batter. Bake at 325 Degrees F. for 40 to 45 minutes. Spread with topping, bake for five minutes. Cool. Cover with clear wrapping paper. Chill at least four hours.

To make the sour cream topping, combine one cup of sour cream, 2 tablespoons granulated sugar, and one teaspoon vanilla.

Mrs. Randal Derstine
Shippensburg, Pa.

COCONUT CREAM PIE

2 cups milk
½ cup granulated sugar
4 tablespoons cornstarch
2 eggs, separated
1 tablespoon butter
½ teaspoon salt
1¼ cups shredded coconut
1 teaspoon vanilla

Scald 1½ cups milk. Combine the sugar, salt and cornstarch. Add remaining ½ cup of milk. Pour paste into hot milk and cook until thickened. Beat egg yolks. Pour small amount of hot mixture over yolks before adding them to milk. Cook about two minutes longer. Remove from heat, add butter, vanilla, and ¾ cup coconut. Cool and pour into baked shell. Cover with meringue made by adding four tablespoons of sugar to beaten egg whites. Sprinkle remaining coconut over top and bake at 350 Degrees F. until golden brown.

Mrs. Melvin Fisher
Ronks, Pa.

CREAMY RICE PUDDING

½ cup uncooked rice
1 cup water
3 cups milk
4 eggs, separated
2 teaspoons vanilla
½ teaspoon salt
¾ cup granulated sugar, divided

Cook rice in water for ten minutes, add milk and cook for 45 minutes. Beat egg yolks and add ½ cup granulated sugar and ½ teaspoon salt. Add to rice and cook for two minutes. Remove from heat, add vanilla. Beat egg whites and add ¼ cup sugar, fold into custard.

Mrs. Isaac B. Huyard
New Holland, Pa.

MACARONI AND CHEESE CASSEROLE

8 ounces thin elbow macaroni
2 tablepsoons butter
2 tablespoons flour
2 cups milk
1½ cups grated cheese
½ cup buttered bread crumbs
salt and pepper to taste

Cook thin elbows according to directions. Melt bu;tter in saucepan. Mix flour and seasoning and blend with buter. Add milk slowly. Cook and stir constantly until sauce thickens. Add one cup graed cheese, sturring until cheese melts and sauce is smooth. Drain thin elbows and combine with sauce in a greased baking dish. top with remaining cheese and bread crumbs. Bake uncovered in a moderate oven at 375 Degrees F. for 25 minutes. Serves four to six.

Mrs. Samuel C. Brubaker
Seven Valleys, Pa.

Ida's Notebook

Ida Risser

Quite a while ago, in a small discussion group, we were asked to write down a list of things for which we are thankful. I distinctly remember that they were surprised that I listed among the first, the fact that my ancestors came to American. Apparently, they felt that this was an odd statement.

But I've always felt that it must have taken a lot of courage to leave friends, relatives and neighbors and take a ship to an almost unknown land to start a new life. Almost certainly their animals and their machinery and most of their furniture was left behind. The promise of something better probably lured them on this great adventure. The fact that many were being persecuted for their religion was also a strong factor in their journey from Switzerland and Germany to America.

This 4th of July will be just another holiday for many people. It won't be thoughtfully remembered as the anniversary of the adoption of the Declaration of Independence on July 4, 1776. Hopefully it meant a lot to our ancestors who lived at that time.

So even though I may be quite busy with various jobs and maybe guests, I'm sure I'll find time to ponder the events that led to my being here at this particular spot in Lancaster County. I never cease to marvel at my quiet corner of countryside which is yet so close to busy highways. The sunlight dappled on the front lawn and sparkling on the water is always a welcome sight.

When I hear and read of revolutions, disease and starvation in other places then I am indeed thankful that I live in this great country.

On being a farm wife

—And other hazards

By JOYCE BUPP

Today's column is dedicated to that new and prospering American institution: the Shortage.

This new age of the American way of life has roots in many directions. Remember the sugar shortage? That particular crisis was especially hard on white rats, what with all the testing of cyclamates for substitute sweeteners!

Then came the great canning lid disappearance, which sent thousands of panic-stricken home canners on a lid scavenger hunt. Some kitchens, I understand, are still using up shiny lids hoarded away against the tin famine.

Pity the caffine addicts, whose soothing cup of coffee was then bombshelled by the Great Coffee Frost.

Of course, topping them all off, lest ye forget, is the greatgrandaddy of all the crunches, the Fuel Crisis. Like ripples in the pool, this shortage has spawned others, like the independent hauler shortage, the food shortage and the growing temper shortage.

But all these may become just a recurring memory when a new crisis sets in, news of which was leaked to us just recently by a reliable source. This is a commodity threat that bodes bad news for the job of every housewife in the country.

They call it: the Incredible Dirt Shortage.

Should the worst predictions on this shortfall become reality, homemakers from Maine to California may find themselves waiting in long lines at emergency dirt-and-dust supply centers, redeeming rationing coupons for their weekly supply of common ordinary household dirt.

Wall Street stock prices on the major household cleanser and laundry preparation manufacturers are expected to plunge overnight. Carwash attendants, window washing firms, dry cleaners and the Tidy Bowl man can look for massive layoffs.

One bright spot in the crisis may be the cosmetic industry, with expected heavy demand for nail polishes, as homemakers' fingernails react favorably to restricted need of hot water and harsh soaps.

Congress, the White House and the State Department will spare no efforts to locate new worldwide stocks of dirt, while allocating billions toward research to develop more domestic supplies.

And admidst clamor from the grass roots, the government itself may step in and take over the dirt industry.

But, please don't panic and start hoarding dirt.

Our farm house has start to go around for everyone.

Farm Women Societies

(Continued from Page 95)

The Christmas bazaar at the York Mall was discussed. Each member was asked to bring a list of items to make for the mall project to the August meeting.

Upon conclusion of the meeting, Mary Lou Rohrbaugh instructed the group on making macrame plant hangers.

The next meeting will be the group's picnic entertainment of Society 30 at the home of Diane Workman o July 12 at 6:30 p.m. Each member is asked to bring three potted plants.

Heinz forms family farm task force

WASHINGTON, D.C. - Senator John Heinz (R-Pa) has called for a Congressional Task Force to "save the family farm from federal farm policy."

"Federal farm policy has been the major cause of the demise of millions of family farms, and this trend must be stopped," Heinz said.

"Over the past 40 years, the number of farms has declined from 6.8 to 2.7 million."

"As this trend toward increased concentration grows, the opportunity for people to make their living from the land declines. As farms disappear, communities that rely on them suffer economic and civic deterioration. Yet all this happens despite the fact that the family farm is still the most efficient unit of production and we have a federal farm policy.

"The task force I am forming will work on specific legislative proposals to reform federal policies. We will focus particularly on the 1981 Farm Act," said Heinz, noting that 28 of his colleagues in the House and Senate have already joined the family farm task force.

As a member of the Senate Finance and Banking Committies, Heinz said the goals of the task force would be:

* Reform federal tax laws so that all farmers have the same tax opportunities – so that investment by farmers in their own land and equipment is treated equally with investment by non-farming interests.

* Assure that there are appropriate credit programs to assist entering family farmers to get started in farming.

* Provide more effective incentives for farmland preservation and conservation.

"I hope to call the first meeting of this task force in the next thirty days. The family farmer, so important to America, has waited long enough to be given a fair shake." Heinz said.

Senator John Heinz

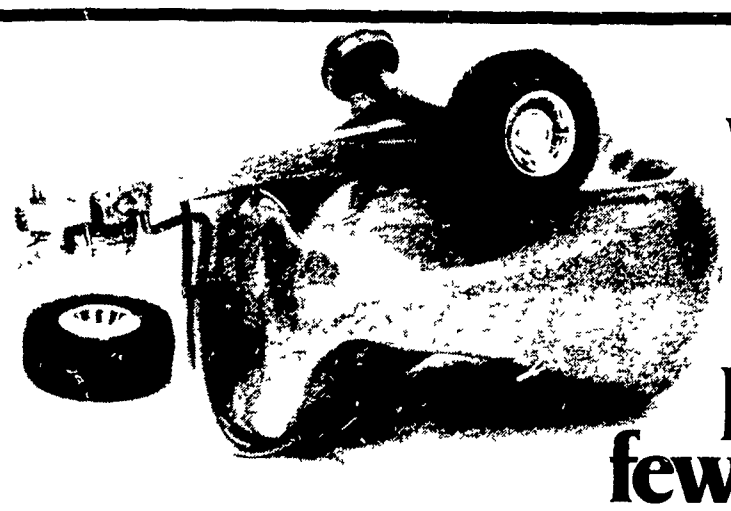
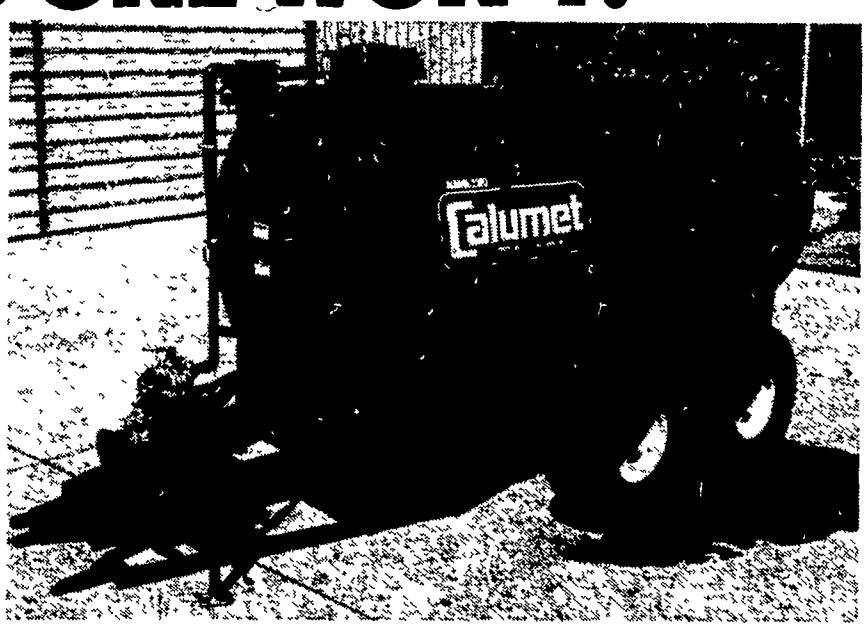
After using part of the ice cream from a carton, press pliable plastic wrap over the top portion before closing and replacing in the freezer. This prevents ice crystals from forming.



Will your vacuum tank roll over and play dead in a few years?

THIS ONE WON'T.



Calumet wants you to own a vacuum tank that performs year after year. Why? Because in handling your liquid manure you can't afford anything less. You'll find features all over our vacuum tanks that guarantee years of solid service.

Features like A) A choice of two rugged vacuum pumps that load faster, stay cooler and run longer than anything else made. B) A positive moisture protection system that separates air from liquid like a cyclone to insure a clean running pump. C) Heavy-duty alloy steel tanks with epoxy coated interior and full length support skids for exceptional life. D) Clean, easy filling through a non-leak 6" loading valve. E) Sizes to fit your needs — 1,180 to new 4,500 gallons. F) Nutrient saving 2 or 4 - shank soil injection equipment stops odor and run-off problems.

Our business is building liquid manure equipment - nothing else. We stand behind every unit with a 12-month warranty and instant service.

4-WD trucks go all the way at The Buck

THE BUCK — Four-wheel drive trucks were hard to stop at the Buck Tractor Pulls last week. All of the entries in each of the two clases pulled the sled the full distance of the track.

The best performance in the 6500 pound truck class was turned in by Diehl Wilson of Winchester, Va. Driving a 1971 Ford, he conquered the 300-foot runway with a full pull and then went 268 feet, five inches on his second try. The sled weights were moved up faster that time. Placing second in the class was Randy Raso of Watertown, N.Y. who traveled 266 feet, three inches on his second attempt. He drove a 1977 Chevy. Third place went to John Adams and his 1975 Ford. The Centerville, Md. puller was good for 239 feet, four inches.

In the 5500 pound truck class, Raso bested the competition with two successive full pulls. Wilson trailed in second place with a 299-2 effort in the pull-offs. Third was Ron Kauffman of Holtwood with a 288-1 effort on his second bid. Kauffman commanded a 1977 Chevy.

In other action at last week's pulls, the Stauffers of New Holland shut out the competition in the 7000 pound super stock class. First in line, with a pull of 278-1 was Tony who drives a Deutz 9006. Tim placed second with a 254-8 effort from his Deutz 8006, and Amos was third at 242-9. He also drove a Deutz 8006.

In the 7000 pound modified class, John Shaul of Fultonham, N.Y. blasted off to victory with his Allison-powered machine. His winning pull was measured at 276-1. Twenty feet behind him was Robert Hughes f New Windsor, Md. aboard an International 1086. Third place was taken by Willard Will of Central City aboard an Allison that scratched dirt for 243-5.

Harry Griest of Coatesville edged James Weaver of Staunton, Va. in the 9000 pound super stock class. Their respective distances were 277-11 and 273-3. Both were driving an Internationa 1456. Tony Stauffer placed third in that class with a 258-3 effort.

The spectators were treated to another full pull when a modified tractor with a 427 Chevy engine took the sled the entire distance of the track in the 9000 pound modified class. Tasting the fruits of victory was Glenn Darnell of McDowell, Va. The runner-up and third place spots were won by John Shaul of Fultonham, N.Y. He drove a Cockshutt equipped with two Chevy engines for second place, and had an Allison for the thrird spot. His respective pulls were 268-9 and 268-0.

Suspense was high in the 12,000 pound class where Robert Hughes recorded a full pull with his IH 1086 to win the class. Vern Over of Sligo and Tom Middleton of Ridgely, Md. came up with identical measurements (298-9) with their runs for glory. That called for a pull-off. Sligo and his IH 856 came out on top with a 292-3 effort. Middleton and his IH 1066 were good for a distance of 275-10.

The victory colors were changed in the 5000 pound super stock class when Jim Brubaker of Quarryville drove his Allis-Chalmers 180 to a first-place finish. His machine stopped scratching for paydirt at 277-2. Another orange machine, A-C-180, owned and driven by Dale Smoker of Quarryville placed second with a pull of 271-4. Third was Coleman Wheatley from Bethel, Del. who drove a John Deere 4010 for 210-4.

In the 5000 pound modified class, Stan Graver of Pequea proved to the crowd that he had his engine tuned to precision and his driving skills mastered. His 427 Chevy-powered machine screamed to victory at 289-11. Gary Mills of Fallston was stopped at 273-6 aboard his 427 Chevy-powered machine and David Greek of Delta was third at 268-5. He drove a 460-Ford powered tractor.

The final event of the evening was the 12,000 pound unlimited class. The winning distance was churned out by John Shaul's Allison-powered monster. It stopped at 276-1, exactly 20 feet ahead of runner-up Robert Hughes who piloted an IH 1086. Third place went to Willard Wills and his Allison from Central City. The distance was 243-5.

Last week's pulling exhibition was billed as the Penn Springnationals. There will be more action today and every Saturday evening throughout the Summer. The track is located 10 miles south of Lancaster along Route 272.

Ladies Have You Heard?

By Doris Thomas

Lancaster Home Economist

STRETCH YOUR MEAT DOLLAR

Nutritionally, what better sandwich or snack can you offer your family this summer than protein and iron-rich sandwiches made from ground meats?

Here's a way to extend meat, to reduce cost per serving, yet provide flavorful, hearty meals: mix shredded potatoes and onions in ground meat.

Supplies of potatoes and onions are unusually heavy right now. If you'd like to take advantage of the reduced prices for these two items, scan the recipes below, or make up your own.

All you really need to do is grate raw potatoes and add them with spices to your meat mixture. Or you can substitute instant mashed potatoes as you would bread crumbs. Onions in the right combination, diced or minced, flavor any dish.

Hot and hearty Swedish Meat Balls, partnered with an assortment of cheeses, toasted rye rounds of crusty garlic bread and a tray of crisp relishes, will make a tasty treat for all.

Swedish Meat Balls

1 cup prepared instant mashed potatoes
1 egg
1/4 teaspoon nutmeg
1/8 teaspoon ginger
Butter or margarine
1 pound ground beef
1/2 ground pork
2 tablespoons minced onions
1 teaspoon salt
1/8 teaspoon allspice
1/4 tsp. pepper

Prepare 1 cup (2 servings) instant mashed potatoes as directed on package. Combine all ingredients except butter; mix thoroughly. Form into tiny balls, using about 1 level tablespoon of mixture per ball. Melt butter in fry pan; add meat balls. Brown over low heat, shaking pan occasionally to brown evenly. Yield: 48 meatballs.

Tomato Cheeseburgers

1 lb. ground beef
1/4 cup instant potatoes, or 1/2 cup raw, shredded potatoes
6 Hamburger buns.
3/4 cup cooked or canned tomatoes
3 tablespoons chopped onion
1 teaspoon salt
3-6 1-ounce slices sharp-cheddar cheese

Preheat oven to 400 degrees F. Mix ground beef, tomatoes, potatoes, onion and salt. Shape into six patties flattened to the size of the buns. Bake 10 minutes. Open hamburger buns; arrange on a baking sheet. Place a meat patty on one half of each bun. Top with a whole or half slice of cheese, as desired. Bake 5 minutes longer. Serve immediately.

HANGING ON TO ENERGY

With the increasing cost of energy, may I suggest you check for ways to conserve it in the kitchen and laundry.

On hot Summer days, operate the stove fan or kitchen exhaust fan when you generate excessive steam or heat during cooking. This saves on air conditioning or preserves natural cooling. Also, cover the cooking containers whenever practical. This cuts down on the amount of heat that you need to cook, and also the amount of steam given off.

If you're cooking vegetables, cover the pan to help prevent the escape of steam so you can cook quickly with a small amount of water. This conserves such nutrients as Vitamin C, the B vitamins and some minerals. Use containers that just fit the heating element. A small container on a large element allows much of the heat to go directly into the kitchen instead of into the pan.

Avoid unnecessary use of hot water. Leaking faucets can waste considerable amounts of water and the energy to heat it. A dishwasher uses twelve to sixteen gallons of hot water per cycle. So, run it only with a full load. And, a hot water rinse for laundry uses about one and half times as much hot water as a cold water rinse.

FWS Calendar

Tuesday, June 30

Lancaster Co. Society 5 meeting at Bird-In-Hand Restaurant.

Tuesday, July 3

Need a farm loan? Bob Badger is the friend to see!

There are no two ways about it: everybody feels more comfortable borrowing from a friend. That's why so many area farmers take their needs to Bob Badger — head of the Agricultural Loan Division of the First National Bank of Strasburg.

Bob is a true friend to farmers. An area native, he grew up among them — and still lives among them today, in southern Lancaster County. He's vitally interested in helping them solve their complex money problems. He's always ready to provide experienced, financial counsel. And he's more than happy to use the Friendly First's *flexible payment schedules* to tailor each loan to the farmer's specific requirements.

So whatever your needs may be — operating capital, livestock, machinery, construction, farm mortgages or estate planning — make it a point to talk with Bob Badger. Because when it comes to a farm loan, he's the best friend you could ask for!

THE AGRICULTURAL LOAN DIVISION OF

The Friendly First

THE FIRST NATIONAL BANK OF STRASBURG

MEMBER F D I C

No kidding, here are some goat recipes

When you talk about dairy recipes, you can't forget the dairy goat. The following recipes have been provided by the newly formed Lancaster County Dairy Goat Club, whose members at a recent meeting shared recipes and samples of their cooking.

Anyone who is interested in obtaining more information about the dairy goat club, can contact Mrs. Pat Kauffman, Pequea, phone 717-284-4340.

CORNMEAL CAKE

1 egg
1¼ cup goat's milk
¼ cup flour
1¼ cup corn meal
2 tablespoons granulated sugar
3 teaspoons baking powder
3 tablespoons vegetable oil

Stir all with a fork. Bake at 450 Degrees F. in greased 9 by 9 inch pan for 15 minutes.

Janet Witmer
Willow Street, Pa.

EGG CHEESE

2 quarts sweet milk
1 pint milk soured with 1 teaspoon vinegar
1 teaspoon salt
4 eggs

Bring sweet milk to boil. Beat eggs lightly. Add soured milk and salt. Beat slightly again. Pour slowly into hot milk, cover with a lid and let stand several minutes. Stir slowly until it separates. Remove cheese from whey with a colander or strainer. When set, serve with syrup.

Mrs. Jacob Fisher
Manheim, Pa.

SOUR CREAM COOKIES

2 cups granulated sugar
¾ cup butter
3 eggs
1 teaspoon cream of tartar
1 cup sour cream (from goat milk)
1 teaspoon baking soda
4 to 5 cups flour
1 teaspoon vanilla

Mix the above ingredients. Drop by teaspoonfulls onto cookie sheet and bake at 350 Degrees F. until done.

Mrs. Ivan W. Stauffer
Ephrata, Pa.

LIME LEMON SHERBERT

1 package lime gelatin
1½ cups granulated sugar
1 cup hot water
3 tablespoons lemon juice
1 quart goat milk

Add hot water to gelatin. Cool slightly; then add sugar, lemon juice and goat milk. Pour into freezing trays and stir once while freezing.

Mrs. Palmer Burke
York, Pa.

FANTASTIC FUDGE

2 cups granulated sugar
⅔ cup goat's milk
⅓ cup cocoa
2 teaspoons vanilla
4 tablespoons butter
½ cup peanut butter
1 cup confectioner's sugar

Combine the first three ingredients in pan. Stir over medium heat to the soft ball stage. Remove from heat and add the remaining ingredients but don't stir. When you can put your hand on the pan, beat until the fudge loses its gloss. Pour into pan and allow to cool.

Pat Kauffman
Pequea, Pa.

COCONUT CUSTARD PIE

1 cup granulated sugar
¼ cup butter or margarine
4 eggs
½ cup self-rising flour
or regular flour with ½ teaspoon baking soda
2 cups goat milk
handful of coconut or to taste

Cream together the sugar and butter. Add the eggs, flour, and milk. Mix well. Pour into a 10 inch pie pan and sprinkle top with coconut. Bake at 350 Degrees F. for 40 minutes. Serves six to eight. Any leftover filling can be baked in custard cups sat in a pan of water.

Dolly Peirer
Herndon, Pa.

SCALLOPED POTATOES

6 cups raw potatoes sliced thin
4 tablespoons flour
2½ teaspoons salt
1/8 teaspoon pepper
1 onion, minced
2½ cups hot goats milk
2 tablespoons goat butter

Place a layer of potatoes in a buttered baking dish. Add minced onion. Sprinkle with salt, pepper, and flour, and dot with butter. Repeat until all ingredients are used. Pour hot milk over potatoes and bake at 350 Degrees F. for 1 to 1¼ hours. Serves six.

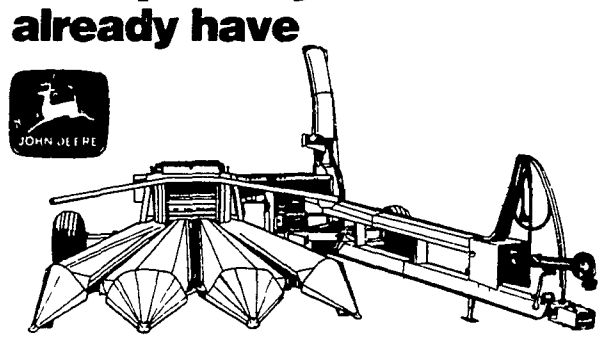
The new Powr-Mizer™ Forage Harvesters — the capacity you've wanted with the horsepower you already have



Squeeze extra work out of your tractor with the power-stingy 3940 and 3960 Forage Harvesters. Power-efficient features start with the 36- or 48-knife Dura-Drum™ cutterheads. These extra knives shear your crop into a fine-cut, uniform forage. And you can keep the knives cutting at peak performance with the new quick-adjust shear bar Easy-access design lets you save your back and your temper since there's no stooping and no shields to remove. It only takes a wrench and less then 2 minutes to get an accurate adjustment.

Power efficiency continues with a special 2-speed blower One speed lets you power through tough crops, like haylage, while the lower setting conserves energy on lighter crops.

Come by and see all the Powr-Mizer features on the new 3940 and 3960 Forage Harvesters.

110-hp 4240

Smooth, dynamic power and plenty of it

A genuine John Deere 6-cylinder diesel engine powers the 4240. It's a 466-cu.-in. naturally aspirated smoothie that pumps out 110 horsepower all day long without pause But that's just one reason you're going to like this talented performer. Because hand-in-glove with the smooth power is the convenience of 16-speed Quad-Range™ transmission with built-in Hi-Lo It delivers no-stop shift-on-the-go convenience and it's standard equipment. See us for more details.

Shred stalks into bits and pieces

Stop in and inspect our John Deere 27 Flail Shredder. We'll show you the rugged knives (2½ inches wide, 5/16-inch thick) that are thicker and heavier than those on most shredders And you can choose tungsten-carbide edges to give extra-long life. Unique quadruple seals keep dirt out of the rotor bearings. And there's more — let us show you the 27 soon.

Area FFA'ers attend Washington conference

WASHINGTON, D.C. – Dozens of FFA'ers from Pennsylvania attended the National FFA Leadership Conference here this month. Among them were those pictured, above. Left to right are Glenn Herrold, advisor from the Blue Mountain FFA Chapter, Waynesburg, with students Ken Reed and Gerald Reichard; Daniel Seaman and Marilyn Deaven from the Northern Lebanon FFA Chapter, and Ron Copenhaver and Dawn Shirk from Cedar Crest High School. Greeting them al: was Jeff Rudd of Yanceyville, N.C., national vice president of the Future Farmers of America.

The week-long Washington Conference was held at the Olde Colony Motor Lodge and the National FFA Center near the nation's captial.

The FFA Conference program is designed to improve leadership skills, develop an understanding of the national heritage, and prepare FFA members for more effective leadership roles in their chapter and community. The Conference is also a forum for the exchange of FFA Chapter activity ideas among members from across the nation.

Besides the training sessions, the 1979 program includes visits to Mt. Veron Plantation, the National Archives, Smithsonian Institution, Arlington National Cemetery, and several other historic monuments and memorials in and around the Capital.

A highlight of the conference was a visit to the office of the students' respective congressmen. Participants also attended a Capitol Hill meal featuring a question and answer period with congressmen, and Washington leaders in business and industry.

Pennsylvania Angus Week Proclaimed

Pennsylvania Governor Dick Thornburgh has proclaimed June 24 to 30 as Pennsylvania Angus Week to commemorate the Eastern Regional Junior Angus Heifer Show to be held at York on June 29 and 30. In his proclamation the Governor lauded the Pennsylvania Angus Association, its members and the Angus breed for having "contributed significantly to the agricultural economy of the Commonwealth of Pennsylvania." Seated left to right are Ann Holcombe, Mohrville, Pennsylvania Junior Angus Association secretary; Sara Fretz, Greenville, Pennsylvania Angus Queen; Governor Richard Thornburgh; (standing) Reno H. Thomas, Majority Chairman of House Agriculture and Rural Affairs Committee, Beavertown; Dale Rains, Mercer, president Pennsylvania Junior Angus Assn.; and Jack Gray, Legislative Assistant to Rep. Thomas.

Cattleman's field day July 7

UNIVERSITY PARK - The fifth annual Cattleman's Summer Field Day will be held July 7, at the Beef-Sheep Center at Penn State.

According to Dr. Lowell L. Wilson, Penn State professor of animal science, registration and program activities will start at 9:30 a.m.

Included among the tour stops and discussions will be: estrus synchronization, ova transplant, comparisons of new forage plants, low-labor wintering systems for the cow herd, maximum use of corn silage in growing-finishing rations, fly control systems, corral and cattle handling systems, and beef promotion and education programs.

"Producers attending the field day may start on the tours at several different times, and the program will be informal," Dr. Wilson points out. "A special beef bar-be-que will be available at noon."

Additional information can be obtained from Dr. L. A. Burdette, Extension animal scientist, who is serving as the Cattlemen's Field Day Chairman. His address is 324 Animal Industries Building, University Park, Pa. 16802.

The Summer Cattlemen's Field Day is sponsored by the Pennsylvania State University's College of Agriculture, and the Pennsylvania Grassland Council.

We salute you DAIRYMEN

This is an architect's sketch of what the Waverly dairy plant will look like when fully completed. It is to be the largest mozzarella cheese plant in the United States. Eastern Milk Producers Cooperative has a 20-year contract to provide the milk for it.

Eastern smiles when it says 'cheese'

By DIETER KRIEG

SYRACUSE, N.Y. — The chaos and complexity of milk marketing in 1977-78 still has some dairy cooperatives licking their wounds. Eastern Cooperative Milk Producers, headquartered here, is among them.

They've been knocked about by burdensome surpluses, handlers' bankruptcies, closed doors, bad debts, insufficient operating funds, and internal turmoil. The list could go on. What's more, their problems are far from over. The management admits that, but they're also hopeful for improvement.

Some knowledgeable observers of the industry doubt that Eastern can overcome its problems. But don't tell that to the top brass of the 4500-member dairy farmers' organization. While admitting that they've suffered some stunning blows, and that a lack of foresight on their part was responsible for some of their defeats, the official bottom line from Syracuse is of a positive nature.

Much, if not all of the official optimism displayed by Eastern's management can be traced down to one word: "mozzarella".

Mozzarella is an Italian cheese manufactured on a huge scale by the Leprino Cheese Company. Eastern is under contract with Leprino to supply milk to the cheese industry giant for a 20-year period. The dairy cooperative's management, directors, and a majority of the remaining membership look at this association as a means to not only solve problems, but to also provide a bright future.

The idea has sparked considerable controversy and misunderstanding. The issue itself, and subsequent reports about the deal in some trade journals have contributed to a substantial reduction in membership. Eastern's director of member and public relations, Lisle Dutton, says the membership now stands at 4500. By comparison, the cooperatrive's news releases of a year ago claimed a roster of 7000 members.

According to Eastern's president, Arden Tewksbury, a dairy farmer from Meshoppen, Wyoming County, Pa., the depleted membership leaves the cooperative with a dedicated, solid core from which positive support can be expected.

Tewksbury, among others at Eastern's headquarters, acknowledges the sharp criticism that has been directed towards the wounded cooperative. He says he is

(Turn to Page 107)

YOU'VE HEARD THE TALK.

There's a better way to dry grain. It's called CHILLCURING™ because it means CURING without heat. Here's what the talk is all about.

THE GRAIN

Every kernel of grain is alive when it comes out of the field. It is a seed, able to grow because it has the ability to take on moisture Likewise, it can be kept in a state of preservation by removing the moisture already in it.

But by heating the grain to dry it, the seed life is destroyed.

By *removing* heat and moisture from the grain, it becomes dormant, and stays alive. Then it can ripen to full weight, losing only water while keeping valuable protein, starches and sugar

THE SYSTEM

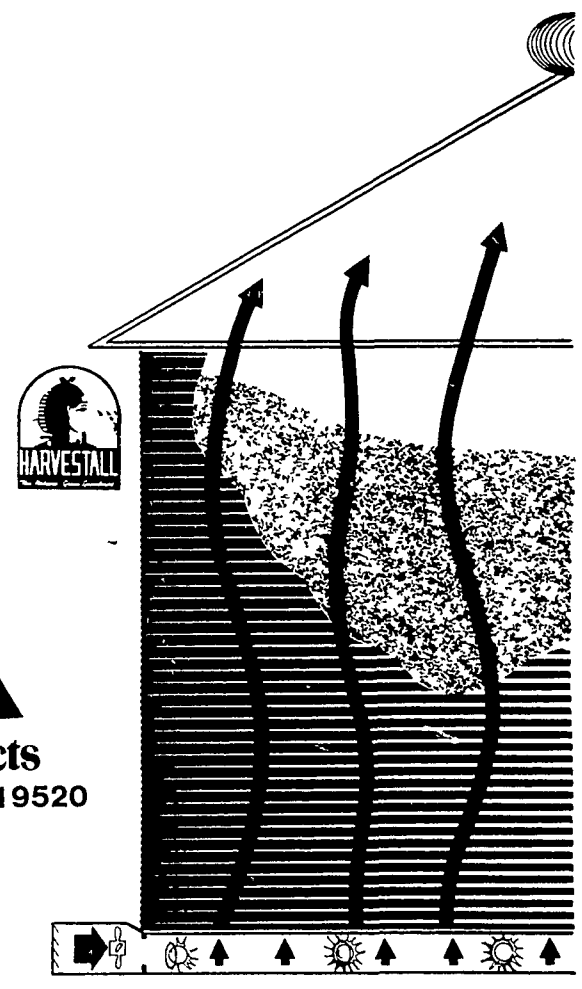
It's simple Grain goes from the field right to the bin With the unique AIRFRAME™ and AIRFLOOR™ the grain rests on a solid bed that allows maximum ventilation

Clean dry air is the best curing medium for the grain GRAINLAMPS™ provide electric sunshine, cleaning and drying the air beneath the floor, before it passes through the grain

Fans force air under the floor Rising through the grain, this dry outside air carries away moisture and heat

At the peak of the bin a jumbo 40" turbine, the WHIRLCOOLER™, puts nature to work for you. Wind and rising air keeps it turning, venting the system naturally

A special HARVESTAT™ Control System monitors the curing process. A simple setting controls the GRAINLAMPS™ to make use of free, natural air.



Advanced Ag Products
RD 2 Box 174 Elverson, Pa. 19520
215-286-9118

THE FACTS

1. You can't beat Nature. HARVESTALL GRAIN CHILLCURING™ uses the same elements that ripen and preserve grain if left to itself: free flowing air and infra red rays (sunshine)

2. CHILLCURING™ has been tried and proven in 17 states on over 3000 farms. The research is in: CHILLCURING™ WORKS!

3. The CHILLCURING™ system uses only the electricity to power fans and lights, using about 1½ KW hrs. per bushel. Compare that cost to other systems that use increasingly expensive fuels to get disappointing results.

4. The grain goes from the field to the bin and stays there till you need it. Save time and money at harvest with the one step HARVESTALL CHILLCURING™ and storage system.

5. If you're in the market for grain storage, you owe it to yourself to look further into HARVESTALL GRAIN CHILLCURING™

Young Farmer picnic is next weekend

SCHUYLKILL HAVEN — The Pennsylvania Young Farmers Association will hold its annual Summer conference, banquet, picnic and tour in Schulkill County next weekend. The registration desk will open in the lobby of Blue Mountain High School on July 6 at 10 a.m. A banquet will take place that evening at 7 p.m. in the Haag Hotel, Shartlesville. The menu features two meats served family style. The cost is $7.50 per person. Entertainment includes music, singing, farmers' bingo, and square dancing.

The Blue Mountain Young Farmers Association, which hosts the 2-day gathering, will have an executive committee meeting on Friday morning, July 6. They will meet at Blue Mountain High School at 9:30. A tour gets underway that afternoon, with buses leaving between 12:10 and 12:30 o'clock. Stops will include the B & M Feed Mill, Bonnie's Ceramics, and the L & L Pheasantry.

On Saturday, July 7, buses will leave the high school at 8:30 a.m. for a tour of several more agricultural enterprises. Following is a list of the scheduled stops.

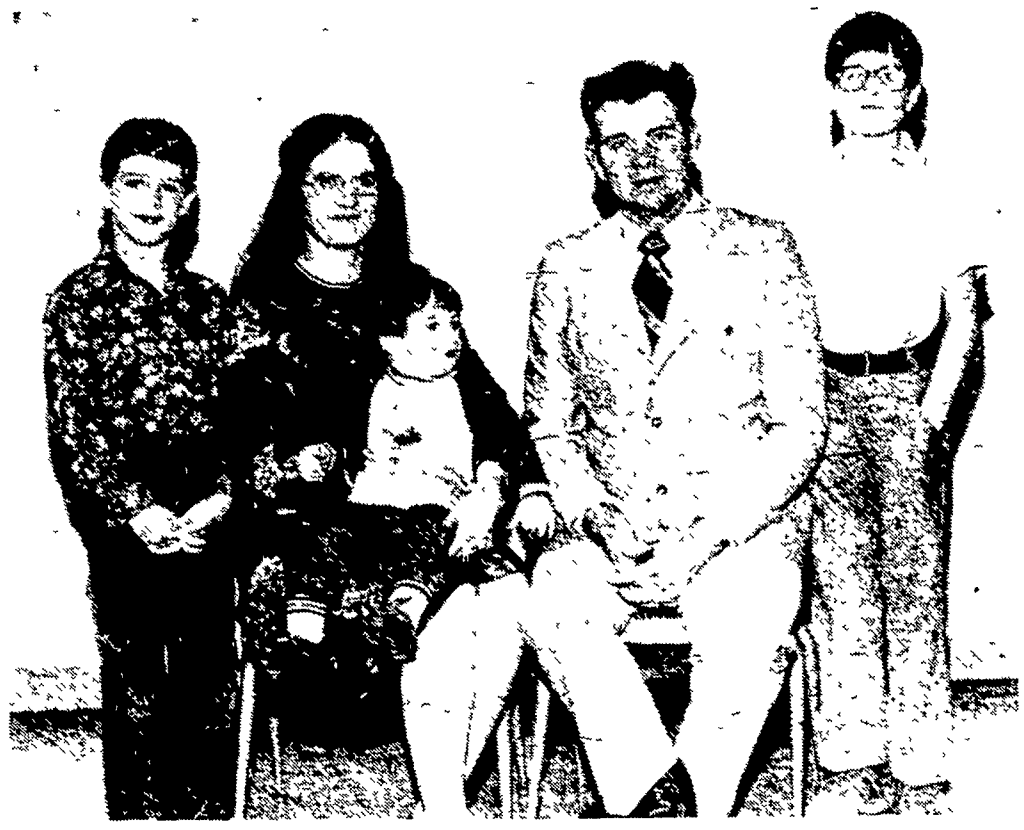
Bruce Leatherman dairy farm and grain drying and storage facilities.

Charles Felty swine operation, featuring a windowless farrowing house with waste disposal system.

Lowell Koch's turkey farm, hatchery, dressing plant, and retail store.

Robert Heim's fruit, vegetable, egg production units. He also has a roadside market.

Marlin Koch Christmas tree farm.



The Bruce Leatherman family of Tamaqua will be one of several hosts on a tour for Pennsylvania Young Farmers next weekend. Left to right are Brent, Helen, Timothy, Bruce and Neil. The Leathermans have one of the top producing dairy herds in Schuylkill County.

The picnic will take place at 1 p.m. in the Red Church grove. A chicken barbecue platter will be served at a cost of $4.50 per person. At 2 p.m. the champion volleyball teams from each region will compete for the state championship.

The Yazoo Rider

The Yazoo Rider is already well known to commercial cutters They bought twice as many of them this year as they did the year before

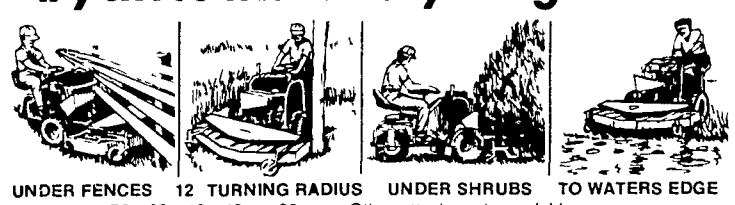
It s a completely industrial standard machine Yet it costs about half as much as the tractors they ve been using with their belly slung blades and huge unwieldy gearcases

Why are we telling residential owners about it?

Because the Yazoo Rider actually costs less than well known homeowner brands of belly-slung tractor mowers

In residential use it should last a lifetime

Try these with a belly-slung mower



UNDER FENCES 12 TURNING RADIUS UNDER SHRUBS TO WATERS EDGE
Comes with 76 60 48 42 or 36 cut Other attachments available

Figure it out. You can expect the average mower to last 3 to 4 years. That's the official industry figure. But the life expectancy of a Yazoo Big Wheel Mower is over 10 years. **That includes the commercial users who work their Yazoo mowers 8 hours a day.**

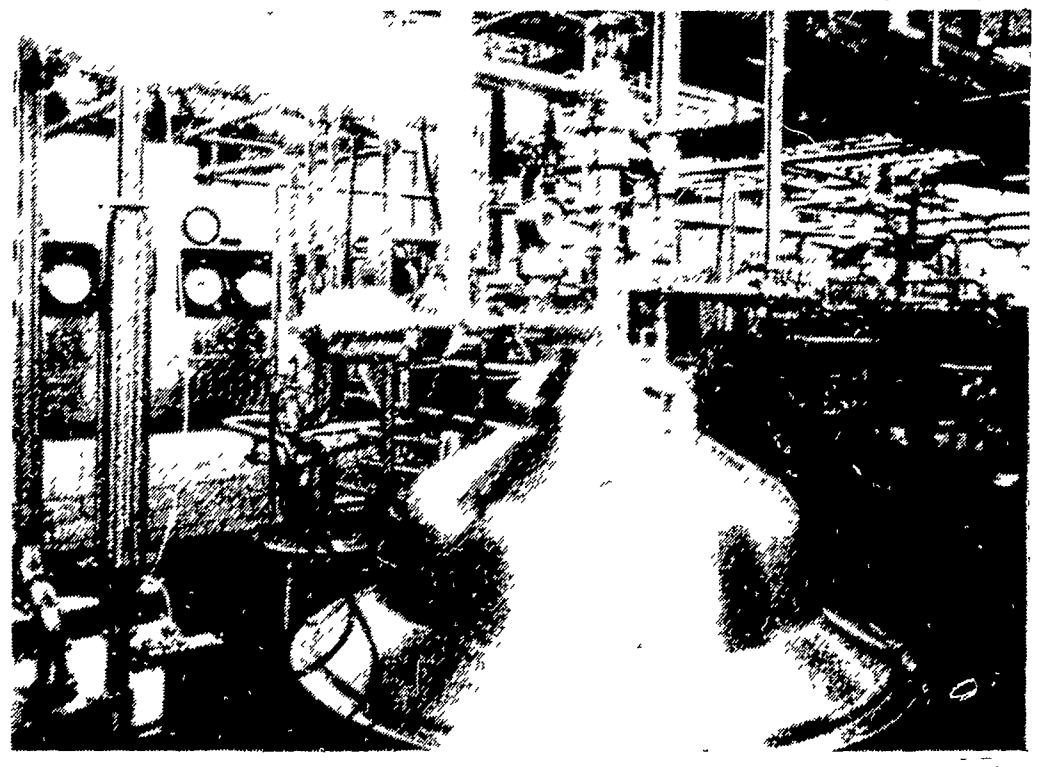
Many homeowners are still using Yazoos they bought fifteen and twenty years ago.

Try one on your home turf. 3½ to 7 HP; 20" to 26" cut. It's the cheapest way to cut grass. Come in today. Or you call, we'll haul—to your place.

WE STOCK ALL MODELS.....
Come in for a Demonstration

YOU HAVE GRASS TO CUT..... WE HAVE THE MOWER

★ MOW IN ½ THE TIME AND SAVE GAS!



New equipment has been installed and is in operation at Eastern's Waverly and Horse Heads dairy plants.

Eastern

(Continued from Page 105)

willing to accept that, but labels some of the accusations as being grossly unfair.

In his report to the delegates at the annual meeting on June 6, Tewksbury assessed the overall situation at Eastern as "the most trying time during its existence."

The cooperative president also said:

"Since December of 1976 this cooperative has gone through enough turmoil to last for a life time. This turmoil surfaced as a result of the most chaotic marketing conditions the dairy industry has ever seen.

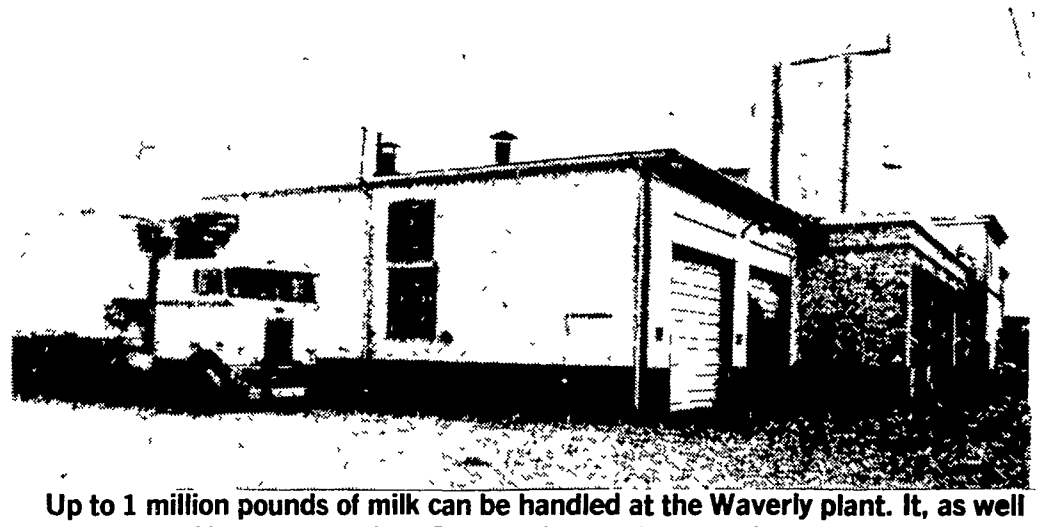
"Eastern was not sufficiently ready for the marketing conditions that developed in 1976-77-78, but you know we were not alone," the dairy chieftain continued in his address to the delegates. "In my opinion the management and department heads of Eastern Milk Producers have done a yeoman job in marketing our members' milk during the last three years. And you know it's been done under the most adverse and unresponsible publicity an organization has ever had to endure," Tewksbury claimed.

"And yet Eastern did not give up," he annouced triumphantly.

With the hectic marketing conditions now history, Eastern is preparing for more stability in the future. The management smiles when the word cheese comes up, and they're eager to have members, reporters, and other visitors take a look at what's going on in the cheese making business at Waverly and Horse Heads, N.Y. Those two towns are bases of operations for Leprino Foods and Eastern Cooperative Milk Producers.

The affiliation between the two in-

(Turn to Page 112)



Up to 1 million pounds of milk can be handled at the Waverly plant. It, as well as the Horse Heads plant gives Eastern hopes that members will never again seriously feel the effects of surplus production.

Cynthia Shirey named SUN Dairy Princess

By JOAN LIESAU

SELINSGROVE — Cynthia L. Shirey, daughter of Mr. and Mrs. John S. Shirey, has been named the 1979-1980 SUN Area Dairy Princess in recent competition held here. Crowning the new princess was Renee Shaffer, 1978 SUN Area Dairy Princess.

Participating in the contest were nine young women from Snyder, Union, Northumberland and Montour Counties.

Cynthia is presently studying dairy production and agricultural education at the Pennsylvania State University. She comes from a 70 cow Holstein dairy farm in Beavertown R1.

The new dairy princess has been named the distinguished junior member of the Pennyslvania Holstein Association and has been very active in the Holstein Association's activities. She participated on the Penn State dairy judging team, American Dairy Science Association as a student affiliate, and is a member of the National FFA and PSU Collegiate FFA.

Cynthia was the SUN Area Alternate Dairy Princess in 1975 and 1976. She was also the Beavertown Bicentennial Queen, the 1976 SUNMC Area FFA Princess and in 1976, Cynthia was a state finalist in the Pennsylvania Miss National Teen-Ager Pageant.

Patricia L. LeVan, the 20 year old daughter of Mr. and Mrs. Clifford A. LeVan was selected as the SUN Area Alternate Dairy Princess.

Patricia hails from a 41 cow Holstein operation in Milton. She is a biology major at Lycoming College with her main interest in veterinary medicine.

Renee Shaffer (left) crowns the new SUN Area Dairy Princess Cynthia Shirey.

Among her many accomplishments and activities, Patricia was on the Lycoming College Dean's list, student faculty committee, varsity basket ball team, pre-health professions club and biology advisory committee. She is a member of the Pennsylvania and National Holstein Association, and is serving as a National Regional Coordinator. Last year, Patricia also served as the SUN Area Alternate Dairy Princess.

Four top finalists, including Cynthia and Patricia were chosen. Tina Epler, daughter of Mr. and Mrs. John Epler of Northumberland County, and Kay Wallace, daughter of Mr. and Mrs. Ronald Wallace, Northumberland County were selected.

Fay A. Walter, daughter of Mr. and Mrs. John R. Walter, Union County was chosen by the contestants as Miss Congeniality.

Other contestants who participated in the interviews and fashion show include: Beth Ann Bieber, daughter of Mr. and Mrs. Donald Bieber, Northumberland County; Shari Foresman, daughter of Mr. and Mrs. David Foresman, Union County; Elizabeth Molano, daughter of Mr. and Mrs. Donald Molano, Northumberland County; and Polly Jane Thomas, daughter of Mr. and Mrs. John R. Thomas, Snyder County.

Keith Martin served as master of cerimonies.

The crowning of the dairy princess was the culmination of the day long promotional activities at the Susquehanna Valley Mall. Approximately 200 gallons of milk were given out, 2000 majic cows, and 40 pounds of cheese, cubed into 3000 pieces. Cows and calves as well as goats were on display in the Mall. Exhibits by 4-H, FFA, Extension and dairy clubs were also featured.

Boscov's department store provided the setting for the princess judging and fashion show.

Home canning advice given

WEST CHESTER - Anyone with relatives–and that includes most of us–knows they are ready and willing to pass along their knowledge on a vast array of topics to younger family members.

In the case of home canning, reading recent home canning research findings is not normally a favorite pastime of family advice givers, so beware of their knowledge. It may lead to seal failures and spoilage of home canned foods, according to Penn State Extension specialists.

For example, a canning method passed on from one generation to another is open kettle canning. When you can hot acids foods, such as tomatoes, with this method, tomatoes are poured into hot sterilized jars and the lid is placed immediately on the jar. Jars are then inverted for a short time. This procedure doesn't sound too difficult and it isn't, but according to Dr. Gerald Kuhn, professor of food science Extension at The Pennsylvania State University, using such a method can result in seal failures and spoilage.

So how do you can these products safely? Use the boiling water canning method. Hot acid foods, like tomatoes, are poured into the jars. Jars are processed in boiling water. That means having water 1 to 2 inches over the tops of the jars in a properly designed canner and boiling for a specified time period. Jars are then air cooled in an upright position.

Dr. Kuhn has recent research data to show that mastering the practice of boiling water canning minimizes seal failures and eliminates spoilage.

To avoid spoilage problems with tomatoes, there is another important practice. Select firm but ripe tomatoes, free of disease. Wash them until they are free from all soil. Soil contains spoilage organisms that have to be killed by processing, so the fewer organisms the better.

For up-to-date canning information, contact your Extension office.

Lisa Miller is Pennsylvania's dairy princess

By KENDACE BORRY

MOUNT JOY — Lisa Miller, Pennsylvania's bright and pretty dairy princess, who is visiting in the eastern portion of the state this week, never misses a moment to promote the industry that she represents.

"I try to stress that everyone needs milk," she noted, sitting down long enough for an interview. "It's a source of nutrition that everybody can use."

A native from Washington County, the 18-year-old daughter of Mr. and Mrs. James W. Miller, has always lived on a dairy farm. She told that her family, which consists of herself, her parents, and her two brothers and two sisters, milk 40 cows, owning about 115 animals in all.

Lisa personally owns two heifers, and stated that just recently she sold her cow.

A 1979 graduate of Trinity High School, Lisa told that she entered her county's dairy princess pagaent beacause it was something that she always knew she would do.

"My older sister had won the county princess title before," she admitted, "and I just figured it would be fun for me to enter."

But she labelled her emotion as "disbelief" when she found that she had won the local contest. It was something that she just thought would never happen.

Then she travelled to the state pageant and much to her personal surprise, was named the 1978-79 Pennsylvania Dairy Princess.

"It took a long time to get used to the idea of winning the pageant," she stated. "I'd look in the mirror and I would expect to see someone different, but it was still me."

That was last September, and her duties as royalty started the next day, when at the All-American Dairy Show, she handed out ribbons to the prize winners.

"Busy" is the way she described her life, telling of the 80 to 100 appearances she will have made in her year's reign. Some of her more unusual experiences including going to the Governor Thornburgh's Inaugural Ball, participating in an ice cream eating contest; visiting at the Philadelphia Zoo, and making several TV appearances.

"If I was speaking to a girl trying out for dairy princess today, my advice to her would be to be sure that she wanted to do it," Lisa mused. "If I didn't want to do it, I couldn't have made all those appearances."

"To win the pageant, you just have to be yourself," she added. "If you try too hard to win, you can't do it."

"A dairy princess has to know how to talk to people, that's most important." she stressed. "That's what you do most of your time, and if you don't talk, you can't do your job."

For her state pageant presentation, she told of the magical qualities of cows, speaking of the "magic cows that eat green grass, golden grain, and yellow corn and give white milk". Using a black magician's hat, she would pull first a bull, and then a cow from her hat, capturing her audience's attention.

She told that her talk was geared for children, and that she has given it "numerous" times. She related that she changes it to fit the occasion each time she presents it.

An active teen-ager, the dark blonde young lady graduated with honors recently. While in school, she was a member of both the dairy and sewing 4-H clubs, was senior class treasurer; a member of student council, belonged to Mu Alpha Theta National Honorary Mathematics Club, and was a member of the National Honor Society. She also participated in Key Club, French club, drill team, and concert choir. She lists her hobbies as reading and photography.

She plans to attend Washington and Jefferson College, Washington, Pa., in the Fall, and said that that she plans to become active in school things. She hasn't chosen her major yet.

She will stay in contact with "cows" however, she quickly added, and told that she still plans to help out at home whenever she can.

Lisa has her own favorite dairy recipes and some are listed below.

SCALLOPED POTATOES

3 tablespoons butter
2 tablespoons all-purpose flour
1½ teaspoon salt
1/8 teaspoon pepper
3 cups milk
6 medium potatoes, pared and thinly sliced (6 cups)
2 tablespoons chopped onion

Make white sauce of first five ingredients. (Shredded cheese may be added to sauce.) Place half the potatoes in greased two quart casserole; cover with half the onions and half the sauce. Repeat layers. Cover and bake at 350 Degrees F. about one hour. Uncover and bake 30 minutes longer. Serves four to six.

VANILLA ICE CREAM

½ gallon milk
4 eggs
1 can sweetened condensed milk
1¼ cups granulated sugar
1 tablespoon vanilla

Mix all ingredients in large bowl at low speed with an electric mixer or rotary beater. Place in a freezer container and follow the directions of your freezer.

Forever flashing her bright smile, Lisa Miller, Pennsylvania Dairy Princess, shows how she demonstrates the magic of milk, with the aid of a magic hat, and a stuffed animal bull and cow.

MEATLOAF

⅔ cup dry bread crumbs
1 cup milk
1½ pounds ground beef
2 beaten eggs
¼ cup grated onion
1 teaspoon salt
1/8 teaspoon pepper

Soak bread crumbs in milk. Add eggs, meat, onions, and seasoning. Mix well. Form in loaf, spread with sauce and bake one hour at 350 Degrees F. To make sauce, combine three tablespoons brown sugar, ¼ cup catsup, ¼ teaspoon nutmeg, and one teaspoon dry mustard. Serves six.

NEVER FAIL BUTTERMILK PANCAKES

1 cup sifted all-purpose flour
¾ teaspoon baking powder
¼ teaspoon soda
½ teaspoon salt
1 teaspoon granulated sugar
1 cup butermilk
1 medium egg, well beaten
1 tablespoon melted shortening or oil

Sift flour; measure; resift into mixing bowl with double-acting baking powder, soda, salt, and sugar. Beat egg well and add buttermilk. Stir into dry ingredients; add melted shortening or cooking oil. Beat just until smooth. Heat griddle while mixing the batter. Drop batter with spoon into pools, spreading a bit with back of spoon. Cook until edges appear dry and bubbles are formed but not broken. Turn and brown the other side. Serve hot with butter and heated syrup with bacon or sausages. Makes eight pancakes.

WHIPPED CREAM FROSTED ANGEL CAKE

1 can (12 ounces) cherry dessert filling, chilled
2 teaspoons unflavored gelatin
½ cup cold water
1 packaged (7 inch diameter) angel food cake
2 cups whipping cream

Place dessert filling in small mixing bowl; refrigerate. Sprinkle gelatin over water to soften; heat over low heat, stir constantly until gelatin is dissolved. Cool to room temperature. Split cake into thirds by measuring even widths around the side and marking with wooden picks. Cut across cake with a long sharp knife. Whip cream in a chilled bowl with chilled beaters until peaks will hold, scraping bowl ocasionally. Gradually fold in gelatin. Remove one-half cup whipped cream; fold into deserrt filling. Yield 1⅔ cups.

Spread one-half filling on bottom layer, top with middle layer, spread with remaining filling and cover with top of cake. Frost sides and top with remaining whipped cream. If desired, garnish with candied fruits and nuts. Chill several hours or overnight before serving.

Over this, our most patriotic of holidays, the farmer finds himself in the heart of his productive season. While others think of picnics or the beach, his thoughts might be of harvesting grain or putting up a cutting of hay.

But such is the philosophy of farming. Crops or livestock come first. This requires an admirable devotion to chosen vocation and way of life. From this devotion springs the food and fibre for a nation and much of the world.

A July 4th tribute to our farmers and their families from your Sperry New Holland dealer listed on the opposite page.

SPERRY NEW HOLLAND

Eastern

(Continued from Page 107)

stitutions supposedly gives assurance to Eastern that it will have an outlet for members' milk, and Leprino can allegedly rest assured that it will have milk to make lots of mozzarella cheese. Leprino is headquartered in Denver, Colo., and has manufacturing and distribution facilities scattered across the entire continental United States.

The Eastern-Leprino contract is not a first in dairy marketing. The cheese maker has similar arrangements with other cooperatives in western portions of the nation.

Eastern and Leprino are currently undertaking a joint venture which is designed to turn the dairy manufacturing plants at Horse Heads and Waverly into modern complexes capable of handling 1.3 million pounds of milk per day. That's the goal for later this year, according to Tewksbury. Eventually Eastern may ship as much as 600 million pounds of milk per year to the two plants. According to the top brass here, that's reason to smile. That's a lot of milk and a lot of cheese.

Eastern is counting on this formula to nurse itself back to health.

The two dairy plants were purchased by Eastern at a total cost of $2,357,000. Money for the acquisition was borrowed under an interim financial arrangement made through the Continental Bank of Chicago. Permanent financing has not been finalized, according to Dutton.

While Eastern considers both of the manufacturing facilities as assets, the plant at Waverly is regarded as having the most promising future. Purchased at a cost of $1.7 million, it is eventually supposed to be the biggest mozzarella cheese factory in the United States.

Presently, the Waverly plant is operating at about 800,000 pounds of milk per day. Al Ferrell, spokesman for Leprino Foods at Waverly, says that the plant will eventually employ as many as 250 people. Some 50 people were employed there during early June.

So far the Waverly plant is manufacturing incoming milk to only the curd stage because equipment has not been installed to process cheese through the all phases. Consequently, the curd is trucked to the Horse Heads plant for finishing, a half hour's drive to the north. Both plants have had a vast amount of new equipment installed and more is coming.

Manuel Medel, operations manager at the Horse Heads unit, told **Lancaster Farming** during a recent visit that his plant will also be expanded, although not as elaborately as the one at Waverly. Nevertheless, extensive improvements, including a facelift for the building and landscape, have already been undertaken. The total cost for everything at both plants is $15 million, according to Eastern.

Eastern purchased the Horse Heads plant from Dairylea Cooperative, a dairy farmers' organization which licks wounds of its own. Bruce Snow, public relations man at Dairylea, explains candidly that his co-op sold the 50-some year old facility because it wasn't needed. Dairylea has released several of its plants in order to streamline its operations. Snow readily admits that Dairylea isn't in the best of shape, but adds emphatically that "we've all got very serious problems." He made the remark in reference to the entire family of dairy cooperatives in the Northeast.

Eastern Milk Producers paid $1.7 million for this milk manufacturing plant at Waverly, N.Y. and will spend millions more for renovations and expansion.

Dairylea had used its Horse Heads facilities for the manufacturing of dry milk powder and some butter.

The former owner of the Waverly plant was Farmland Dairies. It too has experienced serious financial difficulties. A spokesman for the firm says the Waverly plant was sold because "we had no need for it." The actual building is 32 years old. But much of the equipment inside is brand new, having been put there by Leprino. Farmland had used it as a bottling center for fluid milk.

Mozzarella is the product at both plants now. Leprino sells it nationwide to restaurants, and pizza parlors.

Spokesmen at Eastern say they were aware of the possibility of an agreement with Leprino when they purchased the Horse Heads plant last August. Tewksbury says Leprino had tried "for years" to seek an arrangement with a dairy cooperative in the Northeast.

Eastern utilized the Horse Heads facility on its own for a few weeks before Leprino took over. The cheese manufacturer began renovations last Summer and had the first cheese coming out of it in October. It's present capacity is about 500,000 pounds of milk per day, although it has exceeded that by 50 per cent when necessary, says Tewksbury.

The Waverly plant was purchased by Eastern in March of this year.

Why did Eastern choose to buy the two aging dairy manufacturing facilities?

Lisle Dutton says: "They are strategically located for supplies and offered easy conversion to mozzarella cheese production."

Under the present arrangements, which have not been legally finalized, Eastern is

Major changes noted in the poultry industry

UNIVESITY PARK – If Rip Van Winkle went to sleep in 1950 and awoke in 1979, he would have difficulty recognizing the poultry industry, according to Anthony P. Stemberger, professor of agricultural economics at Penn State.

Most small farm flocks have disappeared within the past 30 years, Dr. Stemberger noted in a recent issue of "Farm Economics," published by the Cooperative Extension Service at Penn State. Instead of 400 laying hens in a general farming operation, a flock is apt to number 10,000 or more.

Specialized egg operations, rare 30 years ago, are now commonplace and feature 30,000 laying hens or more. A number of flocks contain a quarter of a million hens. Operations to handle a million birds are being developed in Pennsylvania, Dr. Stemberger said.

Some poultrymen with 100,000 or more hens manufacture their own feed and market eggs in addition to producing them. Laying houses are environmentally controlled with mechanized feeding, watering, and egg collecting. Annual labor requirements have been reduced to about six minutes per hen. The hens are kept in cages with two or more in a cage.

Such egg producers are paid on a grade yield basis with egg cleaned, graded, sized, and cartoned at rural points by high-speed equipment that sizes and packages eggs mechanically.

"A lot of today's eggs move from the hen to the consumer without being touched by human hands," the College of Agriculture economist stated.

Marketing channels have been shortened, with processors delivery to retail warehouses or directly to retail stores. It is possible for an egg to be in the consumer's hands only 24 hours after it was laid.

"About the only things that hasn't changed much within the poultry industry during the past 30 years is its location in the Commonwealth," Dr. Stemberger claimed. "Seventy to 80 per cent of production is still concentrated in the southeast corner of the state, with small pockets of production scattered throughout the state," he added.

Many poultry enterprises are integrated through ownership, it was pointed out. Egg production, feed milling, egg processing, and marketing facilities are all owned by an individual or firm and all decisions are made by the owner.

Other enterprises are integrated through contracts. Here the producer furnished housing, equipment, labor, and perhaps fuel. The contractor, usually a processor or feed miller, furnishes birds, feed, and all other inputs. Decisions are made by the contractor. Producers are paid on some guaranteed basis.

"Shielded from price fluctuations, and guaranteed a market outlet, producers can more easily obtain financing for construction of facilities and can concentrate better on production," Dr. Stemberger observed.

Raising of chickens for broilers is now carried out nearly 100 per cent under contract, he observed. Housing is environmentally controlled and fully mechanized with flocks containing 30,000 or more birds. Five or more flocks are grown the year around on litter floors. The part-time operation of one or two broiler broods a year is a thing of the past.

Today's turkey's are grown mostly in confinement, no longer on range as years ago. Flocks are large, usually 10,000 birds or more, with some in the hundreds of thousands. Owner-integrated operations, fully mechanized, prevail. About half of the turkeys are processed into turkey rolls, steaks, and hams–available every day of the year. Whole birds are frozen and sold the year around.

Problems faced by the poultry industry have also changed since 1950. With large operations concentrated in small areas, waste disposal has become crucial. This is especially true for large cage-layer egg "factories" with limited acreage near or adjacent to heavily populated areas.

"Regualtions regarding environmental improvement–through controls on pollution of water, air, noise, and odor– will likely increase investment and operating cost. And there are new zoning actions. All these can put an end to business at particular site," Dr. Stemberger noted.

But he said the problem of fuel scarcity and higher fuel costs works to the advantage of the local producer. The far away producer is at a disadvantage competing for the same market. The Commonwealth now provides a larger local market for eggs and other poultry products than it did 30 years ago.

In summary, Dr. Stemberger, reported egg production declined over a period of about 20 years but has expanded in the last two or three years to a level higher than any previous period. Broiler production has increased steadily over the past 30 years in Pennsylvania. Turkey production declined during the 1950's but has expanded since 1962 to double its previous levels.

"It is quite likely that the decade of the 1980's will see a larger proportion of the nation's eggs, broilers, and turkeys produced and processed within the Keystone State," Dr. Stemberger stated. "Despite the problems of higher energy costs and demands for a clean environment, the poultry industry is in a better competitive position than ever before."

Kutztown FFA takes tour

KUTZTOWN — The Kutztown FFa recently went on educational tours of a pen factory, chocolate factory, police academy, a packing plant and distillery.

At the Wearever Pen Factory at Deer Lake, the members saw how many different types of pens and mechanical pencils were made.

At Chocolate World in Hershey, the FFA toured the plant and saw how chocolate was made. While in Hershey, the members had a tour of the State Police Academy.

Weaver's Bologna Packing Plant, Lebanon, was the third stop, followed by a tour of Michters Distillery.

xxx

Some drainage problems arise from poor grading around the foundation of a house, causing water from downspouts to collect and stand. Regrading these places and using a conduit to lead downspout water away from them will usually correct this situation. (It may also help solve some wet basement troubles at the same time.)

Eastern's equity fund over $1.25 million

By DIETER KRIEG

SYRACUSE, N.Y. — Howard McDonald, general manager of Eastern Milk Producers Cooperative, says "Eastern's net worth has never been better in history." He made the glowing remark at last month's annual meeting, here, at the Hotel Syracuse.

He empasized that the 4500-member dairy farmers' cooperative has been able to reduce its financial costs considerably through the collection of "a number of long-standing debts and by taking strong efficient measures."

Another factor in the improved picture is the operation of two cheese plants acquired by Eastern within the past year and leased to Leprino Foods. Eastern's president, Arden Tewksbury of Meshoppen, Pa., says the two plants, located at Horse Heads and Waverly, N.Y., "have turned around the surplus milk problem. To prove his point, Tewksbury cites marketing figures of March 1978 and March 1979. "Eastern's members had to make up $475,000 in excess marketing costs in March of last year, compared to $70,000 this past March," he says.

For the entire fiscal year, Eastern milked its membership for an estimated $3.5 million to cover marketing costs, the cooperative president has revealed. All of that is part of a dark past for the Syracuse-based milk marketing organization which once boasted a membership of 10,000.

"But I feel if we don't understand the past, then how can we possibly accept the present and how can we prepare for the future?" Tewksbury asked delegates at the annual meeting.

"I'm mighty proud of many of the accomplishments made during those years," he continued, making the remark in reference to the early years of Eastern. He recalled how the cooperative was operating with 1-cent dues and guaranteeing every member a market. "It wasn't hard to obtain new members at that time," he quipped.

But conditions changed when handlers withdrew from the market and in some cases even ceased business completely. That left cooperatives without markets and even non-payments for milk that had already gone to market. "Eastern was not

Howard McDonald

sufficiently ready for the market conditions that developed in 1976-78," the coop chief admitted. "But you know we were not alone," he added.

"Since December of 1976 this cooperative has gone through enough turmoil to last for a lifetime," he said. "The marketing years 1977 and 1978 almost proved to be a disaster for your coop," he told the delegates at the June 6 annual meeting. He praised the membership for their support.

"You are to be complimented, not condemned for your actions," he assured.

Eastern has come under considerable attack from both members, bystanders, and some members of the farm press. Fifty-two dairy farmers who are members of Eastern are 17 directors, former directors, and officers to court for alleged wrongdoings. Charges include mismanagement, the overstepping of authority, and misleading accounting procedures.

Eastern is seeking to clear itself of the challenges. As for an internal housecleaning - some of that's going on too, according to spokesmen at Eastern's Syracuse headquarters.

A financial manager was hired two years ago. He is Herbert Dorn. Last March, a controller was added to the staff. He is Robert Zorn. "We have taken steps to improve the efficiency of our accounting department," says Tewksbury. The cooperative, however, did not have audited financial statements at its annual meeting in June. The fiscal year had ended on March 31. Tewksbury is aware of criticism for providing financial information too slowly, he says.

The unaudited version of Eastern's money sheet says nearly $300,000 in profits were realized during the last fiscal year.

Tewksbury hints that keeping track of accounts in milk marketing is no easy task, especially when many handlers are involved. He's happy that the Leprino Foods arrangement will limit the scope of the accounting demands.

Elaborating on McDonald's rosy statement about Eastern's net worth, Tewksbury revealed that the cooperative's total equity stands at $1.25 million and is growing. The equity is the result of a special equity fund that was initiated 1½ years ago. Members are assessed five cents per hundredweight of milk shipped.

And to keep its operations solvent, Eastern is using a $10 million line of credit through Walter Heller and Associates. The cooperative's director of member and public relations, Lisle Dutton, says between $1.5 million and $3 million are borrowed by Eastern each month. It's paid back the following month. It's necessary to borrow the money because milk suppliers have to wait 30 or even more days before handler pay them. Most of the interest charges are passed on to the handlers. The interest rate is 4½ points over prime, says Dutton.

4-H horse show to be July 7

MEDIA - The annual Four Leaf Clover Horse Show will be held at Rose Tree Park on Route 252 in Media, Saturday, July 7 starting at 8:30 a.m. rain or shine. This open Horse Show is the main fund-raising activity conducted by the Delaware County 4-H Clubs according to Nadine B. Albany, 4-H assistant. The event is sponsored by the 4-H Board of Directors, under the chairmanship of Dolores Simasek of Thornbury, and profits will go to the 4-H Development Fund.

The Horse Show is open to all riders. Most of the 24 classes are for juniors. Six classes are also open to adults, both English and Western.

Mrs. Wilda Fulmer Carr, Elverson is the judge.

Don't Blame Your Age For Poor Hearing

Chicago, Ill — A free offer of special interest to those who hear but do not understand words has been announced by Beltone. A non-operating model of the smallest Beltone aid of its kind will be given absolutely free to anyone requesting it.

True, all hearing problems are not alike...and some cannot be helped by a hearing aid. But audiologists report that many can. So, send for this free model now, and wear it in the privacy of your own home. It is not a real hearing aid, but it will show you how tiny hearing help can be. It's yours to keep, free The actual aid weighs less than a third of an ounce, and it's all at ear level, in one unit

These models are free, so we suggest you write for yours now. Again, we repeat, there is no cost, and certainly no obligation Thousands have already been mailed, so write today to Dept. 8271, Beltone Electronics, 4201 W Victoria, Chicago, Ill. 60646.

DARI-KOOL SYSTEMS–

The first cooler control system to use computer technology to monitor, record, display, and control cooler functions

TEMP-MATIC Solid-State Recorder/Controller

- Built-in Temperature Recorder
- Digital Temperature Display
- Built-in Washing System Components
- Dependable Solid-State Six-Cycle Washing With Digital Mode Display
- Touch-Button Cooler/Washer Control With Manual Override Feature
- Remote Alert For Temperature And Power Loss Warning
- Accurate Solid-State Temperature And Agitator Control

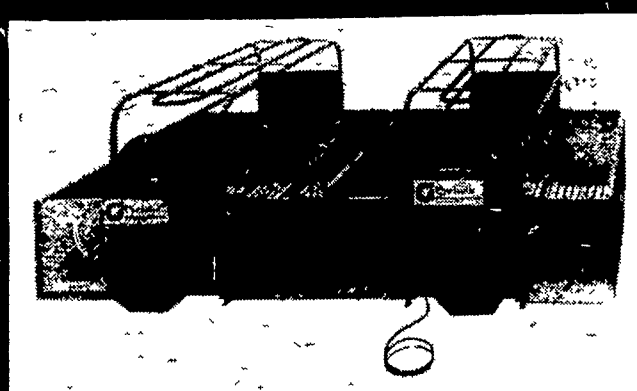
Are You Ready To Go Whole Hog?

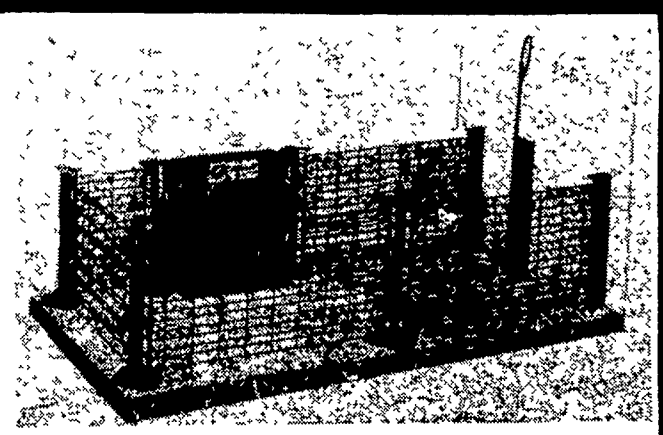
Cyclone-

• Breeding • Gestation • Farrowing
• Nursery • Growing • Finishing

Profitable hog systems don't just happen . . . at Cyclone they are the result of the continuing program of field tests and product improvement initiated in 1961. Cyclone service includes helping you plan the type of system that can increase your production profit by reducing your labor requirements and costs . . . whether it is a complete system you are planning or merely components you require contact Hershey Equipment Co for complete package information including equipment, plumbing, electrical & building.

Let Us Help You Put The Pieces Together

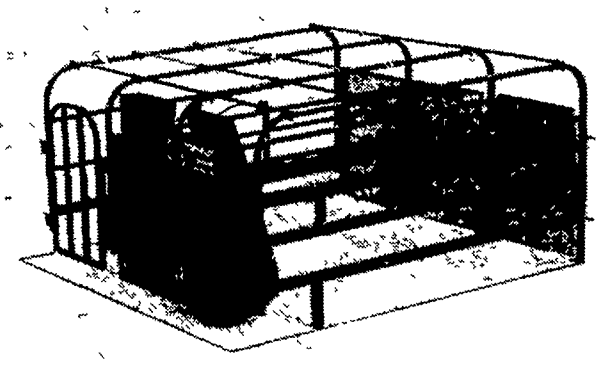


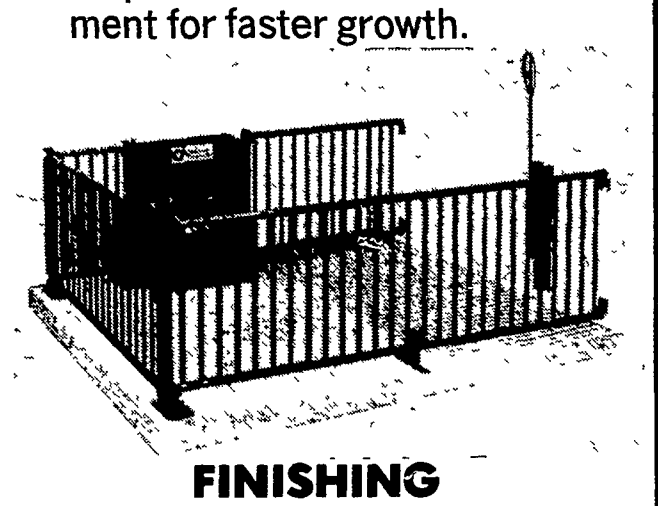


FARROWING

• CYCLONE Farrowing Systems — they will lower your hog mortality, increase profits.

• CYCLONE Nursery Systems — provide the ideal environment for faster growth.





GESTATION

• CYCLONE Gestation Systems — allows controlled feeding makes your feed dollar do more for you.

FINISHING

• CYCLONE Finishing Systems — you finish your hogs with less feed per pound of gain.

Eastern

(Continued from Page 112)

paying for the purchase of the plants, as well as the improvements.

The total bill is figured to be $15 million.

While Eastern is negotiating for permanent credit terms, Leprino Foods is picking up the incoming tabs. According to Dutton, that would be the case anyway because Eastern is leasing the facilities to Leprino over a 20-year term. The plan calls for Leprino to make accelerated lease payments to Eastern. Tewksbury claims the monthly payments will cover the entire costs of construction, as well as interest charges, depreciation, and investment returns on the cooperative's assets.

He notes that the 20-year agreement gives Eastern "time to pay off the plants and gives the co-op a long-range market."

He expects Eastern to come out ahead by $8 million when the agreement expires 20 years hence. On top of that Eastern will own the two new plants which are predicted to have a value of $12 million to $15 million.

While proclaiming that he believes the Leprino deal is in the best interest of Eastern members, Tewksbury doesn't deny that there are risks and uncertainties.

A lot can happen during the 20-year period of the contract. Also, Eastern is operating with borrowed capital and some of the financial strings are closely attached to Leprino Foods. Some observers consider Eastern to be extremely vulnerable since it does not have a strong financial base of its own.

And, according to reports, some of which appeared in **The Wall Street Journal** a year ago, more than one milk marketing organization slipped further into debt in recent years as a result of close connections with dairy product manufacturers.

Some members of Eastern Milk Producers are openly challenging the wisdom of the contract, claiming that the financial figures involved will not benefit Eastern. They fear that Leprino could someday demand more milk than Eastern can provide. The agreement calls for a minimum of 180 million pounds per year.

At 180 million pounds of milk per year, that would mean that the average annual production per Eastern member would be just 40,000 pounds. Eastern handled nearly 2.2 billion pounds of milk during the past fiscal year.

Despite the uncertainties and questions surrounding the dairy cooperative's scramble for better footing, Eastern's management expresses confidence. Tewksbury has been quoted as saying he worries about the 20-year contract too, but he also says there was no better alternative.

Time will tell.

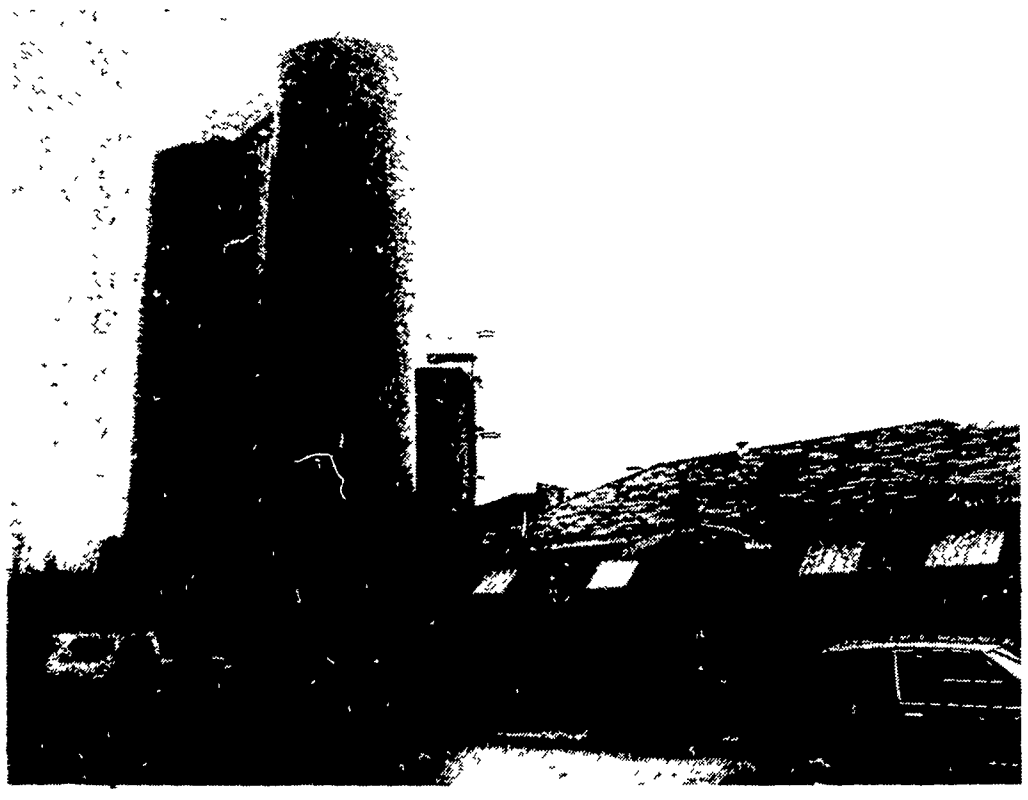
Eastern arranged its contract with Leprino so that the cheese maker would also cover all transportation and laboratory costs. Both of these contract clauses are tied to an inflation index and there is a loophole to renegotiate for higher subsidies on hauling, if necessary. On top of that, Eastern will receive the usual 15 cent per hundredweight trucking credit from Federal Order 2.

Class II prices are being paid to Eastern for milk delivered to Leprino, says Dutton. In addition to that, the cooperative receives pool credits and a 7-cent per hundredweight surcharge from Leprino to cover laboratory costs and any extra transportation expenses.

The bottom line in all of this, according to Dutton, is that "there is no cost to Eastern in operating these plants."

The Leprino connection was highly praised at Eastern's annual meeting in Syracuse last month. The official word was that the arrangements made it possible, at least in part, for Eastern to greatly improve its financial structure. Continued success is predicted and the dairy cooperative has adopted the slogan "Eastern is on the climb in '79."

(Turn to Page 120)



This dairy plant at Horse Heads, N.Y. has the capacity to handle 500,000 pounds of milk per day.

Bees are invaluable

FLEMINGTON, N.J. - The honey bee is unusually industrious. It visits a wider variety of blossoms than any other insect.

In one day, one bee may make a dozen or more trips from the hive, and may visit several thousand flowers. But on each trip it usually confines its visits to one plant species, collecting one kind of nectar and distributing one kind of pollen.

The honey bee is large and hairy and thus can accumulate and distribute an abundance of pollen, making it most valuable for cross-pollinating crops.

Crops most aided by the honey bee are the forae and legume crops, fruits, nut crops and vegetables. In New Jersey the cranberry farms rely to a great degree on honey bee colonies which they contract annually.

So, bees do have a significant function..in addition to production honey and beeswax.

Eastern

(Continued from Page 118)

Audited financial statements from Eastern have not been made available as of June 28. They are forthcoming, promises Dutton. The unaudited figures show that Eastern rolled up a profit of just under $300,000 for the fiscal year ended March 31, 1979. An equal amount of profit is predicted for the current fiscal year, latest unaudited reports from Syracuse show.

Tewksbury concedes, however, that his cooperative was not able to cover all of the marketing costs of 1978 and had to recover approximately $3.5 million from its members.

Those extra handling costs have been cut significantly this year and there is a strong feeling that such expenses may even be eliminated. The marketing outlets at Waverly and Horse Heads are being credited in a big way for this turn-around.

As an example of how effective the Leprino arrangement is, Eastern's officers like to point to last Spring's strike in New York City by milk deliverymen. That dispute rocked milk marketing and handling throughout the Northeast.

Eastern considers itself highly fortunate to have been able to handle a big block of its production "in the country" through Leprino.

"We should all be thankful that Eastern's marketing efforts were not totally concentrated on New York City as some have advocated," observed Tewksbury at last month's annual meeting. "To have done this would have been suicide for your cooperative during this past strike. In my opinion, the marketing system that your cooperative has developed out in the country saved this cooperative from possible ruination," he remarked.

But Eastern isn't out of the woods, by any means. Outside observers say that, and insiders admit to it. "We still have a long ways to go; much important work needs to be done," commented Tewksbury at the annual meeting. Among the upcoming challenges is one which threatens to take the cooperative apart. The plaintiffs in that case are 52 disgruntled members of Eastern who accuse the management of wrongdoing on several counts.

Arden Tewksbury

One of the formal complaints brought to court by the 52 plaintiffs challenges Eastern's Leprino connection and accuses the directors and officers of going ahead with the deal without proper authorization from the membership.

This point was dismissed last week, however, by a Chenango County, N.Y. judge. The decision has brought encouragement to Eastern and Leprino. A spokesman at the New York law firm of Davis and Cox, attorneys for the plaintiffs, told **Lancaster Farming** that a decision has not been made whether or not the plaintiffs will appeal.

The other points of the complaint stand.

A court date to settle those points has not been set.

Eastern's and Leprino's operations continue to roll. That's how Eastern wants it in order to avoid the high marketing costs that were so devastating in 1977 and 1978.

Tewksbury reviews the past situations as ones which were detrimental to everyone producing or marketing milk. And he adds that the problems had to be solved by the individual marketing organizations.

"We set out to do it," the dairy co-op president proclaimed. "That's when talk commenced with the Leprino Cheese Company of Denver," he explained.

And for whatever it's worth, the happenings since then have Eastern smiling - perhaps still somewhat nervously - but smiling nonetheless.

Tewksbury concludes:

"If Eastern members hang in there for the rest of 1979, I think we'll be on an even keel by March of 1980."

Nutrition book recalled

WASHINGTON, D.C. - The U.S. Department of Agriculture has requested Baronet Publishing Co., New York, to remove from circulation all copies of "The Complete Guide to Cholesterol, Sodium and Fats," a book which gives the amounts of these substances found in various foods.

According to D. Mark Hegsted, administrator of the department's Human Nutrition Center, the recall was requested because of potentially dangerous errors in the sodium content listings.

The book, based on the department publication "Nutritive Values of American Foods in Common Units," uses the values for iron in place of those for sodium. In a telegram to Baronet, Hegsted said he considered the error a "serious one because high-salt foods (including table salt)" appear to have negligible quantities of sodium.

Since the book's cover states that the figures included are those of the Department, it "adds an authoritative stance that could contribute to unquestioning acceptance of these tables," Hegsted said.

The error was discovered by a reader in Philadelphia who contacted the Department.

Constructive breeder award won

ELVERSON - The Ayrshire Breeders Association has announced that Charles H. Gable of Conebella Farm, Elverson, Pa. qualified for 21st Constructive Breeder Award during 1978.

In winning the award, the Conebella herd maintained a mature equivalent producion average of 14,234 pounds of milk and 570 pounds of butterfat and had an average classification score of .849 on 44 head of cattle. Twenty-nine Ayrshire Breeders nationwide qualified for this prestigious award in 1978.

The Constructive Breeder Award is presented by the Association to honor Ayrshire Breeders enrolled on Official DHIR testing program and who have their herd classified for type on a regular schedule. To qualify for this award, the majority of Registered Ayrshires in the herd must be bred by the owner and maintain a high level of production with good type conformation.

ARCADIAN® liquid gives a profitable boost to alfalfa after the first cutting.

(Insecticide can also be added)

Give alfalfa a liquid boost after the first cutting
That's when topdressing N-P-K, and micronutrients in an Arcadian® liquid fertilizer made with POLY-N® pays big dividends in high yielding, high quality alfalfa You can even add pesticides if you need to
When it's done right, a topdressing after the first-cutting will increase the yields of later cuttings It will raise the protein content Help the crop compete better against grasses And improve the vigor for a long stand life
Arcadian liquid makes it easy Made the SLF® way, Arcadian liquid gives you uniform distribution of fertilizer ingredients from start to finish It's truly the efficient way to turn alfalfa into green gold

Pat Liles, agricultural statistician for the Pa. Crop Reporting Service, uses an aerial map to check on one of the segments that will be used in the new survey that the department is involved in.

Crop Reporting Service 'ground-truthing' satellite

By KENDACE BORRY

HARRISBURG — The Pennsylvania Crop Reporting Service is involved in a new project—it's doing research in cooperation with National Aeronautics Space Administration, in Houston, Texas, based at the Lyndon B. Johnson Space Center.

The project, which is being done in 29 states, involves collecting data on acreage and crops in sample segments including farmland in Lancaster, Berks, Lehigh, and Chester County. Each segment is five by six nautical miles in size.

It seems that there is a satellite in the sky that is to have the capability to observe crops growing on the earth and identify each of those crops. This satellite's system, which is linked up to computers at the space center, is so sensitive, that it can tell the difference between wheat and barley. It works on a system where reflected light is passed through a prism, broken down and the wave lengths are transformed into numerical data which is transferred to the computers located in the space center.

The satellite makes one pass over the earth every 18 days.

Right now what the Crop Reporting Service will be doing is "ground-truthing", according to Pat Liles, agricultural statistician for the department at Harrisburg.

"We will be doing an inventory of the fields in these sample segments," he explained. "And we will be making a more thorough study of 15 selected cornfields and soybean fields, with farmers' permission."

"Each of those fields, which must be at least 40 acres in size, and convenient to the road, will be checked for the height of plants, ground cover, and the density of crops, among other things." Liles related. "The survey which is starting immediately, will continue through harvest time."

The satellite has been in the air since 1972 and was developed for the purpose of studying worldwide crop situations.

"With this satellite," Liles stated, "The United States can achieve a better estimate of production of crops in the United States and in foreign countries. This satellite will primarily be used to estimate crop production in foreign countries."

"What we're doing right now, in a sense, is refining the satellite's systems, making it more sophistocated. The information that we receive from the farmers fields will not be used as an actual crop survey."

"Another satellite is to go up next year that should be even more accurate," he added.

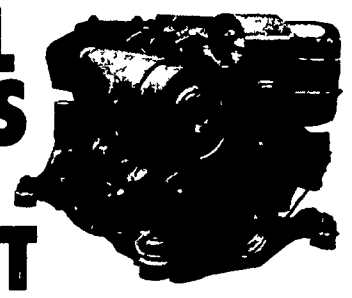
Liles told that he believed that nine field people from the Crop Reporting Service will be involved in the project Pennsylvania, with a total of 200 people involved across the U.S. He added tht Pennsylvania is the pilot state in the Northeast for the satellite testing.

Auctioneer champion named

BRUSH, Colo. - Terry Elson, Curtis, Neb., can tell you there's something to be said about deciding on a career early in life.

Elson, 22, who won the title of 1979 World Livestock Auctioneer Champion here June 16, got a head-start on his career at the age of 10, when he attended an Iowa auctioneering school. According to Elson, he was the youngest student in the school's history—and according to championship officials, he's also the youngest world champion in the history of the 16-year contest.

ALL AIR-COOLED DIESEL ENGINES ARE NOT CREATED EQUAL.



It's easier to call an engine "heavy duty" than it is to build it that way Superior performance and long life are the result of special alloy heads, integral lube coolers, oil-cooled pistons, and the Deutz highly efficient axial-flow cooling blowers These features plus 100% direct air-cooling result in substantial fuel savings — 20 to 40% according to users — and far less pollutants Deutz air-cooled diesels — 5 to 500 bhp

DEUTZ®
AIR-COOLED DIESELS

NEDCO sympathetic to truckers' woes

SYRACUSE, N.Y. - Responding to constantly increasing economic inflation within the dairy and transportation industries, the Executive Committee of Northeast Dairy Cooperative Federation (NEDCO), representing over 50 local cooperatives in New York, Pennsylvania and New Jersey, met in special session on June 21 here and unanimously adopted a policy resolution which says that NEDCO, "in the representation of its cooperative member and the 3000 dairy producers belonging to those cooperatives, re-affirms its policy position that the welfare and stability of our dairy industry absolutely requires a return for milk products marketed which will compensate the costs and expenses of production plus an adequate return on invested farm capital and further, that such return to the producer from the marketplace must reflect the constant increases in production and marketing costs resulting from a spiraling economic inflation."

NEDCO also resolved to "recognize in particular the current staggering increases in the costs of energy in all forms and supports the efforts of the transportation industry to realize a return for services sufficient to meet the costs of transportation fuel, capital equipment replacement, and labor which will permit the maintenance and continuance of an effective marketing and transportation system; and that governmental regulations, in any form, which fail to recognize this critical need and have the effect of forcing haulers of goods to operate at a loss, must be immediately adjusted to the realistic facts of this critical and essential segment of the economy."

"Be it further resolved that the immediate best effort of NEDCO be put to this challenge which not only is of such paramount mutual interest to the agricultural and transportation industries, but essential if the nation is to continue to be served by these industries in providing the agricultural food requirements of our people, and that all other general and specific farm organizations be encouraged to join promptly in this effort," the executive committed concluded.

Hampshire field day held

YORK - Members of the Pennsylvania Hampshire Sheep Association held their annual field day last Saturday at the home of Mr. and Mrs. Stewart Ebersole, York R3. About 80 Hampshire breeders and guests took part in the day-long event.

After a tour of the Ebersole farm, three classes of sheep were lined up for judging. Other events on the schedule included a business meeting, awards presentations and lunch prepared by members and mothers of the York County 4-H Lamb Club. Door prize winners were Sara Brubaker, Todd Miller, and Henry Showalter. Featured speaker for the meeting was Dr. Clair Engle, from Penn State University, on the topic of selection of sheep.

Chairman of the judging activities was York County Agent Tony Dobrosky. Class winners included: Youth Division - 1. Becky Bailore, Orbison; 2. Tim Flory, Red Lion; 3. Tom Muller, Delta; 4. Wayne Miller, York; 5. Tom Flory, Red Lion; 6. Lisa Dobrosky, Glen Rock; 7. Judy Waltersdorff, York.

Ladies Division - 1. Shirley Wilson, Hollywood, Md.; 2. Sharon Ebaugh, Delta; 3. Sue Myers, Seven Valleys; 4. Julie Murphy, Belaton, Md; 5. Emma Patterson, Dalvin.

Men Division - 1. Harold Lewis; 2. Leon Snyder, Red Lion; 3. Bill Wilson, Hollywood, Md; 4. Gerald Dietz, Loganville; 5. Don Flory, Red Lion.

Congratulations DAIRYMEN

External parasites on sheep explained at seminar

By KENDACE BORRY

'DOYLESTOWN — Several different kinds of external parasites can be found on sheep in Pennsylvania. That was the conclusion of Mike Fournier, Bucks County Extension agent, who spoke at the recent sheep seminar held at Delaware Valley College.

He told that the presence of these parasites can cause a large economic loss by damaging wool and causing a general unthriftness in sheep. But, he added, fortunately for owners, most external parasites of sheep can be easily controlled with insecticides.

Sheep Keds, often called sheep ticks, are actually a wingless fly, he related. The pest, can be as large as ¼ inch in length. It spends its entire life cycle on the sheep and gets its nourishment from continually biting and sucking blood from the host animal.

Keds will leave a residue in the wool and this will make the fleece less valuable. A heavy infestation of keds will cause sheep to show signs of irritation and unthriftiness as these sheep generally will not grow as fast as uninfested sheep.

The problem of keds is easily controlled by dipping, spraying or dusting with an approved insecticide. To treat most effectively, one should treat soon after shearing. Usually, one treatment per year will control keds.

There are three different species of lice which can infect sheep. They too spend their entire life cycle on the sheep and will not last long when removed from the host animal.

A sheep with a heavy lice infestation will produce poor quality wool and show a loss in weight gains. The sheep will spend a great deal of time rubbing against fence posts or trees. The control methods used for keds will also control lice.

Wool maggots come from any one of several species of blow flies which lay their eggs on soiled wool, generally around an open sore. When the eggs hatch the maggots feed on the wet wool near the skin and this will cause the wool to loosen and become putrid. Sometimes the open sores that become infested with the maggots also become infected with a bacteria and the sheep can die from this secondary infection.

Sheep with wool maggot infestations tend to lay along fence lines and in shaded areas with their heads outstretched on the ground. Sheep with maggots should be sheared and the infested areas coated with one of many smears: Smear 62 (diphenylamine); EQ-335 (lindane and pine tar); or 5 per cent ronnel (Korlan) smear.

Psoroptic mange, also known as scabies, is caused by small mites that are also invisible to the naked eye. These mites live on the sheep's serum and can cause intense irritation. Sheep infested with mange mites will do a great deal of rubbing and the affected areas generally form scaly lesions or scabs.

Sheep mange is a reportable disease which means that any case of scabies must be reported to state and federal authorities.

Head bots or nose bots are caused by a bee-like fly about the size of a common horse fly. The fly deposits its eggs on the nostrils of the sheep. The maggots then work their way up the nostrils of the sheep causing a snotty nose and sinus problems. Sheep affected with nose bots tend to go off feed, sneeze, and show a constant nasal charge.

For further information about external parasites in sheep, one can contact his county Extension agent.

Walker proposes synthetic fuels bill

WASHINGTON, D.C. - Congressman Bob Walker (R-16-Pa.) last week introduced a bill designed to encourage the production of liquid synthetic fuels.

"My bill is aimed at moving us a step closer toward energy independence. It enables us to rely more on our own technology and resources and less on foreign imports over which we have no control," Walker said.

He noted, "Short term technology is available for production of liquid synthetic fuels from four sources of supply, oil shale, tar sands, coal liquidfication and bio-mass, commonly known as gasohol. With long term planning as our goal there would be both incentives for compliance and penalties for oil companies which did not take advantage of that technology."

Under Walker's proposal, oil companies would be required to produce a minimum of five per cent of liquid syn-fuels by 1985. That figure would be increased to 12 per cent in 1990 and to 20 per cent by the year 2000. Failure to comply would result in a fine of $100,000 a day for each oil company failing to meet the requirement. By following the mandate of the law, tax credits and depreciation allowances would be available for qualified fuel producing facilities.

It would be up to the Energy Secretary to determine if current prohibitive laws at the federal, state or local level prevented new production. If so, the Secretary would have the opportunity to modify any law which stands in the way of synthetic fuels production. Under no circumstances would the Secretary have the authority to waive those laws, however.

The Pennsylvania Republican said, "Currently the U.S. is importing approximately 50 per cent of its fuel from overseas. Consequently the American people suffer whenever those foreign countries find it advantageous to curtail supplies. We need energy independence not only for national security reasons, but to bring back normalcy to life on a day to day basis.

Walker concluded by saying, "This is a realistic bill that provides the necessary independence and requirements needed to produce new energy supplies that will meet the energy demands of our country.

Co-op couples conference to be held

NEWVILLE - Mr. and Mrs. Frank Yost, of Newville, have been selected to attend a special Co-op Couples Conference, July 17 and 18, in Chambersburg, sponsored by the Pennsylvania Association of Farmer Cooperatives.

The two will join with 40 other young couples from throughout the Commonwealth take part in the two-day event. Sessions will be held at the Holiday Inn, Chambersburg Community Park, and on two Franklin County dairy farms.

The two are sponsored by Cumberland-Perry Co-op Council which serves farmer members and communities in this region.

At the conference, they will share facts, opinions, and insights about cooperatives and their role in the strength of the business enterprise system.

In addition, the two will have an opportunity to meet others to discuss ways in which they can play a vital leadership role in cooperative community affairs.

Conference participants will join with cooperative leaders of this area to relate current issues vital to farm leaders, cooperatives, and the community. They also will hear about the educational P.A.F.C. and Penn State programs that are benefitting rural leaders.

The satisfaction that comes from doing a good job of farming

It's a great feeling to know that you are the master of your farmlands . . . that when you treat your soil right, it will treat you right. Liming is one of the most important factors in keeping your soil in the highest productive range. A good pasture with a pH of 6.5 or higher, for example, will make 300 to 400 lbs. of beef per acre and produce up to $100 gross income per acre. This means with the help of lime, profits from pastures can compare favorably with feed or grain crops.

Nadine Prange named Chester County Dairy Princess

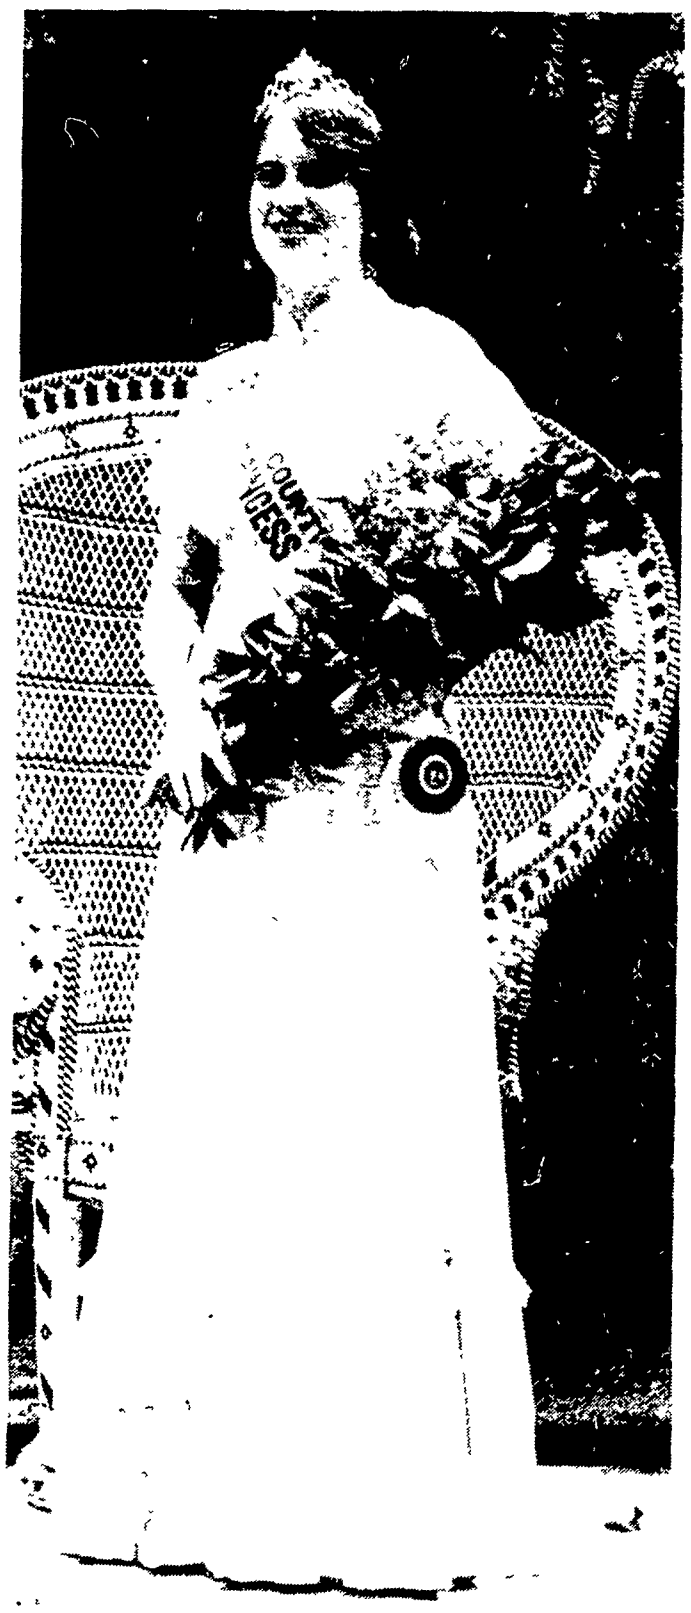
'KIMBERTON - Nineteen year old Nadine Prange, of Cochranville R1, is the new Chester County Dairy Princess. She was selected earlier this month at the annual banquet and pageant at the Kimberton Firehall.

Nadine is the daughter of Mr. and Mrs. Horace Prange. The family has a holstein herd. She attends Mansfield State College majoring in Home Economics. In addition to various 4-H and church activities, Nadine is a member of Russellville Grange.

Nadine was also selected as Miss Congeniality.

Each of the contestants presented a short milk or dairy promotional talk. Nadine's aimed at primary school children, combining the magic of a crystal ball and the importance of milk.

The first runner-up was Patty Jenkins, daughter of Mr. and Mrs. William Jenkins, Toughkenamon. The family raises Jerseys.



Nadine Prange, Cochranville R1, was recently named the new Chester County Princess. She is the daughter of Mr. and Mrs. Horace Prange.

Patty recently graduated from Kennett High School. Her promotion was for a general audience entitled, 'Vist the Dairy Delight'.

Susan Kulp of Pottstown, was second runner-up. The daughter of Mr. and Mrs. Harold Kulp, she attends Owen J. Roberts High School. Her presentation was 'Jogging for Milk'.

Other contestants were: Lois Mark and Alice Mark, both from West Grove. In addition to the dairy promotion, an interview and general dairy knowledge, each of the girls had to answer a question presented to them by Master of Ceremonies Gene McDowell.

Judges for this years contest were Susan Seidel, former Berks County dairy princess; Mrs. Vernette Myers, member of the Berks County Dairy Committee; and George Steele of Pocopson. Steele is presently chairman of the board of directors of Agway, Inc.

Reserve corn released

WASHINGTON, D.C. – Corn in the farmer-owned reserve was released for redemption, effective immediately, by John Goodwin, acting executive vice president of the Commodity Credit Corporation (CCC). Farmers may sell their reserve corn after repaying their CCC price support loans.

Release of the reserve does not require farmers to redeem or sell their grain at this time.

Goodwin said the national average market price for corn has reached $2.50 per bushel. The price level at which the commodity is released from the reserve is 125 per cent of the $2.00 national loan rate or $2.50 per bushel. More than 730 million bushel of corn are in the reserve.

Farmers with grain in the reserve receive storage payments from the U.S. Department of Agriculture. Upon repayment of the loan, farmers can keep the storage paymens earned through the date of repayment.

On July 31, the department will review the average price for corn to determine if the release authorized should remain in effect. If release continues, storage earnings will stop in those states where the price remains above the release level.

Pfizer Genetics releases new corn hybrids

Pfizer Genetics Inc., producer and marketer of Trojan brand seed corn, has introduced four hybrids in a wide range of maturities for 1980 plantings. These hybrids incorporate modern characteristics such as stress tolerance and fast drydown.

The new hybrids have resulted from several years of plant breeding, hybrid selection and testing. Each new hybrid has also been tested in the company's TST on-farm testing program. Based on those results, company researchers and agronomists state that these new products are designed to fit the needs of modern farmers.

The four new hybrids include:

Trojan T759 – Ultra-early. This is a 75-day variety specially tailored for use in the shortest seasoned corn-growing regions of the country;

Trojan T929 – Early. This 92-day hybrid has high yield potential, rapid drydown and excellent drouth tolerance;

Trojan T989 – Medium tall. This 98-day hybrid is adaptable as a silage or grain variety, having outyielded many longer-seasoned hybrids in both forms, and;

Trojan T1189 – Full-season. It is a 118-day variety that yields competitively with hybrids in its maturity...in addition it has excellent stalks for good standability.

These hybrids complement the Trojan line up which comprises a complete range of hybrids from 70 - 121 days maturity.

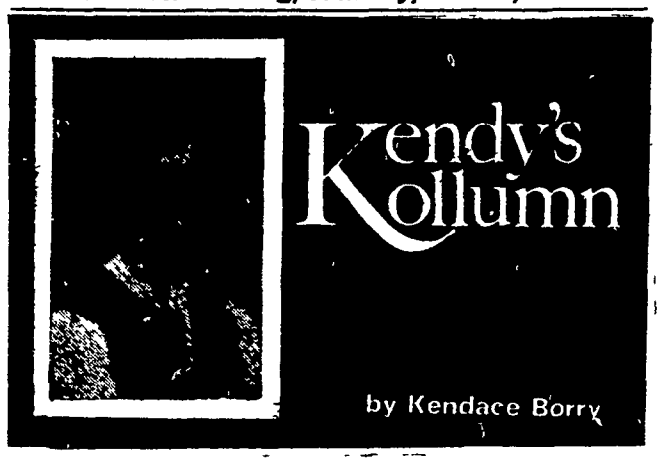
Not responsible for accidents on premises.
If you are interested in holding an auction, call the above number.
Remember, we let you decide.



Concerning the continuing perils of Rebel, that bay horse who has been locked in the barn due to a leg injury, there is only one way to describe it. The horse has gone crazy.

By last Sunday, when you would walk past his stall, he would stand there and leer at you, defying you to enter his stall where he could "get" you. When he was fed, the feed was wolfed down in three gulps and he'd give you a stare that said, "Get me more, or the barn wall gets kicked in."

Sunday afternoon, my good husband had pity on the beast and decided to take him for a nice leisurely walk. So he put the halter and lead rope on the horse and eased Rebel, still encased in bandages from hip to toe on one leg, out of the stall.

From what I gathered, the horse came out like a run-away steam engine.

Five minutes later, still carrying the lead rope in one hand, my husband burst into the kitchen. Looking a little grim, he announced that Rebel was now back in his stall. Then he proceeded to tell me in graphic details how the "injured" beast kicked, lunged, whirled, and reared, before he got him back in safely.

Rebel was becoming a definite problem.

So he stayed in his stall, except for very brief hair-raising walks that added to the excitement for the day.

But on Tuesday, the veterinarian had pity on us, and announced that the horse could be allowed out to pasture. So on Wednesday, Rebel kicked, galloped, squealed and rolled to his heart's content.

Oh, the vet also said that we could begin to ride Rebel again.

I don't know, I think I may let that slide for a couple of days.

FFA donates $1000 to Penn State

Penn State University is planning for a new multi-purpose arena and the Pennsylvania Association of Future Farmers of America (FFA) recently became the first organization to contribute money to the cause. From left are State FFA representative James Fink, Gary Kwisnik, former State FFA treasurer; Sheryl Bollinger, former State FFA secretary; John Trapasac, former State FFA president; and James Beattie, Dean of the College of Agriculture at Penn State.

Meat Pricing Task Force reports to Bergland

WASHINGTON, D.C. - Formula trading of meat should not be banned, and mandatory price reporting should presently be avoided.

There are two major recommendations in the Meat Pricing Task Force report presented to Secretary of Agriculture Bob Bergland.

The Task Force considered the testimony of 48 witnesses who testified at public hearings at Omaha, Amarillo, and Washington, D.C., and the written statements and telegrams submitted by 60 people.

Meeting in Dallas June 10-12 to analyze the facts it assembled, the Task Force refined the information into nine basic issues: electronic marketing; packer-to-packer trading, price aspect only; commodity futures trading; formula trading; thin market; improvement in price reporting services, including boxed beef· manipulation of markets, prices and reported prices; mandatory reporting and response (licensing) and legislation.

The task force expressed serious concern about the thin markets, that is, the small volume of trading, on which some price quotations of beef are based.

It recommended that the secretary and industry act to gain full cooperation of packers, retailers and other segments of the industry in substantially broadening the base of reportable negotiated price transactions.

Also, it recommended that price reporting services be encouraged to continue use of packer-to-packer prices to the fullest extent to increase the price base for price reporting.

Other specific recommendations made by the task force include:

–The meat industry should be encouraged to proceed with development and pilot testing of an electronic meat marketing system.

–USDA should monitor new electronic marketing systems as it monitors other livestock and meat market systems.

--The packers and stockyard program should maintain close cooperation with the Commodity Futures Trading Commission in monitoring live cattle futures trading.

--Periodic surveys by USDA should be conducted to monitor price and procurement related activities similar to the analysis done for the "Beef Pricing Report."

–USDA, in consulation with industry and consumer representatives should promptly conduct an in-depth study of the adequacy of present reporting of both carcasses and fabricated beef and should establish standards of adequate reporting of a thin market.

The public hearings focused on formula pricing of beef carcasses and packer-to-packer trading.

Witnesses represented the three major meat price reporting services, industry trade associations, large and small meat packers, cattle feeder organizations, produce groups, university professors of agricultural economics, livestock brokerage groups, consumer organizations, U.S. Department of Defense meat procurement officers, and a firm active in electronic marketing research and marketing exchanges.

Poster award given

DOYLESTOWN - Following the theme that 4-H'ers are "Reaching Out", fourteen Bucks County 4-H members participated in a recent poster art contest. The posters were judged at the June County Council meeting by other 4-H club members.

First place winner is Karen Rick, Springtown 4-H Club. Karen's poster has been sent on to state competition. Heather Harris, Richboro 4-H Club, placed second. Albert Worrall and Jennifer Bishop, both of the Hilltown 4-H Club, received honorable mention prizes. All 4-H members who participated received 4-H clover emblems.

Ocean may generate electricity

WHITE SULPHUR SPRINGS, W.Va. - Energy conversion, by means of solar-heated ocean surface water, was shown to be a potential source for production of ammonia for nitrogen fertilizers here this week at The Fertilizer Institute annual Marketing Conference.

John F. Babbitt, president, Devco International, Inc., explained that the temperature differential between the ocean surface water, and cooler water at greater depths "can be utilized to produce an almost unlimited quantity of electrical power." This power, he said, is proposed for use in producing ammonia under the U.S. Department of Energy Ocean Thermal Energy Conversion (OTEC) program. The effort is based on work carried out by the Applied Physics Laboratory of Johns Hopkins University, he added. Devco International, a firm concerned with fertilizer and natural resources development projects, is involved in the OTEC program.

Babbitt explained the impact of the ocean thermal work on ammonia production. "Since there is no hydrocarbon feedstock required to produce ammonia using the OTEC method, the rapid cost escalation of traditional and limited sources of natural gas, and the ever-increasing estimated costs of proposed ammonia process feedstocks using coal or its derivatives, make ammonia production on an OTEC "plantship" a potentially viable alternative for U.S. future nitrogen fertilizer needs."

145 Guernseys At Auction

McDONALD PROPERTIES

At The Farm — Cortland, N.Y. — July 9, 1979 — 10:30 A.M.

Reed L. & Eleanor F. McJunkin, Owners — Lloyd G. Vail, Herd Manager

Farm Phone: 607-756-9283

SELL 145 HEAD - 3 BULLS - 67 COWS
75 BRED AND OPEN HEIFERS

The McDonald Properties herd is one of the top Guernsey herds in America. The 1978 DHIR herd lactation average was 14,527 M — 716F on 62 cows which was 2nd in milk and 1st in fat on herds with 50 to 75 records. The herd has one of the highest type scores in the breed — on May 12th classification — there were 11 Excellent and 36 Very Goods.

A feature of the sale will be McDonalds Darimost Jean EX-3X and her family. She has made class leading records of 2-2-18, 390-922-305; 3-4-22, 120-1, 129-305; 4-4-21, 770-1; 041-305. She sells with 2 daughters and a son all by Clovelly Top Hornet. Also selling will be her full sister. Their dam Winacres Ferdnands Jean was EX-94 — 9 lact. total 150, 180 M-8, 231 F-3, 267 da. high record 9-2-21,220-1,166-365-2X.

Seldom does an opportunity come to livestock breeders to purchase members of female families such as "Jeans".

There also are many other deep pedigreed top cows with large families selling.

Prominent sires represented: Western Glow Darimost (21), Applebrook Fames Corporal (16), Clovelly Top Hornet (13), Housleys Dari Fayvor (13), Lyrene May Rose Prince (13).

SALES HEADQUARTERS: Holiday Inn, Cortland, N.Y. 13045.
Phone: 607-756-7543.

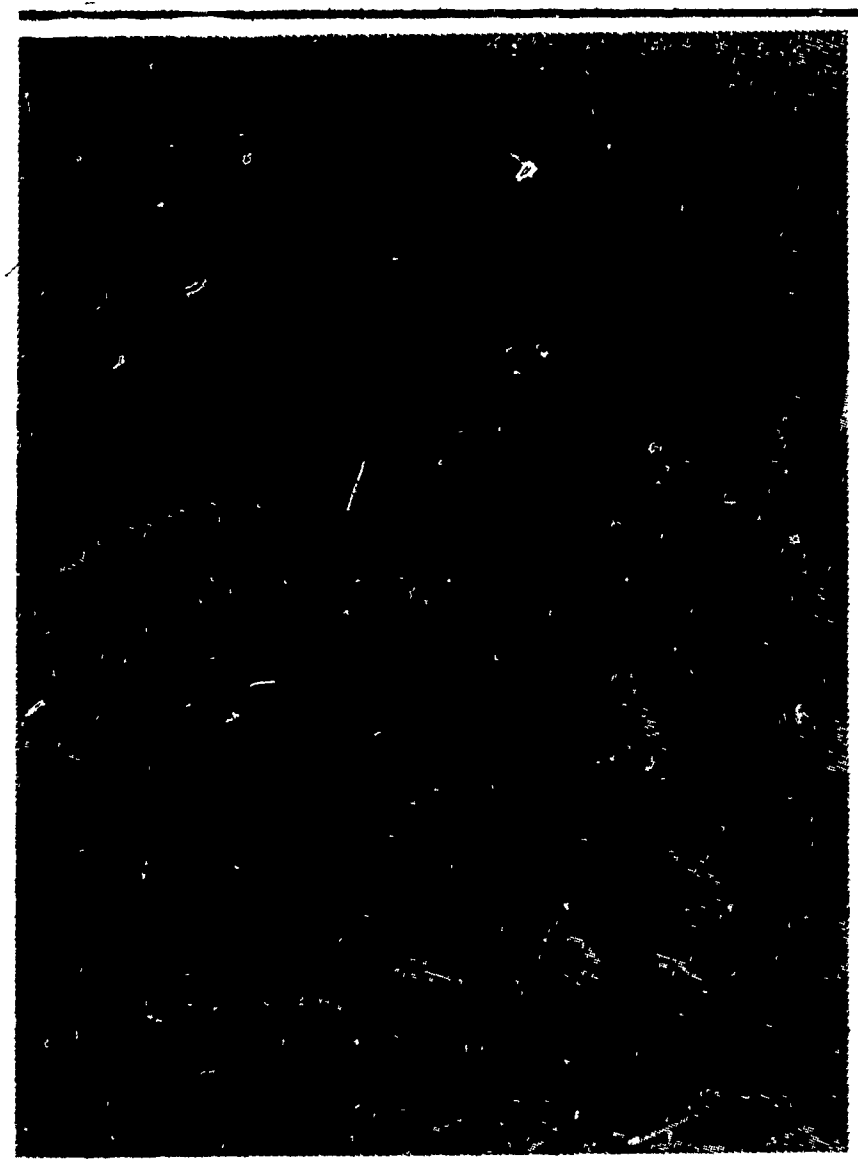
PURINA DAIRY NEWS

VOLUME 1 NUMBER 3 JUNE 23, 197



Ruben Houser and his top cow Lisa, Hilltop Apollo Ivanhoe, Born August 22, 1972

MANAGEMENT + BREEDING + HI-ENERGY FEED = 150 LBS. OF MILK ON TEST DAY

Ruben Houser knows his cows! Lisa had previously milked 25,723 lbs. of milk. She had a good dry period - calved with no problems. When Lisa hit 120 lbs. of milk on her first test, Ruben knew she could do more - but how much more? He set his goal - 150 lbs. on next test day. On June 12 P.M. Lisa milked 77 lbs. and on June 13 A.M. she milked 74 lbs. giving her 151 lbs. total.

The Ralston Purina Company wants to congratulate Ruben and Renee Houser on this fine dairy achievement. Ruben, Renee and their two daughters live in Lebanon, Pa. They rent their barn and pasture for their 33 registered holsteins from Ruben's father. In addition to having a fine dairy herd, Ruben also is an auctioneer and conducts public auctions.

NUTRITIONAL PROGRAMMING HELPS SOLVE PROBLEMS

Having a sound easy to follow dairy program helps to solve problems when they occur. Energy level and balance between calcium and phosphorus are most important to high producing cows. Programming helps supply the right mineral balance and avoid milk fever - knowing the energy requirements lets you know how much feed the high producing cow needs during the critical breeding and settling period.

Ruben reviews dairy program with Purina District Manager Don Mahlandt

15 OUT OF 33 HIT 100

Ruben plans to milk a total of 40 cows. Of the 33 cows presently in the barn, 15 cows have hit the 100 lb. mark during their current lactation. That's quite a record when you consider that of the 33 total cows, 9 are 1st calf heifers. Getting the right feed to the right cows at the right stage of lactation is the key.

Hard work, the right kind of hay, and a good feed are the basics needed to make milk. Ruben is a full time dairyman which means he buys all his roughage and feed. The cows are making the money, and it takes time to do things right and have a first class dairy operation. Ruben keeps his feed cost down by using two feeds on the milking herd. Cows just fresh and producing over 70 lbs. of milk are fed Purina Test Cow. Cows under 70 lbs. are fed a home mix of ear corn and Purina Cow 38. Ruben knows that hay is important to butterfat test. He feeds a good alfalfa hay twice a day and a good grass hay twice per day. Once he stopped feeding the grass hay and went to all alfalfa - when the next test papers came and he saw that his high producing cows had lost their fat test, he went back to feeding grass hay and the fat test came back up. Ruben knows that a high testing cow must chew her cud - a cow's saliva contains natural buffers which controls the PH of the rumen.
